ABSTRACT

Title : THE USE OF POP-UP STORY BOOK TO IMPROVE SPEAKING ABILITY ON RECOUNT TEXT (A Classroom Action Research with the Eighth Graders of MTs Al-Asror Gunungpati Semarang in the Academic Year of 2015/2016)

Writer : Istianatus Sa’diyah
Student Number : 113411004

This study is focused on speaking. Speaking is an important to be learnt because it is the way to communicate with other people, but in fact the students’ ability in speaking is low. It is caused by students’ limitation in mastering the aspects of speaking such as vocabulary, pronunciation, grammar, and fluency. In this research, the researcher used pop-up story book learning medium to improve students’ speaking ability especially on recount text. The objectives of this study are: (1) To describe the students’ participation during learning process by using pop-up story book to improve speaking ability in recount text (2) To identify the improvement students’ speaking ability in recount text after being taught using pop-up story book. This study is classroom action research that was done in two cycles. The data collection was done using documentation, observation, and test. The data from the observation that had been taken from every cycle was analyzed descriptively while the data from test was analyzed quantitatively. In this research, the researcher used pop-up story book in teaching speaking recount text at MTs Al-Asror Gunungpati Semarang. The participant of this study was 35 students in class VIII\textsuperscript{th} C. The result of this study showed that using pop-up story book learning media can improve students’ speaking ability on recount text. This is proved by students’ test score that improved in every cycle. In the pre-research, the students’ average score was 55.83. In the first cycle, the students’ average score was 69.38 and in the second cycle students got 74.
The result of this study is expected to become the information for teacher of English in teaching speaking especially speaking of recount text.
ACKNOWLEDGEMENT

Alhamdulillahi rabbil ‘alamin, none of the best word to express my gratitude to Allah for His Rahman and Rahim until this research could be completely finished. Then, Sholawat and Salutation are always offered to the Prophet Muhammad, the most beloved Prophet of Allah.

It is also a pleasure to thank many people who made this thesis entitled "The Use of Pop-up Story Book to Improve Speaking Ability on Recount (an Action Research with the Eighth Graders at MTs. Al-Asror Gunungpati Semarang in the Academic Year of 2015/2016)". The researcher would like to acknowledge that she cannot complete this thesis without love, support, cooperation, help, and encouragement from them. Therefore, the researcher would like to extend her appreciation to:

1. Dr. H. Raharjo M.Ed, St. as the Dean of Islamic Education and Teacher Training Faculty (FITK).
2. Dr. H. Ikhrom, M.Ag. as the Head of English Department.
3. Dra. Hj. Siti Mariam M.Pd. as advisor of this research. I would like to thank a million for their generous invaluable advice and positive direction and their time throughout the entire writing process. I owe much gratitude to them and I would not have come this far without them and their continuous support.
4. All lectures especially English Department of Islamic Education and Teacher Training Faculty (FITK).
5. My great father and mother, for being my constant source of unconditional love, for the sincere prayers, and for always being home for me.

6. BITA Community that had given me new religious atmosphere (Especially Amar, Lilik, Anshori, Jamal, Saiful, Faris, Sauqy, Uzy)

7. All of my wonderful friends at the English Department 2011 for the colorful days of laugh, jokes, tears and togetherness. (Especially, Novi, Nisa, Ni’mah, Mbk Dea, Pipeh, Atin)

8. Drs. Subki as the head Master of MTs Al-Asror Gunungpati semarang, who had the writer to carry out the research in his school.

9. Mrs. Nur Syafa’ah M.Pd as a collaborator in this research.

10. And all to people who have helped the researcher to finish this study.

    The researcher realizes that this thesis cannot be considered perfect without critiques and suggestions. Therefore, it is such a pleasure for her to get critiques and suggestions to make this thesis better.

CHAPTER I
INTRODUCTION

A. Background of the Research

Language is very important in our lives, because it is always used in our daily activity to communicate with others. One standard definition of language, it is stated that a language is a system of arbitrary conventionalized vocal symbol, written or gestural symbol that enables member of a given community to communicate intelligibly with one another.\(^1\) It can be said that we can’t communicate each other without language, because it is one of the communication tools used by people in general. We can use language to convey our messages or to express our ideas through oral, written, or signal language.

As human we are taught to speak by using language. Allah decrees in the holy Qur’an surah Ar-Rahman: 3-4 as follows:

\textit{حَلَقَ الْإِنْسَانَ عَلَّمَهُ الْبَيَانَ}\

“He has created man. He has taught him to speech (and intelligence)…”\(^2\)

---

Allah, Ar-Rahman, taught this Al-Qur’an to all of the Ummat in this world. “He has created man” the most of creature who needs His guidances, as well as the most potential to take advantages of the guidances and “He has taught him to speech”, namely the ability to explain what is in his mind, with a variety of the main way that is talking with good and right. The word al-insan in this surah included all of human, since the Adam A.S until the end of time. The word al-bayan at the means clear. This word was understood by Thabathaba’i in the sense of “potential reveal”, namely kalam or greeting that can be revealed what contained in mind.³

There are four skills required in English teaching learning program. They are reading, speaking, listening and writing. Speaking foreign language is not so easy in our own language because both foreign and native language have different rules. In reality, many students still leave many problems.

Speaking is one of four language skills that needed in human life. Speaking and human being cannot be separated from each other. Speaking is used to express their ideas and to communicate to people in civilized world. Speaking is so much a part of daily life that we take it for granted. The average person

³M. Quraish Shihab, Tafsir Al-Misbah, (Jakarta: Lentera Hati, 2002), p.278
produces tens of thousands of word a day, although some peoples, like auctioneer or politicians, may produce even more than that.⁴

Some problems in learning English process are the teacher teaches them by using English rarely, the lesson is intended to the grammatical aspects not the conversation, and the students do not get the function and the element of the grammar they learn. So they do not know when they should use the grammar and how to apply it.

Richard states the mastery of speaking skills in English a priority for many second language or foreign language learners.⁵ Consequently, learners often evaluate their success in language learning as well as the effectiveness of their English course on the basis of how much they fell they have improved in their spoken language proficiency.

In order to be able to speak English well, students have to feel comfort and confident. They also must practice their skill in everyday live. Therefore, the teacher should give students opportunity to practice their speaking skill by giving some more example or activities that put them into the real practice communication.

In Indonesia, students are usually afraid of joining foreign language classes. They may feel unmotivated, discouraged easily.

---

⁵C Jack Richard, “Teaching Listening And Speaking (From Theory To Practice)”, (New York: Cambridge University Press), p.19
Their mindsets say foreign language is difficult to learn because most of them know nothing from the start. Usually, students know nothing how to express what they want to say.\textsuperscript{6}

The reasons of learning are to change students’ intellectuality, morality and societal attitude. To reach the reason, the students interact with circle of learn that arranged by teacher in the learning process. There are two aspects in learning methodology such as; learning method and learning media as tools to help students in learning process. While, judgment is tool to measure or determine standard of achievement on the reason of learning.\textsuperscript{7}

The use of appropriate learning media in teaching learning process can influence the students’ achievement in learning language, especially speaking skill in English. It is appropriate with Nana Sudjanas’ said “Learning media” in learning process gives advantages to make learning more attractive, material of learning more clearly, learning methods more have variation”\textsuperscript{8}

In the development of the education at the present time, there are many kinds of media that can be applied in language

\textsuperscript{6} Intan Aulia, Unpublished Thesis Under The Title “The Effectiveness Of Using Describing Picture To Improve Students’ Speaking Skill In Descriptive Text” (Semarang: Iain Walisongo, 2010)

\textsuperscript{7} Nana Sudjana, Ahmad Rivai, \textit{Media Pengajaran}, (Bandung: CV Sinar Baru, 1991), p.1

teaching. One of them is pop-up Story book. Pop-up Story book is a book that has moving parts or have a three dimensional elements and provide a more interesting story visualization, ranging from display images that can move when the page is opened.

