ABSTRACT

Title : Enriching Students' Vocabulary in Procedure Text through Spidergram(A Classroom Action Research at Seventh Grade of MTs Manba'ul Ilmin Nafi' Sarang Rembang in the Academic Year of 2015/2016)

Writer : Jannatun Naimah

Student Number : 123411056

Keyword : Spidergram, Vocabulary, Procedure text

The study was aimed at responding the following questions: how is the students' participation in the teaching learning through Spidergram?, and can Spidergram improve students' vocabulary in Procedure Text?. The objective of the study was to describe the students participation in teaching learning and to identify the improvement of the students' vocabulary in teaching learning using Spidergram. The study was conducted at MTs Manba'ul Ilmin Nafi' Sarang Rembang in the academic year 2015/2016. The subject of the study was the students of seventh grade B. The number of the students were seventeen. The research design that was used was classroom action research. The researcher conducted preliminary study, cycle I, and cycle II. The techniques which were used to collect the data are documentation, observation, and test. The researcher gave test in every cycle and assessed the test in every cycle. The result of study showed that the students' vocabulary in Procedure Text increased. In the preliminary study, the average of students' score is 57,35. In the cycle I, the average of students' score is 85,88. Then in cycle II, the average students' score is 88,82. From the result of observation checklist, it showed there was positive change on students in learning English. During implementing Spidergram in learning vocabulary in procedure text, the students gave attention and participation well. The students became more active in teaching learning activity. Therefore, it can be concluded that teaching vocabulary through Spidergram can enrich student' vocabulary in procedure text.

MOTTO

وَمَنْ جَاهَدَ فَإِنَّمَا يُجَاهِدُ لِنَفْسِهِ . . .

And whoever strives only strives for the (benefit of) him self.

{Al-‘Ankabut: 6}¹

“Strength does not come from physical capacity. It comes from an indomitable will”.

“Kekuatan tidak datang dari kapasitas fisik, tetapi berasal dari kemauan keras”.

(quotes: Mahatma Gandhi)²

“There is nothing lost or wasted in your strives”

DEDICATION

This thesis is dedicated to:

- ❖ My beloved father and mother (Bapak Turmundi and Ibu Narti'ah), who always give me advice and pray to get success in study
- ❖ Honorable, My parent-in-law (Bapak Supingi and Ibu Kuzaemi), who always care and support me in study
- ❖ My beloved husband, Nurkamdi, who always loves and supports me to finish my thesis
- ❖ My cute son, Muhammad Syarief Al Ghifari, who always gives me spirit everyday

ACKNOWLEDGEMENT

Bismillahirrohmanirrohim

Alhamdulillah, the researcher would like to thank to Allah SWT for blessing, health, chance, and inspiration given to the writer during the writing this thesis. Shalawat and salam is addressed to the prophet Muhammad SAW who brings us from the darkness to the brightness.

The researcher realizes that she could not complete this thesis without support, cooperation, help, and encouragement from many people. Researcher gives her sincerest gratitude and appreciation to all people until this thesis can be completely finished. Therefore, researcher would like to extent her appreciation to all of them, especially to:

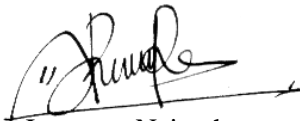

1. The Dean of Education and Teacher Training Faculty, Dr. H. Raharjo, M.Ed. St.
2. The Head of English Language Education Department, Dr. H. Ikhrom, M.Ag
3. The Advisor, Sayyidatul Fadlilah, M.Pd for her patience in providing continuous and careful available guidance, advicing as well as possible, giving correction and suggestion. so that I was finally able to finish this study.
4. Principal of MTs Manba'ul Ilimin Nafi' Sarang Rembang, Abdul Jalil, S.Pd.I, and the English Teacher of seventh Grade, Sampurno Dwi Atmojo, S.Pd and all students of Seventh Grade B who have helped the researcher in doing study

5. The guardian lecturer during I study in UIN Walisongo Semarang, Lulut Widyaningrum, M.Pd
6. All of my lecturers of English Education Department of Walisongo State Islamic University Semarang, who have given insight and experience during my study.
7. All of my friends at UIN Walisongo Semarang and also my friends with the same major in English Language Education Department PBI A, PBI B, and PBI C especially my class PBI B, success for you all.

Finally, the researcher realizes that this thesis is still far from being perfect, therefore, the researcher will happily accepts constructive criticism in order to make it better. The researcher hopes that this thesis would be beneficial for everyone. Amin.

CHAPTER 1

INTRODUCTION

A. Background of the Research

Language is very important for our life. We use language to communicate each other. We can deliver our messages by language both written and spoken. We can also express our idea by language. But, we have to realize that every social group use different language based on their area. For example, English people speak English as their native language, and an Indonesian speaks Bahasa Indonesia. Allah says in the holy Qur'an surah ar-Room 22:³

وَمِنْ آيَاتِهِ خَلْقُ السَّمَوَاتِ وَالْأَرْضِ وَأَخْتِلَفُ اللَّسَانِ وَالْوَلَوَاتِ إِنَّ فِي ذَلِكَ لَآيَاتٍ لِّلْعَالَمِينَ ٢٢

And His Signs are the creation of heavens and earth and the diversity of your tongues and colours. Surely there are signs in this for those of knowledge. (Q.S. Ar-Room/30: 22)⁴

In this globalization era, English as an international language is very important to learn. In spite of the difficulties in studying English, it is useful to study the language. It plays an important role in our life. There are many benefit which will be achieved if we can use English well. It will give good opportunities in our life, such as education, economy, politics, technology, job opportunity or social network.

Owing the some reasons on functional and communicative approaches to language learning, many important areas of the language that have been neglected. One such area is vocabulary. Vocabulary as a part of language is important to consider. Many vocabularies help us to

³ Kementrian Agama RI, *Al-Quran*, p. 367.

⁴ Mahmud Y. Zayid, *The Quran: An English Translation of the Meaning of the Quran*, (Beirut: Dar Al-Choura, 1980), p. 297.

understand language. We can describe anything, express an idea, read a text or write a text easily, and etc. With limited vocabulary anyone will also has a limited understanding in terms of speaking, reading, listening and writing.

