

## CHAPTER V

### CONCLUSION AND SUGGESTION

#### A. Conclusion

The conclusion of this research is drawn in accordance with the result of the data analysis in previous chapter. After getting the result of the study, the researcher concluded that by using Song as a media was effective in teaching Simple Past Tense. It can be seen from the calculation of two ways ANOVA that  $F_{\text{count}}$  was higher than  $F_{\text{table}}$ . So, song could make students so interest during the teaching and learning process. It also could be seen from the result of pre-test and post-test. The results were as follow:

1. The pre-test score of experimental class was 1410. Students got lower score because they have not been taught by using Song. They just did by their skill from teacher's explanation before.
2. The pre-test score of control class was 1530. Same with the experimental class, students in control class just did the test by their own first comprehension.
3. The post-test score of experimental class was 2995. After the students taught by using song, students of experimental class was so interesting to study, so that they are easy to comprehend the material.

4. The post-test score of control class was 2575. The score still increased because students of control class were enough using conventional method. It was possible to use a new way for teaching in control class, so that the students would be more understand well the material.

## **B. Suggestion**

In teaching and learning English at Junior High School, the teachers must create enjoyable, fun and interesting situations, because of those students will feel fun and not to be pressed from the material. Using song is one of the methods for teaching English. Song can make fun and interesting situation, so students will feel enjoy and the material will be easy to be transferred. Not only using song, the teacher must have another ways to teach English. So that the teaching learning process will not be bored and students will be easy to master the material.

The researcher hopes that not only the teachers who must make fun situation, but also the school must too. All of members of school must create enjoyable situations in teaching and learning process, so that the students will not be bored with conventional methods.

The researcher also hopes for the other researchers who wants to conduct the thesis like this one, do not cheat all of the data and the structures. They have to modify the thesis in order to differ with this research.