In MTs. Al-Asrør Gunungpati Semarang, especially in VIII C, the students’ speaking ability on recount text is low. The standard of English score is 7.0 but there were many students that did not reach it yet. The lowest score is 56, the highest score is 66, and the average score is 55.83.

Based on the result of observation in preliminary research, the researcher and the teacher discussed about the problem and look for the solution to improve students’ speaking ability on recount text. Teaching speaking in the classroom should be interested with appropriate media in order to make students speaking ability on recount text can be improved and the process of learning can be enjoyable.

In this research, the researcher is offered pop-up Story book learning medium as a teaching media which is regarded very powerful for improving students’ speaking ability on recount text. The researcher hoped the use of pop-up Story book can improve speaking ability on recount text of MTs. Al-Asrør Gunungpati Semarang.

---

9 Dzuanda, Design Pop-Up Child Book Puppet Figure Series “Gatotkaca” Http://Digilib.Its.Ac.Id/Public/Its-Undergraduate-5380-3402100054- Cover%20en.Pdf, Retrieved From Internet On June 11th 2015
Considering the above matter, the researcher conducted a research entitled “The Use of Pop-UpStory Book to Improve Speaking Ability on Recount Text (A Classroom Action Research with the Eighth Graders of MTs Al-Asror Gunungpati Semarang in The Academic Year of 2015/2016)”

B. Reason For Choosing The Topic

There are three reasons for choosing this topic:
1. Speaking is language skills which should be developed for students in mastering English.
2. Most of students get difficulties when they have to speak moreover retelling an English text.
3. The researcher wants to introduce pop-up story book as a media in teaching speaking recount text.

C. Research Question

1. What is the improvement of students’ speaking ability on recount text after being taught using pop-up storybook?

D. Objectives the Research

The objective of this research is:
1. To identify the improvement students’ speaking ability in recount text after being taught using pop-up story book.

E. Benefit of the Research

Based on the objectives of the research, the benefit of the research can be stated as follow:
1. For Students
   This research can add the students’ interest in English learning, so it can help them to speak and learn English

2. For Teachers
   This research not only can give additional contribution to English teachers to develop language teaching, but also the teachers are able to improve the quality of teaching learning process.

3. For the researcher
   The research can contribute the researcher to help to find out the best media for teaching speaking.
CHAPTER II
THE USE OF POP-UP STORY BOOK TO IMPROVE SPEAKING ABILITY ON RECOUNT TEXT

A. Previous Research

This previous research is from M. Mursyid, student’s number 2701409003. Bachelor Program of Arabic language Education of Semarang State University (UNNES). The title is “Arabic Storybook Series: Media Keterampilan Membaca Bahasa Arab Kelas IV MI Miftahul Hidayah Visualisasi Tiga Dimensi” the objective of this study is to know the suitable of Arabic storybook series learning media to students, teacher and curriculum. In order to achieve the objective of the study, the researcher conducted a research and development as the method of the research. This study was conducted of the IV grade students of MI Miftahul Hidayah Gunungpati in the academic year of 2013. The number of the students was 25 students. The result of this research showed the students liked the situation of teaching and learning when using the media as the aids of process of teaching and learning. As many 21% of students particularly liked the task given in the high category, 17% of students liked the preference level is very high category, 14% faster category,
11% is rather high, 6% is very fast, 5% rather quickly, 1% lower only 0% and less like tasks given or into the category of slow.¹

The difference between his previous research and this research is the previous research used learning media to improve students’ reading skill but the writer focused on speaking skill. The writer designed her research as a classroom action research but the previous research designed his research as a research and development study (RnD)

The similarities between his research and my research are using kinds of pop-up book learning media.

This second one research is from Farid Helmi, student’s number 063411058. Bachelor program of English Language Education of Walisongo State Institute for Islamic Studies (IAIN Walisongo Semarang). The title is “Improving Students’ Skill in Writing Recount Text by Using a Personal Letter” (A Classroom Action Research With the Tenth Graders Of MASS Proto Pekalongan In The Academic Years of 2011/2012). The objective of this study is to describe the improvement of students’ skill in writing recount text after being taught by personal letter. In order to achieve the objective of the study, the researcher conducted a classroom action research as the method of his research. This study was conducted of the X grade students of MASS Proto Pekalongan in the academic year of 2011/2012. The number of

the students was 39 students. There were three meetings during the research. They are preliminary research, cycle I and cycle II and those are given after the treatment. The result of the test showed that the students’ score in the preliminary test was 55.5, the students’ score in the cycle I Test was 65.7, and the students’ score in the cycle II was 72.2. The achievement of the test showed that the treatment was successful and effective because the result of the cycle II was higher than the cycle test I. In line with this result, the researcher concluded that the research improved students’ recount writing skill.²

The difference between his previous research and this research is the previous research used personal letter learning media to improve students’ writing recount text but the writer focused on speaking skill and also used pop-up story book learning media in teaching recount text.

The similarities between his research and my research are using classroom action research, and also he taught the same material, that is recount text.

The last one is from Intan Aulia Asfa student’s number 63411061. Bachelor program of English Language Education of Walisongo State Institute for Islamic Studies (IAIN Walisongo

² Farid Helmi, Unpublished Thesis Under Title “Improving Students’ Skill In Writing Recount Text By Using A Personal Letter” ( A Classroom Action Research With The Tenth Graders Of MASS Proto Pekalongan In The Academic Year of 2011/2012), (Semarang: UIN Walisongo, 2011)
The title is “The Effectiveness of Using Describing Picture To Improve Students’ Speaking Skill in Descriptive Text (An Experimental Research At The Eighth Grade Students of SMP H. Isriati Semarang In 2010/2011 Academic Year). The objective of this study was to described picture as technique/method to improve students’ speaking skill in describing text. In order to achieve the objective of the study, the researcher conducted an experimental research as the method of his research, which conducted in two classes; the experimental group (VIII A) and control group (VIII C) as sample. The VIII A was taught by using describing picture, while the VIII C was taught without describing picture (Direct Method).

After the data had been collected by using test, she concluded that t-test was (4.348), whereas the t-table was (2.01) for α = 5%. The t-test score was higher the t-table (4.348 > 2.01). It was meant that Ha (alternative hypotheses) was acceptable while Ho (null Hypotheses) was rejected. Since t-test score was higher than the t-table, describing picture was effective technique/method in improving students’ speaking skill in descriptive text at the eighth grade students of SMP H.Isriati Semarang.  

---

The differences of the second previous research and this research is the second previous research focused on descriptive text to improve students’ speaking skill and the writer focused on recount text to improve students’ speaking skill.

The similarities of the second research and this research are both of them try to improve speaking skill of learning language.

