

CHAPTER V

CONCLUSION AND SUGGESTION

A. Conclusion

Based on the finding and discussion in chapter IV, it could be concluded that the use of movie as medium in the teaching of narrative text writing was very effective. It was proved by the result of t-test. The t-test showed that $t_{count} = 7.822$ was higher than $t_{table} = 1.66$. It meant that H_a was accepted and H_0 was rejected. Since the t_{count} was higher than the t_{table} , there was a significance difference in the achievement between students in class X G who were taught narrative text writing through the use of movie and students in class X E who were taught narrative text writing without using movie (using text only). The average score of experimental group was 76.889 and the average score of control group was 65.278 in post-test. So, the using of Fairy Tale English Movie “Frozen” is effective in teaching narrative text writing.