How important vocabulary to well-known also written in the Holy Qur'an. Allah said Prophet Adam was learning the name of things in the verse of Al-Baqarah 31:⁵

وَعَلَّمَ آدَمَ الْأَسْمَاءَ كُلَّهَا ثُمَّ عَرَضَهُمْ عَلَى الْمَلَائِكَةِ فَقَالَ أَنْبِئُونِي بِأَسْمَاءِ هَؤُلَاءِ إِنْ كُنْتُمْ صَادِقِينَ

۳۱

And He taught Adam all the names all things and then set them before the angels, saying, "Tell Me the names of these if what you say be true." (Q.S. Al Baqarah/2: 31)⁶

Vocabulary has moved to centre stage in foreign language teaching in recent years, is backed by substantial and increasing research (e.g. Carter and Mc Charty 1988; Coady and Huckin 1997; Schmitt and Meara 1997; Singleton 1999; Read 2000). Vocabulary development is about learning words, but it is about much more than that. Vocabulary development is also about learning more about those words, and about learning formulaic phrases or chunks, finding words inside them, and learning even more about those words.⁷

The acquisition of a large number vocabulary is essential for successful foreign and second language learner. It will be better if vocabulary is learned since early. It can start from kindergarten, elementary school, junior high school, and other next level. They can be

⁵ Kementrian Agama RI, *Al-Quran*, p. 7.

⁶ Mahmud Y. Zayid, *The Quran: An English Translation of the Meaning of the Quran*, p. 4.

⁷ Lynn Cameron, *Teaching Languages to Young Learners*, (Cambridge: Cambridge University Press, 2001), p. 72-73.

recognized some vocabularies from the smallest thing in their environment. They can also use some vocabularies in their daily activity. So, they can memorize well and it will be a good habit for them. They will be easier to learn English without loading on their mind.

For the junior high school students, English skill is very useful for their basic to learn English at senior high school. Lynne Cameron stated “Building up a useful vocabulary is central to learning of a foreign language at primary level”.⁸

There are many factors that make the student’s vocabulary low. They come from internal factors and external factors. The internal factors mean factors which are from inside of the students themselves such as motivation, interest, intelligence, etc. The external factors mean factors which are from outside of students that effect their learning process such as economic background, learning materials, and teacher’s performance including their teaching methods.

In learning process students often have some difficulties or barrier which must be solved. This difficulties can influence their motivation in learning process. It also influence their achievement in learning. Students need suitable teaching technique to make them easier in learning vocabulary. Students will be easier to memorize new vocabularies through a suitable learning technique and resources. The technique and media must be memorable, fun, and interesting. So, the students can enjoy and comfort in learning process. This condition will support learning outcome to get the best result.

The characteristic of students of Madrasah Tsanawiyah Manba’ul ‘Ilmin Navi’ are different. Some of students are interested in studying

⁸ Lynn Cameron, *Teaching Languages to Young Learners*, p.72.

English and other are still difficult to understand English because of limited vocabulary they have. Limited vocabulary cause some students have low motivation to learn. They need a new method or media to build their motivation.

The researcher will teach vocabulary using using spider gram. Spidergram is also called spider map. This is one of Graphic Organizer that is used to investigate and enumerate various aspects theme or topic, helping the students to organize their thought. It looks a bit like a spider's web, hence its name.⁹ Researcher hopes the students are more easier to enrich vocabularies by using Spidergram. The activities will be designed uses cooperative learning. Students will work in group and take them to be active in their learning. They will work together with their partner, and the teacher as facilitator which give clear instruction.

B. Research Questions

The Researcher has two research questions based on the problems above.

The research questions are as follows:

1. How is the students' participation in the teaching learning through Spidergram to enrich students' vocabulary?
2. How is the improvement of students' vocabulary using Spidergram?

C. Objectives of the Research

⁹ Titik Purwoningsih, K2206010, "Improving Students' Vocabulary Mastery through Graphic Organizers (An Action Research at Fifth Grade of SD Negeri Kentingan No.79 Surakarta in the Academic Year 2010/2011), *Thesis*, (Surakarta: Teacher Training and Education Faculty of Sebelas Maret University, 2011), p. 24.
<http://eprints.uns.ac.id/2345/1/208291111201108431.pdf>. Accessed on June 25, 2017 at 20.00. PM.

Considering the problem above, the objectives of this research are as follows:

1. To describe the students' participation in the teaching learning through Spidergram to enrich students' vocabulary.
2. To identify the improvement of students' vocabulary.

D. Pedagogical Significance

The result of the study is expected to be able to give the following benefits for:

1. Researcher

The researcher will get experience and knowledge directly in teaching vocabulary through Spidergram.

2. Student

The use of spider gram will make students learn more easily. It also helps students to develop and improve their vocabulary .

3. Teacher

It is as motivation in choosing appropriate and various learning strategy and the researcher hopes the teacher can use Spidergram as alternative medium in teaching vocabulary on procedure text.

4. Reader

The reader will get more information from this research.

CHAPTER II

REVIEW OF RELATED LITERATURE AND HYPOTHESIS

In this chapter, the researcher discussed some theories related to the research. They are previous research, literature review, and hypothesis.

E. PREVIOUS RESEARCH

The researcher describes some researches which are relevant to this thesis :

1. Rini Setyawati (113411130)

The thesis is written by Setyawati. Her thesis is “Improving Students’ Vocabulary Power through Song.” The subject of this research was the students of seventh A 1 grade. The number of the subject was 23. The design research that is used was classroom action research. The researcher conducted pre-cycle, and two cycles on classroom action research.

The technique which were used to collect the data are observations and test. The teaching learning process in cycle 1 and cycle 2 were the classroom action research. The researcher introduced the words that are represented by songs and tests. First, researcher explained about vocabulary, then the researcher gave a song. After that she asked the students to identify the vocabulary of song and write on the whiteboard.

In this research, the researcher analyzed the result from observations and achievement test from each cycle. In pre-test, there are about 39,13% students gave attention maximally to the teacher, the

average of the students' achievement was 5,57. In first cycle, there are about 82,61% of students gave attention to the material and the average of students' achievement was 7,26. In the second cycle all of the students gave attention to the class and the average of students' achievement was 8,39.

Based on the result of the research, it can be concluded that by using songs, teacher can improve students' vocabulary power. It is hoped that it can be valuable as the information resource for students, teachers and the researcher herself.¹⁰

The similar between both of researches are on the research approach and the discussion. The research is classroom action research and the discussion is about vocabulary. The difference on this previous research is on the teaching media or technique. The previous research uses song as the teaching media and the research uses spidergram as the teaching technique.

2. Titik Purwaningsih. K22106010.

A Thesis is written by Titik Purwaningsih. Her thesis is "Improving Students' Vocabulary Mastery through Graphic Organizers (An Action Research at Fifth Grade of SD Negeri Kentingan No. 79 Surakarta in Academic Year 2010/2011)". Teacher Training and Education faculty, Sebelas Maret University, Surakarta, 2011. The research was conducted in two cycles from July 30 until October 29, 2010 at fifth grade students of SD Negeri Kentingan No. 79 Surakarta.

¹⁰ Rini Setyawati, 113411130, "Improving Students' Vocabulary Power through Song (A classroom Action Research with Seventh Grade Students of MTs Pondok Pabelan magelang in the Academic Year of 2014/2015)", *Thesis* (Semarang: Education and Teacher Training Faculty of UIN Walisongo Semarang, 2015), p.54-83.