B. Theoretical Framework

1. Concept of Speaking

a. Definition of Speaking

Speaking is one of the central elements of communication in EFL teaching learning, it is an aspect that needs special attention and instruction. Speaking is so much part of our daily life that we tend to take it for granted. We speak in order to carry out various social activities. Although we may not always be consciously aware of doing so, we attune our language and the meanings we wish to exchange to our specific purposes for speaking in that context. Speaking is an activity requiring the integration of many systems. All these

---

factors combine to make speaking a second or foreign language a formidable task for language learner yet for many people, speaking is seen as the central skill.\textsuperscript{6}

Teaching speaking skill to students should be oriented to enable the students to speak English in different situations and genres. There are four recommendations for teachers who are going to teach speaking skill.\textsuperscript{7} First, whatever the activity chosen, it should allow students to talk a lot. Teachers should select speaking activities that demand students to talk a lot. The activity should also be able to involve all the students in the activity. It does not only better students who dominate the class. Besides that, the activity should be able to motivate students participate and to talk. Therefore, the activity should be interesting to the students. The last one, the activity should be acceptable with students’ proficiency level. If it is too difficult or too easy for them, it will motivate than to participate.

b. \textbf{Element of Speaking}

To be a good speaker, the ability to produce utterance (utterances) is not enough. There is much linguistics to be mastered by languages learners in order

\textsuperscript{6} Marianne Celce Murcia, \textit{“Teaching English as a Second or Foreign Language”}, (United States: Copyright, 2001), p.103

\textsuperscript{7} TEFLIN, \textit{“The 51\textsuperscript{st} Teflin International Conference”}, (Bandung: TBA Yadari-Abab, 2003), p.4
to be able to express their feelings and ideas appropriately. Here are elements of speaking according to Harmer in his book *The Practice of English Language Teaching* that speakers have to be competent in the speaking skill, those are: Language features in which contains 4 points. Those are:

1) Connected Speech is the sounds modifying in producing utterance when people speak. In which includes modifying (assimilation), omitting (elision), adding (linking r), or weakening (through Contraction and stress patterning).

2) Expressive devices is the stress and pitch variation in producing utterance in order to convey the truth meaning of the messages meant by the speaker. It includes the variation of the volume and speed of the speech. By using these devices people will be able to show what and how they are feeling to whom they are talking to.

3) Grammar and lexis are described as people live in different ways, places, and environments causing different mindset too. Therefore, teachers need to supply their student with various phrases for different function in their speaking classroom activities. For instance, how to express agreement and disagreement, surprise expression, and etc., so when
students have an occasion which demand them to use those expression in different stage of an interaction, they know what expression they have to use appropriately.

4) Negotiation language is the speech clarification. It is the use of language of how to clarify and to show of what a speaker means. Sometimes, people do not hear or understand what other people’s saying. Therefore, it is necessary to have an appropriate language of how to clarify to avoid mistakes between the speaker and the listener.⁸

Those are some elements which arrange the language that English speaker must be expert. Perhaps, some languages have difference in their pronunciation, lexeme, morpheme, and etc. But, generally they have the same elements in the same way because of the language function it is self.

c. Aspect of Speaking

In presenting language, speaker cannot speak as he likes. Speakers should consider to the listener and

---

some aspect of speaking. There are some aspects of speaking:⁹

1) Pronunciation including the segmental features—vowels and consonants, the stress and intonation patterns.

2) Grammar as the result for forming words and making sentences. Grammar is not only about forming word to sentences, but grammar also tells that a word can be a sentence in certain situation.

3) Vocabulary is the first modal for people to speak. Vocabulary means all the words with meaning that all people know and use. Speaker needs to use understandable words and pronounce them well.

4) Fluency; the ease and speed of the flow of speech. Indeed, the term fluency is not only talks about the speed of speech, fluency also talks about the pause of speech. A fluent one not only talks quickly, but also pause the speech appropriately.

5) Comprehension. For oral communication certainly requires a subject to respond to speech as well as to initiate it.

---

2. Recount Text

a. Definition of Recount Text

According to Anderson, “Recount is a piece of texts that retells past events, usually in the order in which they happened.” The purpose of a recount is to give the audience a description of what occurred and when it occurred.\(^\text{10}\)

Social purpose of recount is to reconstruct past experiences by retelling events in original sequence. We can look at the sample of recount in personal letters, police report, insurance claims, and incident reports.\(^\text{11}\)

b. Generic Structure of Recount Text

There are three generic structure of recount. They are:\(^\text{12}\)

1) Orientation: provides the setting and produces participants. It provides information about “who”, “where”, and “when”.

\(^{10}\) Anderson, “Text Types In English 1&2”, (South Yurra: McMillan Education, 1997), p.48

\(^{11}\) Farid Helmi, Unpublished Thesis Under Title “Improving Atudents’ Skill in Writing Recount Text By Using A Personal Letter” (A Classroom Action Research With the Tenth Graders of MASS Proto Pekalongan in the Academic Year of 2011/2012), Semarang: IAIN Walisongo, 2011, p.28

\(^{12}\) Farid Helmi, Unpublished Thesis Under Title “Improving Atudents’ Skill in Writing Recount Text By Using A Personal Letter”,…,p.28
2) Record of Events: tell what happened, present event in temporal sequence. It is usually recounted in chronological order. Personal comments and/or evaluative remarks, which are interspersed throughout the record of events.

3) Re-orientation: optional-closure of events. It is rounds off the sequence of events.

c. Language Feature of Recount Text

The language features usually found in recount text are:\[13\]

1) Proper nouns to identify those involved in the text.
2) Descriptive words to give details about who, what, when, where, and how.
3) The use of past tense to retell the events.
4) Words that show the order of events (for example, first, next, then)

d. The Example of Recount Text

Our Trip to the Blue Mountain

Orientation on Friday we went to the Blue Mountains. We stayed at David and Della’s house. It has big garden with lots of colorful flowers and a tennis court.

Event 1 On Saturday we saw the Three Sisters and went on the scenic railway. It was scary. Then, Mummy

and I went shopping with Della. We went to some antique shops and I tried on some old hats.

**Event 2** on Sunday we went on the scenic skyway and it rocked. We saw cockatoos having a shower.

**Reorientation** in the afternoon we went to home. It was an unforgettable experience.

3. **Media**

   a. **Definition of Media**

      One way to support teaching and learning is using media. It can help teacher’s presentation in the classroom. It is also expected that students will get better understanding teacher’s explanation. Therefore, media also has contribution in improving students’ skill.

      Based on the statement above, media is needed to help students in acquiring lessons that are being taught. Media give some resourceful teaching aids that help both teacher and students in material.

      The word “Media” is derived from Latin that means “mediator”. In Arabic media are (وسائل) intermediary or mediator a message from sender to receiver message.14

______________________________

14 Syaiful Bahri Djamaraah, “Strategi Belajar Mengajar”, (Jakarta: Rineka Cipta, 2010), p.120

15 Azhar Arsyad, “Media Pembelajaran”, (Jakarta: PT Raja Grafindo Persada, 2003), p.3
Gerlach and Ely as quoted by Azhar Arsyad say: “Media can be understood of man, materialistic, or an event that make students are able to obtain the knowledge, skill, or behavioral”. It means that teachers, text books, and school environment are media. Asnawir and Usman say that media are things which can be manipulated, seen, heard, read, or spoken by the instrument that can be used well in teaching learning activity and can affect the effectiveness of instructional program.

From those definitions, media are kinds of substances that are used by teacher during teaching and learning process to support the presentation of the lesson. Media have important roles in teaching and learning process. Media give motivation for students to be more interested in learning process. Learners are able to understand the message better as the materials are presented in a certain way.

b. Function of Media

Media have important roles in teaching learning process. One of the main functions of teaching media is as the teaching aids that also affect the climate, the

---

16 Azhar Arsyad, “Media Pembelajaran”, (Jakarta: PT Raja Grafindo Persada, 2003), p.3

conditions, and the learning environment organized and created by teachers.¹⁸

Media are very important in teaching learning process. Media give motivation for students to be more interested in learning process. Students are able to understand the message better as the materials are presented in a certain way. Media provide various kinds of teaching method and technique, so the students will not be difficult and bored to study the materials. They are not only listening to Teacher’s explanation but also doing some activities to practice the media. Sometimes teachers do not concern it and still use monotonous methods. After while, using media can stimulate the student’s mind, feeling, attention. So it creates good learning process.¹⁹

According to the Asnawir and M. Basyaruddin Usman, there are several functions of the media as follow:²⁰

1) Teaching by media can help students easier to understand the materials and the teachers easier to convey the material to the students.

