

CHAPTER V

CONCLUSION AND SUGGESTION

This chapter presents the conclusion and suggestion. It concern with the conclusion of the researcher about her thesis. It is divided into two sub sections. They are conclusions and suggestions.

A. Conclusions

Based on the finding and discussion in chapter IV, it could be concluded that the use of music performance as media in the teaching of cardinal and ordinal number is effective. It was proved by the obtained score of t-test. The t-test showed that t-score 2.055 was higher than t-table 1.67. It mean that H_a was accepted and H_o was rejected. Since the t-score was higher than the t-table, there was a significance difference in the achievement between students in class V A who were taught cardinal and ordinal number using music performance as media and students class V B who were taught cardinal and ordinal number without using music performance as media (using text only).

Therefore the average score of control group's before treatment (65.50) and the average score of control group's after treatment was (73.16). Whereas the experimental groups' average before treatment was (65.17) and the experimental groups' average after treatment was (80.00). It mean that the experimental group (class V A) was better than the control group (class V B).

B. Suggestions

As a result of the research, the researcher gives some suggestions for all the readers of this thesis. There are some suggestions that are proposed by the researcher:

1. For English Teachers
 - a. The creativity of the English teacher is needed in teaching English, as his/her duty to transfer the knowledge of English to the students, consequently the student can easily recieve and understand the material given.

- b. The teacher should be patient and ready to guide the students in facing their weakness and difficulties when they learn English.
 - c. It will be better if the English teacher finds out the appropriate and interesting material as students need.
 - d. The teacher should teach the students by using interesting media and method. The use of interesting media and method to teach is for making students enjoy the learning process.
 - e. The teacher should motivate his students in learning English, therefore the students will improve their competence in English.
2. For Students
- a. They should love to study English first.
 - b. It can improve students' understanding about cardinal and ordinal number by using music performance.
 - c. The students can understand and write the cardinal and ordinal number based on situation easily.
 - d. Students should study and learn intensively to increase their English cardinal and ordinal number.
3. For Readers and the Next Researcher
- a. The writer hopes this thesis can be useful for the reader, so they know that using music performances is more effective in teaching cardinal and ordinal number.
 - b. The researcher admits that there are so many limitations in conducting research. The researcher realizes that this thesis is far from perfect. This can be caused by many factors, such as the limitation of time, so it is not prepared well or perhaps because the lack of the researcher understanding. The researcher hopes that the next researchers can prepare everything as good as possible in conducting the research and can do the follow up of this research.

Finally, the researcher concluded that although using music performance as an aid in teaching learning is not the best one, probably it could be useful to create a more lively, fun, and joyful learning atmosphere.