The technique of collecting data are qualitative and quantitative method.

graphic organizers are instructional tool used to illustrate a student or class's prior knowledge about topic or section of the text. Semantic mapping or graphic organizer based on Stahl and Vancil (1986) in Coady and Huckin (1992) involves drawing a diagram of the relationship between words according to their use in particular text.

The result of this research show that graphic organizers can improve students' vocabulary mastery. First, the improvement can be seen from the differences between the pre-test and post-test. In pre-test, the mean of the students' score is 41.48 while in the first post-test the mean of the students' score is 67.15 and the mean score of second post-test is 79.81. Second, from the participation of the students in the classroom during the research. Third, the improvement can be known through students' interest. The result of the research implies that English teachers need to choose the appropriate technique in teaching vocabulary. The appropriate technique to teach vocabulary is graphic organizers.

The similar between both of the researches are on the research approach and teaching technique. Both of them discuss about vocabulary and used Graphic organizers. The difference on the previous research is the subject or students' grade. The previous research is teaching in elementary school while this research is teaching in Junior High School.¹¹

¹¹ Titik Purwoningsih, K2206010, "Improving Students' Vocabulary Mastery through Graphic Organizers (An Action Research at Fifth Grade of SD Negeri Kentingan No.79 Surakarta in the Academic Year 2010/2011), *Thesis*, (Surakarta: Teacher Training and Education Faculty of Sebelas Maret University, 2011), p. iii.

3. Attinar Yunieta Putri. 080210401033

A thesis is written by Attinar Yunita Putri. Her thesis is “The Effect of Using Spidergram on the Eighth Grade Students’ Vocabulary Achievement at SMP Negeri 8 Jember in the 2013/2014 Academic Year”. The purpose of this research was to investigate whether or not there was a significant effect of using Spidergram on the eighth grade students’ vocabulary achievement at SMPN 8 Jember in the 2013/2014 academic year.

Spidergram is a technique for gathering and organizing vocabularies by drawing them into a diagram (Gerson and Gerson, 1997:187). Spidergram can stimulate the students’ thought to find vocabularies related with the core concept.

The design of this study is quasi experimental research. The subjects were two classes that had the closest mean were chosen as the control class and experimental class. The two classes which had the closest mean score were VIII-A and VIII-B.

Based on the output of independent sample t-test by using SPSS, in the t-test column, it can be seen that the value of sig column in the first row was 0.000 and this value was less than 0.05 ($p < 0.05$). Considering the result of vocabulary test, it was concluded that the use of Spidergram technique had a significant effect on the eighth grade students’ vocabulary achievement at SMP Negeri 8 Jember 2013/2014 academic year . So, this technique could be used as consideration to effective the students’ ability in mastering vocabulary.

The similar between both of the researches are on the discussion and teaching technique. Both of them discuss about vocabulary and used Spidergram. The difference on the previous research is the research approach. The previous research is experimental research while the research is classroom action research.¹²

F. LITERATURE REVIEW

1. Vocabulary.

a. Definition of Vocabulary

Vocabulary is one of language components besides grammar and pronunciation. Suyanto said that vocabulary is the words are owned by language and they give a meaning if we use that language.¹³ Another definition is given by Caroline; she said that vocabulary is the collection of words which is known by the individual.¹⁴

¹²Attinar Yunieta Putri, 080210401033, “The Effect of Using Spidergram on the Eighth Grade Students’ Vocabulary Achievement at SMP Negeri 8 Jember in the 2013/2014”, *Thesis*, (Jember: English education Program, Language and Arts Department Faculty of Teacher Training and Education Jember University, 2014), p. xiii-xiv.

http://repository.unej.ac.id/bitstream/handle/123456789/57580/Attinar%20Yunieta%20Putri%20-%20080210401033_1.pdf?sequence=1. Accessed on June 26, 2017 at 19.00 PM.

¹³ Kasihani K.E suyanto, *English for Young Learners*, (Jakarta; PT Bumi aksara, 2010), p. 43.

¹⁴ Caroline T. lines, *Practical language Teaching: young learners*, (New York: McGraw-Hill, 2006), p.121.

According to Barbara, vocabulary is the stock of words which particular person or group know or use.¹⁵ Alderson and Bachman said, “vocabulary is a set of lexemes including single word, compound words and idiom”.¹⁶ Burton said, “vocabulary is the range of language of particular person, class, profession.”¹⁷

From some definition above, the researcher concludes that vocabulary is a set of meaningful words or lexemes in a language which is known and used by people .

b. Kind of Vocabulary

According to Hycraft, There are two kinds of Vocabulary. There are receptive and productive vocabulary. Some people say the division is “passive” and “active” vocabulary.

1. Receptive vocabulary.

According to Hycraft (1978) receptive vocabulary is words that students recognizes and understands when they occur in a context, but which he can not produce correctly.

2. Productive vocabulary.

¹⁵ Barbara Ann Kipver, *Random House Webster's College Dictionary*, (UsA: Random house, Inc,2001), p. 1368.

¹⁶ John Read, *Assessing Vocabulary*, (New York; Cambridge University Press,2000).p.17.

¹⁷ S. H Burton, *Mastering English Language*, (Hongkong: Macmillan Press Ltd, 1982), P. 98-99.

Productive vocabulary is words which the student understands, can pronounce correctly and use constructively in speaking and writing.¹⁸

In addition, according to Celce and Olshtain, there are two kinds of vocabulary, namely content and function words. The content words are the vocabulary that belong to open word classes (words classes that readily accept new words and discard old ones). The content words can be divided into three general classes:

- a. Words that refer to a person, a place or a thing that we might call them nouns.
- b. Words that express an action, an event or a state are called verbs.
- c. Words are used to describe the qualities of thing or action are called adjectives and adverbs.

The function words are vocabulary items that belong to closed word classes (i.e. word classes that do not readily admit new items or lose old ones: pronouns, auxiliary verbs, preposition, determiners and adverbs).¹⁹

c. Vocabulary Learning

Discussion of vocabulary learning are often divided between intentional learning and incidental learning.

1. Intentional learning

¹⁸ Evelyn Hatch and Cheryl Brown, *Vocabulary, Semantic, and Language Education*,(Cambridge: Cambridge University Press, 1995), p. 370.

¹⁹ Marianne Celce and Murcia Elite Olshtain, *Discourse and context in Language Teaching*, (New York: Cambridge University Press, 2003),p. 76.

Intentional learning as being designed, planned for, or intended by teacher or student. There is general consensus among L1 vocabulary experts (e.g., Calfee & Drum, 1986; Stahl & Fairbanks, 1986; Beck, McKeown, & Omanson, 1987; Chall, 1987; Drum & Konopak, 1987; Graves, 1987, 1987) that intentional learning, in particular instruction, does aid in the learning word.