¹⁸ Azhar Arsyad, “Media Pembelajaran” (Jakarta: PT Raja Grafindo Persada, 2003)p.15
2) Giving the real experience (something which abstract can be concrete)
3) Stimulating students’ attention and does not make them bored.
4) Making the senses can be active, so the students will work well.
5) Attracting students to study the material better.
6) Arousing the world of theoretical with the reality.

Media provide various kind of teaching method and technique, so students attracted in teaching learning process and the students’ achievement increased significantly. The researcher concludes that media show its functions. Here, media can help the teacher to convey the message of the materials well.

c. Classification of Media

In learning language, teacher needs media. Media can be used to transfer a message from the sender to the receiver effectively. Because it makes students can stimulate their attention in the teaching learning process.

According to the Syaiful Bahri Djamarah, the classification can be seen from the types of media, covering powers, and object making, as follow:
1) Types of media

Media can be seen from types of media form. There are audio media, visual media, and audiovisual media, as follow:

a) Audio media

Audio media are teaching media that is only related to our hearing. For example: radio, cassette recorder, or electronic transcription. Audio recording is related to the students’ skill especially in listening. So, it is not suitable for deaf people.

b) Visual media

Visual media are teaching media which is only related to sense of view. It is an image that conveys message to the students through photo, blackboard, picture, chart, which illustrate the real object or situation.

c) Audiovisual media

It is medium that can be seen and listened, like a film, video, or television. This media are better than audio and visual media. It is very important in teaching learning process, by seeing video, students analyzed gestures, paralinguistic, and expressions that help students
to see beyond what they are listening and seeing.\textsuperscript{21}

2) Covering powers

In learning media can be seen from the covering power forms. There are media by broad covering power and all at once, media by definite covering power on space and time, media for individual teaching. Those will be explained as follow:

a) Media by broad covering power and all at once

The use of media is not only limited on space and time, but also can reach the number of students in the same time. For example: radio, television

b) Media by definite covering power on space and time

The use of media by definite covering power on space and time needs specific space and time. This media can’t reach the number of students in the same time. For example: film, sound slide, etc.

\textsuperscript{21}Syafiful Bahri Djamarah, “Strategi Belajar, Mengajar”, (Jakarta: Rineka Cipta, 2010), p.124
c) **Media for individual teaching**

The use of this media is only for individual. For example: program module, and teaching by computer.\(^{22}\)

3) **Object making**

Media can be seen from object making form. There are simple media and complex media, as follow:

a) **Simple media**

This media are easy to get and the price is cheap. The way of making this media are easy and the use of the media is not difficult. For example is picture, or thing, etc.

b) **Complex media**

In this media, the basic of the material is difficult to gets and expensive. And the way of making this media is also difficult. It needs some skills. For example is computer, etc.\(^{23}\)

Sudjana and Rivai classify media into four general categories, they are as follows:\(^{24}\)

\(^{22}\)Syafiu Bahri Djamara, “*Strategi Belajar Mengajar*”, (Jakarta: Rineka Cpta, 2010), p.125

\(^{23}\) Syafiu Bahri Djamara, “*Strategi Belajar Mengajar*”, (Jakarta: Rineka Cpta, 2010), p.126

\(^{24}\) Sudjana Nana, and Rivai, “*Media Pengajaran*”, (Bandung: Sinar Baru Algasindo. 2007), p.3-4
1) Graphic media (two dimensions media) is media with length and width such as picture, photo, diagram, poster, cartoon, and comic.

2) Three dimensions are media with a solid model such as diorama, mock up or pop-up.

3) Projectors media such as slide, film stripe, film, OHP, etc.

4) Using environment as teaching media

In this study, the researcher used three dimensions media named pop-up book story as the interaction media, because by using pop-up book story, it can motivate the students to learn and pay attention to the material given.

4. Pop-up Story Book

a. Definition of Pop-up Story Book

Pop-up is an illustration which when activated by the opening of a page, pulling a tab, or lifting a flap rises above the level of the page. A three-dimensional illustration.\(^{25}\)

Pop-up book is a book that displays the movement and interaction through the use of paper, as the material folds, rolls, wheels or its rotation.\(^{26}\)

\(^{25}\)http://www.popuplady.com/about03-glossary.shtml, Retrieved on April 15\(^{th}\) 2016, at 10.54 a.m

Considering the above matter, Dzuanda explained the mean of the pop-up book is a book that has moving parts or has a three dimensional elements and provide a more interesting story visualization, ranging from display images that can move when the page opened.\(^{27}\)

Based on explanation above, the pop-up story book is a story book that has a three dimensional element, that can move when the pages of book opened. In addition a pop-up book has a beautiful image display and also can be enforced. So the media pop-up book is suitable for the process of teaching learning.

b. Pop-up Story Book as a Learning Media

The use of pop-up story book stems from the 13\(^{th}\) century, at the first pop-up book is used to teach anatomy, mathematics, astronomy makes estimate, a book like this is only used to help the scientific work. Until the 18\(^{th}\) century this technique began to be applied to books designed as entertainment especially geared to children.\(^{28}\)

Pop-up books can provide a visualization of a more interesting story. Starting from the image display

\(^{27}\)Dzuanda, Design Pop-Up Child Book Puppet Figure Series “Gatotkaca” http://digilib.its.ac.id/public/ITS-Undergraduate-5380-3402100054-cover%20en.pdf, downloaded on June 11\(^{th}\) 2015 at 09.45. a.m.

look more dimensions, image can be moved when the page opened or shifted, moveable part when deformed, has a texture as the original object, there are some that can emit sound. Some experts claim that the students liked bright colors, cast of characters that are simple and intriguing story.

Pop-up story book has ability to reinforce the impression to be conveyed in a story, so that it can be felt. Dimensional visual display makes the stories truer, coupled with a surprise given on every page. Images or picture can suddenly appear from behind a yard, or a building can stand majestically in the middle of the page by this visualization, so the impression you want to display can be delivered.29

Kind of the story told in the pop-up book can be very diverse, ranging from the knowledge such as the introduction of animals, state geographic, cultural, historical, religious activities, to the imaginary stories such as fairy tales, fables, folktales, myths, legends. Besides, pop-up books also have deficiency, the pop-up book has displays that can move, rises or appear and dimension. So, a teacher requires skill, patience, time and also cost more than for other media.

According to Dzuanda Pop-up story book media has some benefit there are: Teach the children to appreciate books and treat it better, Closing the parents of children, Develop children’s creativity, Stimulate child’s imagination, Adding knowledge to give a depiction of an object (object recognition), Can be used as a medium for instill a love of children to read.

c. The Teaching Steps in Pop-up Story Book Learning Media

The success or failure of the teaching learning process is depend on several factors, one of them is media that used by teacher. If the teacher used a good media and students gave good respond, teaching learning process will run well. Therefore the researcher used pop-up book story media to improve speaking ability on recount text.

There are the steps to use the media:
1) Teacher divided the students into 2 groups.
2) Teacher gave each group a pop-up story book
3) Teacher asked to the students of each groups to discussed the story that illustrated by pop-up story book media.

