MOTTO

وَمِنَ النَّاسِ مَن يَتَّخِذُ مِن دُونِ اللَّهِ أَنْدَاداً يُحِبُّونَهُمْ كَحُبِّ اللَّهِ وَالَّذِينَ آمَنُوا أَشَدُّ
حُبًّا لِلَّهِ وَلَوْ يَرَى الَّذِينَ ظَلَمُوا إِذْ يَرُونَ الْعَذَابَ أَنَّ الْقُوَّةَ لِلَّهِ جَمِيعاً وَأَنَّ اللَّهَ شَدِيدُ
الْعَذَابِ

“Yet there are men who take (for worship) others besides Allah, as equal (with Allah): They love them as they should love Allah. But those of Faith are overflowing in their love for Allah. If only the unrighteous could see, behold, they would see the penalty: that to Allah belongs all power, and Allah will strongly enforce the penalty.”

ABSTRACT

Mahabbah is sublime love, pure, and unconditionally to God. It is the highest purpose from stations (*maqamat*) that will be reached by *sawab*. After achieving this stage, there is no stage else except only as an effect of love, such as: longing, intimate, and other similar traits. Love to God will give any virtues for the lover. Allah will love as they love Him. Even Allah said in the *Hadis/ Qudsi* that He will be their ears, eyes, hands, and strong pillar for the lover.

Love to God is only done by them who have faith. It is like mentioned in the holy Quran Surat *al-Baqarah* [2] verse 165. From this verse can be understood that the purity love to God is sign of one's faith. Self efficacy is included in it because the main point of self efficacy is about belief. Self efficacy is beliefs in one's capability to mobilize motivation, cognitive resources, course of action needed to meet given situation demands.

Starting from theory above and restlessness of FUPK student period 2009 of IAIN Walisongo in getting job this research has one hypothesis: is there positive correlation between *mahabbah* and self efficacy? And also it has purpose to know the correlation between *mahabbah* and self efficacy of FUPK student period 2009 of IAIN Walisongo Semarang. Design that used in this research is quantitative approach. Subject of this research is FUPK student period 2009. The data will be analyzed by correlation Product Moment Analysis.

From the result of research as an empirical data, it can be concluded that there is positive correlation between *mahabbah* and self efficacy. Hypothesis of this research is rightly answered. The result of product moment analysis between *mahabbah* and self efficacy is said that the coefficient of r is 0,719. With significant value is 0,000 below 0,001. It means correlation between *mahabbah* and self efficacy is very significant. Its correlation is positive correlation. It means the higher the level of *mahabbah* will make the higher the level of self efficacy.