2. Incidental learning

Incidental learning as the type of learning that is a by product of doing or learning something else. Most of work with incidental learning has focused on the vocabulary which is learned through reading. This incidental learning of words from reading in particular is apparently quit powerful also in the foreign language (rather than second language) environment.

In fact, after one study with French learners in the United States, the researcher, Dupuy and Krashen (1993) estimated that the learners who participated in reading and watching a film in class acquired approximately five to ten words per hour from incidental learning from a quite difficult text. The research did not test words that could have been learned from regular classroom interaction, so it is possible that students actually acquired even more words incidentally.²⁰

²⁰ Evelyn Hatch and Cheryl Brown, *Vocabulary, Semantic, and Language Education*, p. 368-369.

2. Definition of Spidergram

A spidergram or spider map is a type of graphic organizer that is used to investigate and enumerate various aspects theme or topic, helping the students to organize their thought. It looks a bit like a spider's web, hence its name. The process of creating a spider diagram helps the students focus on the topic and requires the students to review what they already know in order to organize that knowledge²¹.

Graphic Organizers are charts, graphs, or diagram, which encourage students to see information as a component of system rather than isolated facts. Students may complete these as they read or view a presentation. There are a variety of ways to use graphic organizers, including the following: Semantic word map, story chat, Venn diagram, spider map, network tree, word map, and KWL chart.²²

According to Bromley, Devitis and Modlo in 1999 Graphic organizers are visual representation of knowledge that structures information by arranging important aspects of concept or topic into a pattern using labels (Bromley, Devitis & Modlo, 1999).²³ Basically graphic organizers are instructional tool used to illustrate a student or

²¹ Titik Purwoningsih, K2206010, "Improving Students' Vocabulary Mastery through Graphic Organizers (An Action Research at Fifth Grade of SD Negeri Kentingan No.79 Surakarta in the Academic Year 2010/2011), *Thesis*, p. 24. <http://eprints.uns.ac.id/2345/1/208291111201108431.pdf>.

class's prior knowledge about topic or section of the text. Semantic mapping or graphic organizer based on Stahl and Vancil (1986) in Coady and Huckin (1992) involves drawing a diagram of the relationship between words according to their use in particular text.²⁴

Based on the definition above, the researcher concludes that graphic organizers are visual representation of knowledge in form of chart, diagram, or graph that encourage the students to see the information and develop a topic.

There are many kinds of graphic organizers. Some kinds of graphic organizers are as follows:²⁵

a. Circle organizer

This organizer can be used to help students understand the sequence of events in a process. On a sequence circle there is a consecutive flow of events with the last cycling back to the first event. Sequence circles are appropriate to represent the relationship of events that are continuous

b. Data grid

This organizer can be used to help students organize information into different categories. It allows students compare and contrast information according to various criteria. Students are

²⁴ Titik Purwoningsih, K2206010, "Improving Students' Vocabulary Mastery through Graphic Organizers (An Action Research at Fifth Grade of SD Negeri Kentingan No.79 Surakarta in the Academic Year 2010/2011), *Thesis*, (Surakarta: Teacher Training and Education Faculty of Sebelas Maret University, 2011), p. 22-23.

²⁵ E-book, Hongkong Curriculum Department Institute, Personal, Social, and Humanities Education Section, *The Use of Graphic Organizers to Enhance Thinking Skills in the Learning of Economics*, p. 14-46.

thus trained to see patterns of information and are able to generate hypotheses.

c. Discussion map

This organizer can be used to help students consider both sides of an issue before drawing conclusion. Students are trained to develop skills in comparing and contrasting points of view from different people.

d. Compare map

This organizer can be used to help students compare two concepts according to a set of criteria. Students can make use of it to record a discussion between two concepts/subjects and as an organizing tool for comparison.

e. Big question map

This organizer can be used to help students improve their research and problem-solving skills. Students are trained to plan their research and investigation of a topic and thus promote their ability to learn and think independently.

f. Star diagrams

Star diagrams are a type of graphic organizer that summarize and organize data about multiple traits or characters, fact, or attributes associated a single topic. Star diagrams are useful for basic brainstorming about a topic or simply listing all the major traits related to a theme.

g. A spider map

A spider map (sometimes called a semantic map) is a type of graphic organizer that is used to investigate and enumerate various aspects theme or topic, helping the students to organize

their thought. It looks a bit like a spider's web, hence its name. For example, a spider diagram can be used to find methods that help students study skills (like taking notes, reading, memorizing, etc), and investigate the factors involved in performing each of the methods.

h. A Fishbone map

A fishbone map (sometimes called herringbone map) is a type of graphic organizer that is used to explore the many aspects or effects of a complex topic, helping the student to organize their thoughts in a simple, visual way. The use of color helps make a fishbone map clearer and easier to interpret.

i. Word boxes

Vocabulary maps or word boxes are graphic organizers that can be useful in helping students learn new vocabulary words. For each new vocabulary word, the students write the word, its definition, its part of speech (noun, verb, adjective, adverb, etc), a synonym, an antonym, draws a picture that illustrates the meaning of the word, and write a meaningful sentence using the word.

j. Cluster diagrams

Clustee diagrams (also called cloud diagrams) are a type of non-linear graphic organizer that can help to systematize the generation of ideas based upon a central topic. Using this type of diagram, the students can more easily brainstorm a theme, associate about an idea, or explore a new subject.

k. Tree diagrams

Tree diagrams are a type of graphic organizer that shows how items are relate to another. The tree's trunk represents the

main topic, and the branches represent relevant facts, factors, influences, traits, people, or outcomes.

l. Story maps

Story maps are graphic organizers that can be useful in helping students analyze or write a story. This type of analysis is especially good for examining fables and folktales. Story map graphic organizers help students identify the elements of the story and the theme or moral of the story.

m. Chain diagrams

Chain diagrams also called sequence of events diagram, are a type of graphic organizer that describe the stages or steps in a process. Chain diagrams are useful in examining linear cause – and-effect processes and other processes that unfold sequentially. The students must be able to identify the first step in the process, all of the resulting stages in the procedure as they unfold, and the outcome (the final stage). In this process, the students realize how one step leads to the next in the process, and eventually, the outcome.

n. Continuum or timeline diagrams

Continuum diagrams are a type of graphic organizer that is used to represent a continuum of data that occur in chronological (time) order or in sequential order. For example, a continuum or timeline diagram can be used to display milestones in a person's life.²⁶

²⁶ Titik Purwoningsih, K2206010, "Improving Students' Vocabulary Mastery through Graphic Organizers (An Action Research at Fifth Grade of SD Negeri Kentingan No.79 Surakarta in the Academic Year 2010/2011), *Thesis*, p. 23-30. <http://eprints.uns.ac.id/2345/1/208291111201108431.pdf>.