---

30Nila Rahmawati, “Pengaruh Media Pop-up Book Terhadap Penguasaan Kosakata Anak Usia 5-6 Tahun Di TK Putera Harapan Surabaya” (Vol 3, No. 1, 2014) http://ejournal.unesa.ac.id, downloaded 16th April at 10.39 a.m, p.4
4) After discussed, teacher asked some question related the story.

5) To get an accountability of students, the teacher asked them to retell the story with their own word orally.

C. Action Hypothesis

Hypothesis is provisional estimates to the formulation of research problems. Based on the statement of the problem above, the hypothesis of the study is pop-up story book can improve students’ ability on speaking recount text.

---

CHAPTER III
RESEARCH METHOD

A. Research Design

A classroom action research (CAR) is used in this study as the method. Classroom action research (CAR) is part of a board movement that has been going on in educational generally for some time. It is related to the ideas of “reflective practice” and the teacher as researcher. In action research, the researcher is concerned with using a systematic process in solving educational problems and making improvement.¹ Research method is a systematic activity by using certain methods to find new thing or to prove a theory. This research is classroom action research (CAR) that uses data observation toward teaching learning process in speaking recount text. A form of research which is becoming increasingly significant in language education is Action research.² Kemmis and MC Taggart for example, argue that the three defining characteristics of action research are that it is carried out by practitioners (for our purposes, classroom teachers) rather than outside researcher; secondly, that it is collaborative; and thirdly, that is it is aimed to changing things. A distinctive feature of action research is that those affected by planned changes have the

primary responsibility for deciding on courses. Cohen and Manion argue that action research is first and foremost situational, being concerned with the identification and solution of problems in a specific context. They also state that the aim of action research is to improve the current state of affairs within the educational context in which the researcher is being carried out.\(^3\)

From the definition above, the researcher concludes that classroom action research is an action in a research, which can be done by the teacher, researcher, and the teacher with his/her colleague, in the classroom. This research is concern to solve the problem in the classroom. Involving a group of students to improve students’ achievement in learning process and enhance the students’ understanding of the lesson.

There are four components in one cycle for conducting classroom action research that doing by the researcher in every cycles of the research. The explanations of the four components in one cycle for doing in classroom action research are:

1. **Planning**

   Planning is the beginning process of research to conduct treatments or after making sure about the problem of the research, a researcher needs to make a preparation before doing an action research. Researcher prepares some materials that will use in research process. Such as lesson plan based on

---

\(^3\) David Nunan, “*Research Methods In Language Learning*”, (United State, Cambridge University Press, 1992), p.18
the teaching material, choose the theme, prepare the materials that needed in the learning process, and prepare checklist for observation and formative test.

2. Acting

This section discusses about the steps and activities that will be taken by the researcher. Researcher tries to take how much the improvement of students’ speaking ability on recount text, give students treatment ways to remember every word in spelling and writing, give students assignments in groups, evaluate their mistakes and make summarize about materials.

3. Observing

In this step, a researcher has to observe all events or activities during the research. Researcher observes the situation in class during lesson, response and attitude of students when they are given explanation, doing task, and know their difficulties.

4. Reflecting

Reflecting is the inspecting effort on the success or failure in reaching the temporary purposes in order to determine the alternative steps that are probably made to gate the final goals of the research.4

B. Setting of the Research

This classroom action research took place at MTs Al-Asror Gunungpati Semarang Central Java in the year of 2015/2016 which is located Jl.Legoksari raya No. 2 Gunungpati Semarang.

C. Subject of the Research

The subject of this Research is students at the Eighth graders of MTs Al-Asror Gunungpati Semarang in the academic year of 2015/2016. The reason is because at this grade the students are in the process of developing their psychology, so that the researcher directed them to choose the importance of using common language and usual way in communication. Then, it will be a good manner to increase the students’ awareness in using language as the practical way.

D. Collaborator of the Research

The collaborator in this Classroom Action Research is person who helps the researcher to collect the data. The collaborator in this research is the English teacher who teaches English in the MTs. Al-Asror Gunungpati Semarang at Eighth Class, she was Nur Syafa’ah, M.Pd.

E. Procedure of the Research

In this research, the researcher conducted two cycles of classroom action research. There are four steps process in each
cycle for doing classroom action research. To be more detail the phases can be illustrated as follows:\(^5\)

![Diagram of Action Research Cycle](image)

**Figure 1 Action Research Cycle**

(Adapted from Sanjaya’s book *Penelitian Tindakan Kelas*)\(^6\)

The researcher conducted two cycles and each cycle is ended by a final test, but before conducted the first cycle she conducted pre-cycle to know the initial condition of students’ motivation in learning recount text especially in speaking skill. The activities that have done in each cycle are as follows:

\(^6\) Wina Sanjaya, “*Penelitian Tindakan Kelas*”, (Jakarta: Kencana Prenada Media Group, 2009), p.54
1. **Procedure of Preliminary Research**

   Preliminary Research of the research was conducted on 23\textsuperscript{rd} November 2015. In this preliminary the researcher observed the class to get the information about students’ initial condition and to know their problems in teaching learning. From the pre-research, the researcher got the data. From the result of the data, all students were not achieved the required score. Based on the problem, the researcher intended to use pop-up story book in the next activity to make students interest and enjoy in the learning process so that their speaking score would be better.

2. **Procedure of Cycle 1**

   Cycle 1 of the research was conducted on 26\textsuperscript{th} November 2015. In this cycle, the teacher taught to the students used pop-up book story. The activities of the first cycle as follows:

   a. **Planning**

      The first phase in conducting the action research was planning. In this phase, the researcher did the following activities:

      1) Evaluated the result of the test on pre-cycle and discussed with the teacher to be better in the next meeting.

      2) Prepared the material and media of the study that teacher need.
3) Made a lesson plan for the cycle two.

b. Acting

In this step there were many activities that have done. The researcher gave students material about recount text with the title “Shinchan Holiday”. There are as follows:

1) Teacher started by greeting students, then check students’ attendance
2) Teacher gave stimulation related the topic
3) Teacher explained the material, and then gave chance to the students to asked question about the material.
4) Teacher divided class into 2 groups and gave each group a pop-up book story and some question related to the media.
5) Teacher asked each group to discuss the story that was illustrated by pop-up book story.
6) Teacher asked students to answer the question
7) Teacher gave oral test to the students by asked them to retell the story with their own word.

c. Observing

Observe students’ activities in teaching learning process and while they are doing the assignment. There are many aspects that were observed by the researcher and teacher such as: teaching learning activity, students’ activeness, students’ responses and students’ participation
in learning activity. So that the researcher should make a note in every activities and changing in learning process.

d. Reflecting

The researcher together with the English teacher or collaborator evaluated and concluded the result of this cycle by calculating score of students test. From that score the researcher would know there is improvement or not in students speaking ability especially on recount text.