Spidergram is a diagram with lines and circles for organizing information so that it is easier to use or remember.²⁷ Spidergram is a technique for gathering and organizing vocabularies by drawing them into a diagram (Gerson and Gerson, 1997:187). Spidergram can stimulate the students' thought to find vocabularies related with the core concept.²⁸

The technique is used if the involves investigating attributes associated with a single topic, and then obtaining more detail on each of these ideas.²⁹

From some definitions above, the researcher concludes that Spidergram is one type of graphic organizer in form of diagram with lines and circles that has function as a technique for gathering vocabulary and developing topic.

3. Procedure text

Procedure text is piece of text that gives us instruction for doing something.³⁰ A procedural text is used to do or make something.³¹ The social function of procedure text is to describe how something is accomplished through a sequence of action or steps.

The generic structure of procedure text consist of goal, materials, and steps. This is an example of procedure text. The goal is *How to make kolak*.³² The materials are *500 grams sweet potatoes, two cups thick coconut milk, 90 grams brown sugar, pinch of salt, 2 cups water*. The steps are *First, peel and wash the sweet potatoes and cut them into small squares, boil in 2 cups of water for 10 minutes, In other saucepan, simmer the coconut milk with a pinch of salt and the brown sugar, stirring and being careful that the coconut milk doesn't quite come to the boil, When the sugar is dissolved, put in the sweet potatoes and continue to simmer for about 10 to 15 minutes, until potatoes are cooked, last serve hot*.

The procedure text has some language features. The text focus on generalized human agents, the text use of simple present tense

³⁰ KBI, "Procedure text: Defenisi, Tujuan, Jenis, Generic Structure, dan Contoh Terlengkap", <http://www.kuliahbahasainggris.com/procedure-text-definisi-tujuan-jenis-generic-structure-dan-contoh-terlengkap/>. Accessed on May 06, 2016 at 22.00 PM

(often imperative), the text use mainly of temporal conjunctions (or numbering to indicate sequence), and using material processes.³³

4. Material and Procedure

At the beginning of this study, the researcher gives a passage to all of students in the class. The passage is a procedure text. Students have to read the text. The text is made really interesting. Students also will find some new words in text. There are some words will be made different from the other. The word is made in bold. Students will analyze the meaning of the word. The students will work in a group. They will be divided into some groups. So, they can discuss with their friend together.

Student will be asked to make list of the word. The aim of these lists is to find out the words that the students do not know because these words will be taught during the treatment. The students have to indicate their knowledge of the words by write the word in a column of table with two options: '*I know the word*'; '*I don't know the word*'. If the know the word, they have to write the word with the meaning in column '*I know the word*'.

They start to keep a difficult vocabulary by using 'spidergram'. The unknown word will write in a circle in the centre of paper. Then, they have to discuss the word to look for the meaning. They also may to ask the meaning to their teacher. They were also allowed to open dictionary. The researcher or teacher asked them to find out some words which are suitable to follow and related to the

³³ Linda Gerot and Peter Wignell, *Making Sense of Functional Grammar*, (Australia: AEE, 1995), p. 206.

word in the circle. The word has to suitable to follows the circle word based on the meaning.

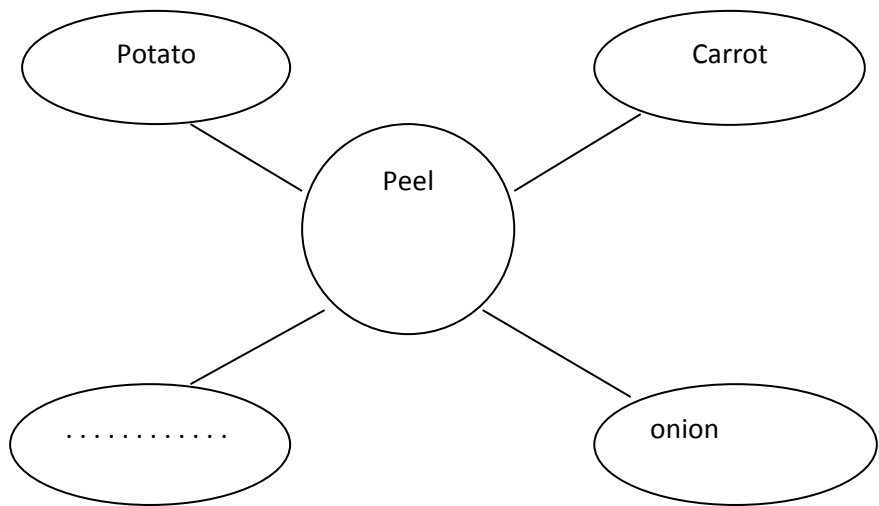

Figure of Spidergram.³⁴

The teacher asks a representative of each group to present their result of their work in front of the class. The teacher checks correctness by using collocation dictionary and show the multiple suitable collocation of each word in a board.

³⁴ Stuart Redman, *English Vocabulary in Use: Pre-intermediate and Intermediate*, (Jakarta: Erlangga, 2001), p. 31.

G. RESEARCH HYPOTHESIS

The hypothesis of this research is that using spidergram can enrich students' vocabulary of the seventh grade students of MTs Manba'ul 'Ilmin Nafi'.

CHAPTER III

RESEARCH METHOD

A. Research Design

This research is action research at the Seventh grade students of MTs Manba'ul Ilmin Nafi' Sarang Rembang in the academic year 2015/2016. According to Harmer, action research is the name given to a series of procedures teachers can engage in, either because they wish to improve aspects of their teaching, or because they wish to evaluate the success and or appropriation of certain activities and procedures.³⁵ Arikunto stated that classroom action research is one of the type of investigation that explains process, cause and effect by using a treatment.³⁶ This research has characteristic reflective participative, collaborative, and spiral that have purpose to repair and to increase the system, method, process, substance, competence, and situation.³⁷

From the definition above, the researcher concludes that classroom action research is one of investigation in improving or increasing the practice of learning which can be done by teacher, researcher, and student with his or her colleague, etc with involves a group of students to improve teaching and learning process or to enhance the understanding of the students to the lesson. This research is qualitative descriptive research uses

³⁵ E-book, Jeremy Harmer, *The Practice of English language Teaching*, (England: Longman, 2003), p. 344.

³⁶ Suharsimi Arikunto, et. all, *Penelitian Tindakan Kelas*, (Jakarta: Bumi Aksara, 2015), p. 1.

³⁷ Suharsimi Arikunto, *Prosedur Penelitian Suatu Pendekatan Praktik*, (Jakarta: Rineka Cipta, 2013), p. 129.

data observation toward improving students motivation in learning vocabulary through collocation, this data was analyzed through some cycles in action.

Before the researcher did the cycles in action, researcher observed at first research design could be done with some steps as follow:

1. Collected data such as documentation includes the number of the students, students' name list, and pre-test.
2. After the researcher collected the data, she did a pre-test. Its purpose is to know the score mean of students' vocabulary before using collocation.
3. The researcher assessed the result of students' vocabulary test in pre-cycle

In this research there were two cycles applied and there were four components in one cycle for doing classroom action research. There were four steps in Classroom action Research, they are planning (identify the problems), acting (collect the data), observing (analyze and interpret data), reflecting (develop an action).

According to Arikunto stated that there are four steps process in each cycle for doing classroom action research can be explained as follow:³⁸

- a. Planning

³⁸ Suharsimi Arikunto, *Penelitian Tindakan untuk Guru, Kepala Sekolah & Pengawas*, (Yogyakarta: Aditya Media, 2010), p. 17-19.

Planning an action research by focusing on who, what, when, where, and how the action will be done. This research was to get information about students participation in English subject.

b. Acting

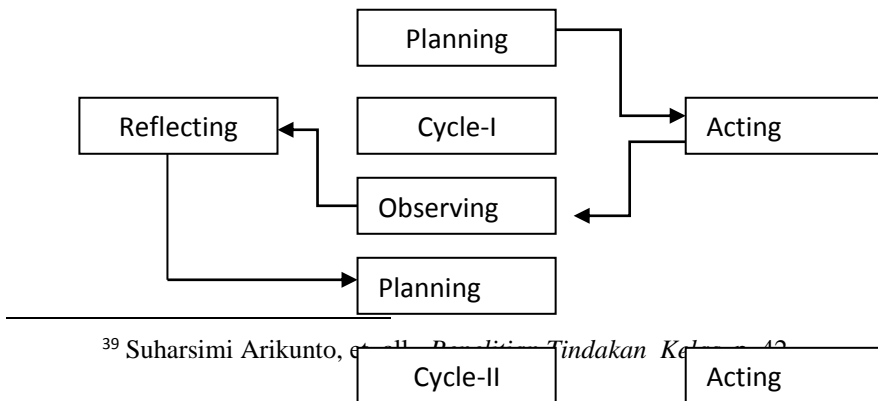

This section discusses about the steps and activities that will be implemented by researcher. In this step, the teaching technique was applied in teaching learning process

c. Observing

In this phase, the researcher observes the teaching learning process. The researcher prepared an observation checklist to know the class condition.

d. Reflecting

Reflecting means to analyze the result based on the data that have been collected to determine the next action in the next cycle. In this phase, the researcher can observe whether the acting activity had resulted any progress, what progress happened, and also about the positives and negatives. Result from observation then being reflected together by teacher and researcher, this includes analysis, and evaluation toward observation result. The classroom action research cycles model are as follows:³⁹

³⁹ Suharsimi Arikunto, *et al.*, *Penelitian Tindakan Kelas*, 42

Figure 1. Action Research Cycle

B. Place and Time of Research

This action research was carried out at MTs Manbaul Ilmin Nafi Sarang Rembang. It is located at Jalan Kalipang-lodan KM.04 Sarang Rembang. Researcher choose this school because the location is near from the researcher's house. The research was conducted on March until May 2016

C. The Subject and Collaborator of the Study

a. Subject of the Study

This research directly focuses on the subject that would be investigated. The subject of this study was students of seventh grade VII B of MTs Manbaul Ilmin Nafi in the academic year of 2015/2016.

b. Collaborator

The collaborator in this classroom action research is person who helps the researcher to collects the data. The collaborator in this research is the English teacher who teaches English in MTs Manbaul Ilmin Nafi. The teacher is Mr. Sampurno Dwi A, S.Pd.

D. Procedure of the Research

In this classroom action research, the researcher conducted two cycles through spider gram in teaching vocabulary, which was each cycle consist of four steps, they are planning, acting, observing, and reflecting. The researcher conducted two cycles and each cycle was ended by a final test, but before conduct the first cycle she conducted preliminary to know the initial condition of students' vocabulary power in their class. The activities that have done in each cycle are as follow:

a. Preliminary research

Preliminary research was conducted on May 15, 2016. The teacher taught the students use conventional teaching. The researcher observed the students activities and participation in this session to get the information about students' initial condition and to know their problems in teaching learning. After that, the researcher gave the test to check the students' understanding in vocabulary.

After conducting preliminary, the researcher got conclusion that the students' vocabulary was low. It could be seen from their score. Not only their score, there were many students didn't give their attention when the teacher taught them. Then, the researcher decided to conduct the next cycle to solve the problem.

b. The First Cycle

The first cycle conducted on May 22, 2016. In this cycle the researcher prepared some activities that had been done in this first treatment, those are:

1. Planning

There were some activities that had been done by the researcher in planning. She made a lesson plan as guiding to teach vocabulary. Then she prepared observation checklist. She also prepared the teaching material and media. The last, she prepared exercises to test as an instrument.

The teacher also had some activities in this session. He prepared students' attention list. He also helped the researcher to discuss and share the information about material, lesson plan and syllabus.

2. Acting

The researcher did some activities in this session. First, he greeted the students and checked the students' attendance. Then she asked question to the students related to the topic. The material was procedure text. The topic was about food. She explained about procedure text such as generic structure and language features. She also explained about action verb in the text.

After that, she divided the students into some groups. Then she explained the rule and gave instruction related to the activity. She asked the students to choose a difficult word from the list. The difficult word was written in the centre of their paper, and they had to circle the word in the centre. She asked the students to find out the words which are suitable to follow and related to the word in the circle based on the meaning as many as possible. The words was written used Spidergram. Then the researcher asked the representative of each group to

show the result of the collocation in front of the class. Last, she gave the final test to find out the final outcomes of first cycle.

In this session, the English teacher observed the researcher activity and learning processes. He also observed the students response.

3. Observing

The researcher observed students activities using observation checklist. She observed students' attention and participation. It could be seen from students' paid attention, asked question, responded question, accomplished the task, and enthusiastic in teaching learning.

In this session, the English teacher became an observer in the teaching learning process. He used observation checklist to observe how many students who paid attention, asked question, responded to questions, accomplished task, and enthusiastic to English learning.

4. Reflecting

The researcher analyzed the data from the observation checklist and result of the test to find out the improvement of students vocabulary. Then she discussed to the teacher about teaching learning process that had been done to find out the weakness of the cycle. She also discussed about how to improve it to the next cycle.

The teacher and the researcher evaluated the step in teaching learning process. They also discussed the result of the test and observation sheet.