3. Procedure of Cycle 2

Cycle 2 of the research was conducted on 3rd December 2015. In this cycle the teacher taught to the students used pop-up book story. The activities of the second cycle as follows:

a. Planning

In this phase, the researcher did the following activities:

1) The researcher planned to review the previous lesson
2) The researcher planned to make lesson plan for next meeting.
3) The researcher prepared the material and media of the study that teacher need.

b. Acting

After doing first cycle, the researcher conducted the last cycle by giving new material about recount text
with the title “My Birthday Party”. The activities of those are as follows:

1) Teacher started by greeting students.
2) Teacher reviewed the last lesson.
3) Teacher divided the class into 2 groups
4) Teacher gave each group pop-up book story with the title “My Birthday Party”
5) Teacher asked each group to discuss the meaning of the story.
6) Teacher gave quiz or question related to the story.
7) Teacher gave oral test to the students by retell the story with their own word.

c. Observing

Just like in the first cycle, in this cycle the researcher also observed the students. For some aspects that need to observe similar with first cycle. There are: teaching learning activity, students’ activeness, students’ responses and students’ participation in learning activity.

d. Reflecting

Evaluated and concluded the result of the research. The researcher submitted all result from the first cycle until the last cycle. She calculated the mean of students score. From that score she knew the implementation of pop-up book story to solve students speaking problem.
F. Data Collecting Technique

“Collecting data is the conscious to get data by systematic method, based on standard procedure”.\(^7\) The purpose of collecting data in this research is to get relevant, accurate, and reliable materials. This research uses some techniques to collect the data as follows:

1. **Observation**

Observation is the process of observe toward the subject of observation by using all of sense.\(^8\) An observation task is a focused activity to work on while observing a lesson in progress. It focuses on one or small number of aspect of teaching learning and requires to observe to collect data or information from actual lesson.\(^9\)

Observation is used to monitor the students’ activities during the teaching learning process. Researcher observed the situation in class during lesson, response and attitude of students when they are given explanation, doing task, and to know their difficulties. In conducting this classroom action research, the researcher decided to use observation form. The observation appraised the activities during the teaching and

---

\(^7\) Suharsimi Arikunto, “*Prosedur Penelitian Suatu Pendekatan Praktik*”, (Jakarta: PT Rineka Cipta, 2006), p.222

40
learning process. How teacher delivered the material what teacher arranged the classroom and also the students’ response, to see their difficulties, their problem, and their understanding to the material which given. To be more objective, the researcher considered of asking the collaborator to help him to observe the classroom.

2. Documentation

Documentation is done to get context and information explicitly.\textsuperscript{10} In this research, documentation is collected by students’ attendance, students’ English score, and photo of teaching learning process using pop-up book learning media.

3. Test

Test is some questions used to measure the competence, knowledge, intelligence, and ability of talent which is have by individual or group.\textsuperscript{11} Test is an instrument measuring instrument for data collection where in responding to the questions in the instrument, participants are encourage to show maximum performance.\textsuperscript{12} Brown states that a test is a method of measuring a person’s ability, knowledge, or

\textsuperscript{10} Wijaya Kusumah, Dedi Dwitagama, “Mengenal Penelitian Tindakan Kelas”, (Jakarta: Indeks Penerbit, 2010),p.9

performance in a given domain. Test is used to collect initial data and the final data about the student’s ability to speak recount text.

In order to know the improvement of speaking ability, the writer gave speaking test to know student’s ability. The researcher focused on element of speaking there are: pronunciation, grammar, fluency, comprehension, and vocabulary. In this research, the writer use spoken test.

G. Data Analysis Technique

Technique of data analysis comes from the interpretation of the data collection. In analysis the data, the researcher got the data from document, observing the teaching learning process, and the result of the students’ test.

In processing the data, the researcher used descriptive analysis. It is to explain the condition in raising indicator achievement every cycle, and to describe the success of the teaching learning process using pop-up book teaching media in improving speaking ability.

The data from observing are grouped based on students’ behavior and students’ indicator for students’ activeness when the pop-up book teaching media is introduced. The result of observation is analyzed such as below:

Score = \( \frac{Total\ Score}{Maximal\ score} \times 100\% \)

In this research, the researcher also used mean formula to know the average of students’ score and to check students’ improvement in speaking. The formula is as follow:

\[
M = \frac{\sum x}{N}
\]

Explanation:

\(M\) : The average of students’ score
\(\sum x\) : Total score
\(N\) : The number of students

Scoring Guidance

For the test, all aspect of speaking is observed from students’ vocabulary, pronunciation, grammar, fluency, and Comprehension. Here is the scoring guidance for the test:\(^{14}\)

**H. Criteria of the Research Success**

These are criteria by which this research considering success according to Nunan, which are presented by the researcher, those are:

1. The result of exceed the determined target score.
2. The innovation had overall positive response from participating teacher.
3. The innovation has beneficial impact on students’ speaking. A comparative analysis students’ test score indicated, in term of evaluation criteria identified by the researcher.

4. Teachers’ classroom practice change as a result of a participation innovation.

5. The objective of the innovation largely met.

6. The innovation has a number of distinctive features which contributed to its effectiveness.\textsuperscript{15}

In step on this, the researcher infers that the research will be considered success if the using pop-up book learning media in teaching speaking recount text for the students’ eight grade of MTs Al-Asror Gunungpati Semarang brings about changes and benefits by all mean of students’ speaking ability, students’ motivation, teaching and learning outcomes.

CHAPTER IV
RESEARCH FINDING AND DISCUSSION

A. The Research Finding

This study is Classroom Action Research on the use of Pop-up Story Book in teaching speaking Recount Text. In this chapter, the researcher wanted to describe the use of Pop-up Story Book and analysis the result that was conducted in two cycles. Those were explained as follows:

1. Preliminary Research

The Preliminary Research was done on November 23\textsuperscript{th} 2015. In this occasion the researcher joined the speaking class and observed the initial condition and students’ activity in the class to identify the problem. During Pre-Research, the researcher observed students’ behavior and activity based on the observation checklist.

</tr>
</tbody>
</table>

The score of observation as follow:

\[
Score = \left( \frac{Total\ Score}{Maximal\ Score} \right) \times 100\%
\]

\[
= \frac{29}{45} \times 100\%
\]

\[
= 64.44\ %
\]

In this activity, teacher explained the material and gave instruction clearly, but the media that used is whiteboard, textbook and slide power point. Teacher seldom responded students’ question, because few students asked questions. Teacher always asked to know the students’ understanding about the material. Teacher also warned the students that did not pay attention when the teacher explained the material.

**TOTAL SCORE** 12

The score of the observation as follow:

\[
Score = \frac{\text{Total Score}}{\text{Maximal Score}} \times 100\%
\]

\[
= \frac{12}{30} \times 100
\]

\[
= 40\%
\]

From the result of observation above, it can be concluded that not all of students participated in the class activity. Most of them only paid attention to the teacher’s explanation, and then they did not pay attention to the class. The researcher found that many students have difficulties in speaking. That is because students have little practice in
speaking and they felt shy in stating their opinion. Some of them only kept silent and follow another answer.

The purpose of the test was to measure the skill of the students in speaking and to know the basic score of speaking. Those are the score in Pre-Research:

**Total Score** 1954

The average of the class in first cycle:

\[ M = \frac{\Sigma \chi}{N} \]

\[ = \frac{1954}{35} \]

\[ = 55.83 \]

Based on the observation and students’ score, most of the students had difficulties to do it. It can be seen from their face which appeared nervous and also from their activities. They were afraid to express their idea, feeling and they were less confident. From the problem found in Pre-Research observation, the researcher planned to use pop-up book learning teaching media in speaking class in order to train the students to speak in front of their friend and to improve students’ speaking skill.
2. First-Cycle

a. Planning

The first cycle was held on 26th November 2015. In planning, before applying the media, researcher had to prepare everything which needed in learning process, researcher prepared lesson plan, the material, the media, the test instrument, and the observation checklist.

b. Action

In the class, the teacher did the teaching learning process according to the procedures that made before. The teacher opened the class, greeted the students and checked students’ attendance. Teacher gave stimulant question to the students related the material, and then explained the material to the students. She explained the generic structure, language feature, and also social function of recount text. Teacher gave chance to the students to ask question and then teacher gave feedback to them.