E. Technique of Collecting Data

1. Documentation

Documentation method is used to look for the data concerning matters or the variable that are taken in the form of the note, transcript, book, newspaper, magazine, inscription, notulen, legger, agenda, etc.⁴⁰ The researcher used documentation which relate with this research. They were students' name list, students' English mark, lesson schedule, students' worksheet and photo of teaching and learning process.

2. Observation

According to Sugiyono, observation as data collection techniques have specific characteristics compared to interview and questionnaire. If interviews and questionnaires in constant communication with the people, the observation is not limited to people, but also the surrounding objects.

Hadi stated that Observation is a complex process, a process that is composed of a variety of biological and psychological processes. two of the most important is the processes of observation and memory.

In terms of the implementation process of data collection, observation can be divided into non-participant observation and participant observation, then in terms of instrumentation is used,

⁴⁰ Suharsimi Arikunto, *Prosedur Penelitian: Suatu Pendekatan Praktik*, p. 201.

the observations can be divided into structured and unstructured observation.⁴¹

Observation was used to monitor the students' activities during the teaching learning process. Researcher observed the situation in class during lesson, response and attitude of students when they were given explanation, did the task, and to know their difficulties. In conducting this classroom action research, the researcher decided to use observation form.

Table I

Form of Observation Check List

INDICATORS	YES	NO
Paying Attention		
Asking Question		
Responding to Question		
Accomplishing task		
Being enthusiastic an Collocation		

3. Test

⁴¹ Sugiyono, *Metode Penelitian Kuantitatif, Kualitatif dan R&D*, (Bandung: Alfabeta, 2011), p. 145.

A test is a series of questions or exercises and the other instruments used to measure skill, knowledge, and individual or group ability.⁴² Test is an important part every teaching and learning experience. Test is a set of questions that is used to measure the skill knowledge, intelligence and talent of an individual of a group.

F. Technique of Analyzing

There are two types of data as evidence. They are namely quantitative and qualitative data. The quantitative data are data from written test namely pre-test and post-test. The result of the test is analyzed statistically. Meanwhile, the qualitative data comes from observation noted on field notes.

1. Analyzing Observation

Researcher used observation scheme during the teaching-learning process in pre-cycle research, cycle I, and cycle II. Data from observation described as detail as the researcher will get. Data from observation was grouped based on students' attention toward the lesson, the frequent of asking question, accomplishing task that given by the teacher and being enthusiastic to English game has taken as a clue or indicator for students' vocabulary in Procedure Text using collocation. In this observation, the researcher used systematic observation. According to Arikunto systematic observation is observation that done by researcher with guidance as instrument of observation.⁴³ The guidance was called

⁴² Suharsimi Arikunto, *Prosedur Penelitian: Suatu Pendekatan Praktik*, p. 193.

⁴³ Suharsimi Arikunto, *Prosedur Penelitian: Suatu Pendekatan Praktik*, p. 200.

sign system which contained the list of activities that had been observed, here after the researcher used sign toward students' activities.

The form of sign system observation is as follow:

Table I

Form of Sign System Observation

Indicators	Yes	No
Paying Attention		
Asking Question		
Responding to Question		
Accomplishing Task		
Being Enthusiastic an using collocation		

The researcher checked in the observation check list. In the end of cycle, the researcher analyzed by calculating the percentage from the check list as the formula below:

$$P = \frac{f}{n} \times 100\%$$

p = percentage

f = the sum of check list

n = amount of students

2. Analyzing Test

Test is one technique to measure someone's proficiency. Brown states that a test is a method of measuring person's ability, knowledge or performance in a given domain. Test is preparing administrative procedure that occurs in identifiable times in a curriculum when learners master all their faculties to offer peak performance, knowing that their responses are being measured and evaluated.⁴⁴ The researcher used score on students' proficiency on students' vocabulary in Procedure Text. The researcher used mean formula to know the average of students' score and to check the increasing of students' vocabulary in Procedure Text, mean defined as "the total number of score divided with the total number of student". The pattern of mean as

$$M = \frac{\sum X}{N} \text{ follow:}^{45}$$

X= the total scores of students

N= the total number of students

G. Indicator of Achievement

The students' success and failure in doing the planned activities assessed by referring to the increasing students' vocabulary

⁴⁴ H. Douglas Brown, *Language Assessment Principles and Classroom Practices*, (New York: Pearson, 2004), p. 3.

⁴⁵ Sugiyono, *Statistika untuk Penelitian*, (Bandung: Alfabeta, 2010), p. 49.

achievement through Spidergram. The proficiency could be said that they are successfully is gained by students if the students have improvement in every cycle.

CHAPTER IV

RESEARCH FINDING

In this chapter, the researcher would like to describe and discuss the result of the research. The researcher would describe the students' participation and the students' improvement in learning vocabulary by using collocation. The researcher used Classroom Action Research as the field of research methodology. Then as the result of the research would be presented by the result of the research and the analysis of the collected data during did the research that involved Pre Cycle, Cycle I, and Cycle II.

A. Description of the Data

The research was conducted by using classroom action research. The research consist of pre-cycle, cycle I and cycle II. Before conducted the cycle I, the researcher did the preliminary research (pre-cycle) to measure student's competence in learning vocabulary.

1. Pre- Cycle

The pre-cycle was conducted on May 15, 2016. In this activity, the students' was taught by conventional method. Conventional teaching or traditional teaching refers to a teaching method involving instructors and students interacting face-to-face manner in the classroom. Students receive the information passively and reiterate the information memorized in the exams.⁴⁶ The traditional (or

⁴⁶ Yap Wei Li, "Transforming Conventional Teaching Classroom to Learner-Centered Teaching Classroom, Using Multimedia-Mediated Learning Module", *International Journal of Information and Education Technology.*, (Vol. 6, No. 2, 2016), p. 105-106. www.ijiet.org/vol6/667-K00013.pdf

conventional) teaching methods are teacher-centered and include the use of lectures and discussion while the problem solving element is presented by and discussed with the instructor; the syllabus, the teaching materials and the students assessments are determined by the tutor and transmitted to students in various lectures.⁴⁷ In this cycle, teacher just showed a procedure text to the students. Then teacher choose some vocabularies from the text. After that teacher read the vocabularies and asked students to imitate him. I saw that student's attention in this class only 47,06%. It influenced process of receiving English material by students from the teacher. There were not all students responding to question from the teacher. The students which responded the question only 23,5%. It showed that many students still have less motivation to respond and participate the activity in the class.

In this cycle, the teacher taught material of procedure text about food. In this case the teacher did not use a media to support his teaching process. He just asked his students to memorize some vocabularies from the text. It made them were bored to memorize all vocabularies one by one without interesting way. The students were not active during learning process. Students' enthusiastic only 41,17. It showed that many students were not interested to the activity.