After explained the material, teacher divided the students into 2 groups. And then teacher gave example of recount text that illustrated by pop-up story book. The next activity was the students of each group discuss the meaning of the example of recount text that was illustrated by pop-up story book. Then the teacher gave quiz and reviews the material. At the end of the lesson, the researcher gave assessment by oral test.
c. **Observation**

The next phase is observation. In this phase, the researcher observed the class during the teaching learning process. The observation was done in order to know the teaching learning activity, students’ activeness, students’ responses and students’ participation in learning activity. In first cycle, the score was higher than in pre-research.

The score of the observation in First Cycle as follow:

\[
Score = \frac{Total\ Score}{Maximal\ Score} \times 100\%
\]

\[
= \frac{32}{45} \times 100\%
\]

\[
= 71.11\%
\]
According to the result of observation, it shows the teacher activities used pop-up story book is fair with 71.11%. Teacher explains the material clearly. Teacher asked some question to know the students’ understanding about the material. Some students answered the teacher’s question. There was progress between teacher and student’s interaction, although some students answered the question and paid attention the teacher’s explanation. Teacher also warned some students that did not pay attention when the teacher explained the material.

\]

\[
= \frac{17}{30} \times 100\%
\]

\[
= 56.67\%
\]

From the observation in first cycle, it can be concluded that the students were more active than in the pre-research. More students joined the class enthusiastically but still did not respond well. When applied the media, there were some students’ not interest well, because they still confused with the use of it. Then, all of students did the test. Students told recount text that they have made orally without text.

**Total Score** 2428

The average of the class in first cycle:

\[
M = \frac{\Sigma \chi}{N} = \frac{2428}{35} = 69.38
\]

From the activity in the first cycle, students were more enthusiastic. They enjoyed the activity and tried to speak more.
d. Reflection

In reflection, teacher and collaborator discussed about the result from the first cycle. The researcher and the teacher needed to make improvement to be motivation to students that speaking is a needed skill.

The teacher also had to prepare teaching media well. From the activity, students enjoyed pop-up book story learning media, but they had no achieved the minimum score yet. The teacher and the researcher decided to give them second cycle to improve their improvement.

3. Second-Cycle

a. Planning

The second cycle was conducted on 3\textsuperscript{rd} December 2015. As in the first cycle, the researcher also prepared everything that needed in the second cycle. In planning, the researcher made lesson plan, prepared the material, observation checklist, and the test instrument. Teacher did this cycle based on the reflection of first cycle.

b. Action

In this cycle, the teacher did teaching learning process according to the procedures that made before. The teacher referred to the activities from the first cycle. The teacher opened the class, greeted the students, and then checked students’ attendance. Before started the lesson,
the teacher gave motivation more to students to build students bravery in speaking. Teacher then gave stimulating question to students and explained the material. After explained the material, teacher asked students to discuss the example of recount text that was illustrated by pop-up story book. Teacher then gave quiz and assessment by oral test. At the end of the lesson, teacher gave chance to students to ask about students difficulties. Finally, teacher closed the class.

c. Observation

In observation, the researcher observed the class during the teaching learning process. The observation was done in order to know teaching learning activity, students’ activeness, students’ responses and students’ participation in learning activity.

**TOTAL SCORE**

37

The score of the observation in Second Cycle as follow:

\[
Score = \frac{Total\ Score}{Maximal\ Score} \times 100\%
\]

\[
= \frac{37}{45} \times 100\%
\]

\[
= 82.22\%
\]

According to the result of the observation, it showed that the teacher’s activities using pop-up story book media is fair with 82.22%. Teacher explained the material clearly. Teacher asked some questions to know the students’ understanding about the material. Some students answered the teacher’s question. There was progress between teacher and students’ interaction, because all of students answered the questions and paid attention to the teacher’s explanation.

The researcher also observed students in learning process. In this cycle, students showed their enthusiasm more than in the first cycle. The result for the second observation was higher than in the first cycle.

**TOTAL SCORE**  

22

The score of observation in second cycle as follow:

\[
Score = \frac{Total Score}{Maximal Score} \times 100\%
\]

\[
= \frac{22}{30} \times 100
\]

\[
= 73.33\%
\]

From the result of observation, it showed that the students’ participation in teaching learning process was increasing. Students were more active and enthusiastic to follow speaking class. After applied the pop-up book story, the researcher gave a test. The test form was an oral test. Here is the score of the students in second cycle.

</tbody>
</table>
The average of the class in second cycle:

\[ M = \frac{\Sigma x}{n} \]

\[ = \frac{2590}{35} \]

\[ = 74 \]

From the result of the test, it showed the improvement of the score. It indicated that the students’ speaking ability had been improved. The average of the class was 74. It is higher than in the first cycle. It concluded that students had been improved their speaking ability and achieved the minimum criteria of the class.

d. **Reflection**

For the reflection in second cycle, the researcher found the improvement from the students. The students were more confident to speak. Students were more active than in first cycle. From this improvement, it could be concluded that teaching students by using pop-up book story learning media was more significant to improve students’ speaking ability on recount text.
B. The Discussion

Purwanto states that the students’ achievement is often used as a measure to determine how far a student mastered the material taught. It is required a series of measurements by using good evaluation tools to realize it.¹

Pop-up story book can improve students speaking ability on Recount Text with the Eighth graders of MTs. Al-Asror Gunungpati Semarang. It is proved by the percentage of teacher’s performance and students’ activeness in teaching learning process which influence the average of the students’ score test from the Pre-Research, First Cycle until the Second Cycle. The comparison of the result in every cycle can be presented below:

**Table 4.10**

</tbody>
</table>

Table 4.10 presented the comparison of the percentage of teacher’s performance in every cycle. It shows 6.67 % improvement from 64.44% in the preliminary to 71.11% in the first cycle. In the second cycle it increases to 82.22 % in which there is 11.11 % of improvement.

Table 4.11 presented the comparison of the percentage of students’ participation in each cycle. Before pop-up story book learning media being applied, the students were not interested in the teaching and learning process. The students’ participation is only 40%. It rises to 56.67% in the first cycle and 73.33% in the second cycle after the teacher used pop-up story book learning media. Majority of the students were enthusiastic in the teaching learning process. From the result of cycle 2 that the students’ participation passed the indicator of success, the researcher and teacher decided to finish the treatment.

Another way to see the improvement in the teaching and learning process is by analyzing the students’ score of test. From the table, it can be concluded that there is improvement. In preliminary, the average of students’ score is 55.83. In the first
cycle, the average of students’ score is increased, it is 69.38. In the second cycle, the average of students’ score is 74.

Pop-up story book learning media makes the students more active in their learning. This media give chance to all students to speak with different partner in short time and in such structural way. it is appropriate with Arsyad’s statement that the use of media in a teaching learning process can arouses students’ desirability, interesting, the motivation and stimulation of learning activity, and even brings psychological effects on students.²

Here is the improvement graph:

**Graph 4.1**
The Improvement in Every Cycle

From the graph 4.1 above, it can be concluded that the used of pop-up story book learning media can improve students’ speaking ability on recount text. The improvement is not only in the students’ achievement but also in their interest in learning. Therefore, this classroom action research in the use of pop-up story book learning media to improve Students’ Speaking Ability on Recount Text with the Eighth Graders of MTs. Al-Asror Gunungpati Semarang in the Academic Year of 2015/2016 is successful.
CHAPTER V
CONCLUSION AND SUGGESTION

A. Conclusion

The research conclusion is presented according to the data which have been analyzed in the previous chapter. From all the data analysis about the use of pop-up story book to improve speaking ability on recount text (A Classroom Action Research with the Eighth Graders of MTs Al-Asror Gunungpati Semarang in the Academic Year of 2015/2016), it can be concluded that:

1. Teaching speaking recount text through pop-up story book can be enjoyable experience for both teacher and student in taught by pop-up story book. It can be seen by students’ achievement in speaking test in each cycle. In the first cycle the average of the students’ was 69.38. In the second cycle the average of the students’ achievement was 74. Students’ speaking ability on recount text improves as well as their motivation in speaking and they were interested speaking using pop-up story book. The result of the research shows that the students improve their speaking ability on recount text efficiently and effectively.
B. Suggestion

In this study, the writer would like to offer some suggestions to improve the students’ speaking ability especially on recount text in order to get the better result.

1. For English teacher

   Speaking was mostly known as difficult subject. English teacher should be able to develop their media and technique to teach the students in order to make them interest in learning the subject. The use of media and technique in teaching and learning process can attract students’ interest and motivation in teaching and learning process. The researcher gave suggestion for English teacher to use pop-up story book as one of media in language classroom to teach speaking ability in other genres.

2. For students

   Speaking is important subject to be learnt. But, most students have difficulties in say something. Therefore, the students have to be serious and pay attention to the teacher’s explanation in teaching and learning process. To improve speaking ability, students have to develop their knowledge and practice many exercises in order to get a better achievement in speaking ability.

3. For the next researcher

   The writer hopes the other researchers can use it as a reference to conduct their research on the same field. It is
really possible that there is another more effective way to teach speaking ability. Hopefully, there will be an improvement for the next study.

C. Closing

Praise is to Allah SWT that has been giving protection and guidance so that this thesis can be finished. The writer realized that this paper is far from perfection. Because of that, criticizes and suggestion from the reader are very expected for the perfection of the paper. Hopefully, this paper is useful for all of us. Aamiin.

Appendix 2

LESSON PLAN
First cycle

School : MTS Al-Asror Gunungpati Semarang
Subject : English
Grade /Semester : VIII/ I
Material : Recount Text
Skill Focus : Speaking
Allocated Time : 2 x 45 minutes

A. Standard of Competence
   Expressing meaning of oral short functional text and simple essay of descriptive and recount text to interact with their environment

B. Basic Competence
   Expressing meaning of short functional monologue text by using a variety of oral language accurately, fluently and acceptably to interact with their environment in the form of descriptive and recount text.

C. Indicators
1. Mentioning the definition of recount text.
2. Identifying the social functions, generic structure and language feature of recount text.
3. Making short and simple spoken recount text.
D. Learning Aim

By the end of this lesson with pop-up story book, students are able to understand the main topic and information in Recount text and making spoken or oral recount text, short and simple.

E. Teaching Material

Recount text

1. Definition

Recount text is a text that tells something already happened or the text tells the past event.

2. Social Purpose

- To tells the listener or reader about the story in the past.

3. Generic Structure

- Orientation : part of paragraph which introduces about the setting (when, where and who) of the story
- Event : part of paragraph which tells what happened in the story in temporal sequence.
- Re-orientation : closure of the event

4. Language Features

- Focus on specific participant.
- Use of simple past tense
- Use of connector to put events in orders.
- Use of Action verb

5. Example

Shinchan Holiday

Last weekend, Shinchan enjoyed his holiday.
Shinchan ate fruits at home in the morning, after that he played jumping rope, then he went to the beach with his friends. Finally, he drank juice with his daughter in the beach. He was very happy in that day.

F. Teaching Method/Technique

- Technique: Observing, Discussion, Asking-Question, Practicing

G. Learning Activities

- Pre-Activities
  - Teacher enters the class and greets the students.
  - Teacher checks students’ attendance.
  - Teacher asks students to pray together

- Main Activities
  - Teacher gives stimulating question that lead to the topic
  - Teacher explains the material to the students
  - Teacher stimulates students to analyze the definition, social purpose, generic structure, and language feature.
  - Teacher gives students chance to ask question about the material.
  - Teacher introduces and explains about pop-up book media.
  - Teacher divides the students into 3/4 groups.
  - Teacher gives students a pop-up book story to each group and some question related to the media.
- Teacher asks each group to discussed the story was illustrated by pop-up book
- Teacher gives some question related to the story that was illustrated by pop-up story book
- Teacher asks some students to answer the question.
- Teacher asks the students to retell the story with their own word

• Post-Activities
  - Teacher reviews the material.
  - Teacher gives motivation to students.
  - Teacher ends the class by greeting.

H. Media and Sources of Learning
  • Media : -Pop-up book
  • Sources :

I. Assessment
  1. Form : Spoken/ oral test
  2. Technique : The students are assigned to retell the story with their own word.
  3. Aspects :
     a. Vocabulary = 20
     b. Fluency = 20
     c. Pronunciation = 20
     d. Grammar = 20
e. Comprehension = 20

4. Instruments:
- Answer the question orally!
  - What did shinchan do at the last weekend?
  - What did shinchan do at home in the last morning?
  - What does shinchan do after eat fruit?
  - Who went to the beach with his friend?
  - Who drank the juice with shinchan?
- Retell the story with your own word!!

LESSON PLAN

Second cycle

School : MTS Al-Asror Gunungpati Semarang
Subject : English
Grade /Semester : VIII/ I
Material : Recount Text
Skill Focus : Speaking
Allocated Time : 2 x 45 minutes

A. Standard of Competence

Expressing meaning of oral short functional text and simple essay of descriptive and recount text to interact with their environment

B. Basic Competence

Expressing meaning of short functional monologue text by using a variety of oral language accurately, fluently and acceptably to interact with their environment in the form of descriptive and recount text.

C. Indicators

1. Mentioning the definition of recount text.
2. Identifying the social functions, generic structure and language feature of recount text.
3. Making short and simple spoken recount text
D. Learning Aim

By the end of this lesson with pop-up story book, students are able to understand the main topic and information in Recount text and making spoken or oral recount text, short and simple.

E. Teaching Material

Recount text

1. Definition

Recount text is a text that tells something already happened or the text tells the past event.

2. Social Purpose

- To tells the listener or reader about the story in the past.

3. Generic Structure

- Orientation: part of paragraph which introduces about the setting (when, where and who) of the story
- Event: part of paragraph which tells what happened in the story in temporal sequence.
- Re-orientation: closure of the event

4. Language Features

- Focus on specific participant.
- Use of simple past tense
- Use of connector to put events in orders.
- Use of Action verb

5. Example

My Birthday Party
On the weekend, I had a birthday party. It was for my eighth years old. I invited my friends and then they come to my house. Firstly, we sang a birthday party’s song together and then I blew my candle and make a wish. After that we ate lunch. We had fairy bread, chips and cake. My friends gave me a lot of gift to me. Then, I opened my presents. I got a lot of great things. I had fun at my party.

F. Teaching Method/Technique
- Technique : Observing, Discussion, Asking-Question, Practicing

G. Learning Activities
- Pre-Activities
  - Teacher enters the class and greets the students.
  - Teacher checks students’ attendance.
  - Teacher asks students to pray together
- Main Activities
  - Teacher reviews the last material to the students
  - Teacher gives students chance to ask question about the last material.
  - Teacher divides the students into 3/4 groups.
  - Teacher gives the example of recount text to the each group that was illustrated by pop-up book story.
  - Teacher asks each group to discuss the story.
- Teacher gives question related the story.
- Teacher asks students to answer the question.
- Teacher asks the students to retell the story with their own word

- Post-Activities
  - Teacher reviews the material.
  - Teacher gives motivation to students.
  - Teacher ends the class by greeting.

H. Media and Sources of Learning

- Media : -Pop-up book