After that, the researcher gave written test for the students. There were 10 items matching picture, and 10 items multiple choices

Accessed on October 28, 2016. 08.00 AM.

⁴⁷ Belias Demitrios et. all, "Traditional Teaching Method VS. Teaching trough the Application of Information and Communication Technologies in the Accounting Field: Quo Vadis?". *European Scientific Journal* 9, 28, 2013, 76. <http://eujournal.org/index.php/esj/article/view/1885>. Accessed on October 28, 2016. 07.30 AM

of test. The test was followed by 17 students of seventh grade of MTs Manbaul Ilmin Nafi' Sarang Rembang. The result of the test would be data of students' achievement before taught through Spidergram as a technique in teaching vocabulary.

2. First Cycle

The first cycle was conducted on May 22, 2016. In this cycle the researcher began teach this class. She applied Spidergram to teach vocabulary in this class. The material was procedure text about food. Researcher asked students to make a list of word in a table. The table consist of two columns, these were 'I know the word' and 'I don't know the word'. The further result would be explained as follows:

a. Planning

There were some activities in planning which had been done by the researcher. She made a lesson plan to teach in the first cycle. The material was procedure text. The topic is about food. The lesson plan used KTSP.

Then She made a media for teaching. She used sticking media to teach because there was not LCD in the school. It contained the example procedure text.

She also prepared some papers to teach collocation. She delivered some papers for each group. The paper was used to write the collocation.

The researcher also prepared an observation checklist. The purpose was to know the students' participation and respond in the class.

The last, She prepared exercises for test. The test had been done to know the students' competence and the result of the teaching.

From the planning, the researcher used lesson plan to implement activities which would be done. The researcher used KTSP format for her lesson plan, because the school still used KTSP. There were there parts of activities such pre-activities, main activities, and post activities.

In pre-activities, the researcher prepared all of thing needed for teaching and started to teach students. Firstly, the researcher greeted students, checked student's attendance. Then in the main activities the researcher divided students into five groups. Each group learned vocabulary trough collocation enthusiastically. And in the post activities the researcher asked representative of each group to come forward and read aloud the vocabulary from the discussion.

b. Acting

There were some activities which had been done in acting. At the beginning, the researcher informed to the students that the material is about procedure text. The topic was about How to make something.

Then students were divided into five group. Each group consist of 3 until 4 students to learn vocabulary trough collocation. The researcher explain the rule of the activity. After that the researcher gave a text and white paper for each group. She asked to discuss the text and find out the collocation.

Each group made a list of vocabulary from the text into a table. The table consist of two column. '*I know the word*' and '*I don't know the word*'. The wrote some vocabularies in column '*I know the word*' if they knew the meaning of the word. And they wrote some difficult vocabulary in column '*I don't know the word*' if they didn't know the meaning.

Then the researcher asked the students to choose a difficult word from the list. The difficult word was written in the centre, and they have to circle the word in the centre of paper.

After that the researcher asked the students to find out the words which were suitable to follow and related to the word in the circle based on the meaning as many as possible. The words were written in form of spidergram.

Then After the researcher asked the representative of each group to show the result of the spidergram in front of the class.

Researcher checked the correctness of the task with the students together. The researcher also gave conclusion about the material which had been learned.

The last, the researcher gave students a test to measure student's achievement in the first cycle.

c. Observing

In observation step, the researcher observed the event that happened during teaching and learning process. The researcher observed the activity by using the observation guide. The step were as follows:

1. The researcher observed the activeness and attention of students in the classroom during teaching learning process.

2. The researcher observed the students' response when they were asked by teacher
 3. The researcher observed the students' task, they accomplished the task or not
- d. Reflecting

There were students who were not involved by using spidergram. They were still passive and didn't join in the discussion. So, it must be revised to involved whole students in using spidergram for the next cycle.

There were some students still confused to find out the suitable word which was relevant in the spidergram . So, it must made the students more understand in the next cycle. She also had to make clearer instruction in the next cycle.

Some students were still unconfident when they read a text and the result of their spidergram. So, the researcher had to give motivation to the students in the next cycle.

After the researcher and the collaborator evaluate the score and observation checklist, the researcher decided to conduct the next cycle better.

3. Second Cycle

The Second Cycle was done based on the result of reflection in the first cycle. It was conducted on May 24, 2016. It was same with the first cycle. It contained of teaching learning process through spidergram. But, the material is different. So, The are some new vocabulary from the text.

The problem in the first cycle in the first cycle were some students still had difficulties to find out the the words which were

suitable to follow and related to the word in the centre of spidergram, and there were some students not involved discussion well. So, the researcher tried to encourage to find out the problem solving. She made clearer instruction in this cycle. She tried to improve her attention to the students activity during learning process. She also gave motivation to students. The complete procedure could be seen as follows:

a. Planning

The researcher did some activities in planning of cycle two. First, she identified the problem in the first cycle and found the way to solve the problem. She also made a lesson plan to teach in cycle two. The material was procedure text with different title from cycle 1.

Then the researcher prepared a media for teaching. She showed an example of procedure text in a big paper. She stamped the paper on the blackboard in front of the class.

She also prepared some papers for using spidergram in the teaching learning. Students needed the white papers to write some words in the spider gram .

The last, the researcher prepared observation checklist and exercises for students. She prepared the observation checklist to know the students participation in second cycle, and prepared the exercises for test.

b. Acting

The researcher did some activities in acting of second cycle. First, the researcher informed to the students about the material. the material had same topic. But, the title is different.

Second, the researcher divided students into 5 groups to learn vocabulary through spidergram. Teacher explained the rule of the activity. then she gave a text and exercises to each group. The exercises consist of five questions. she also gave a white paper to write the collocation.

Each group made a list of vocabulary from the text into a table. The table consist of two column. '*I know the word*' and '*I don't know the word*'. The wrote some vocabularies in column '*I know the word*' if they knew the meaning of the word. And they wrote some difficult vocabulary in column '*I don't know they word*' if they didn't know the meaning.

Then, the researcher asked the students to choose a difficult word from the list. The difficult word was written in the centre, and they have to circle the word in the centre of paper. She asked the students to find out some words which were suitable and relevant to follow the word in the centre as many as possible. The words were written in form of spidergram.

After that the teacher asked the representative of each group to show the result of the spidergram in front of the class. Researcher checked the correctness of the task with the students together. the researcher also gave conclusion about the material which had been learned.

The last the researcher gave students a test to measure student's achievement in the second cycle

c. Observing

In observation step during cycle 2 did not different from the previous cycle, The researcher also observed the events that

happened during teaching and learning process. The researcher observed the activity by using observation guide. The steps were as follows:

1. The researcher observed the activeness and attention of students in the classroom during teaching learning process.
2. The researcher observed the students response when they were asked about the material.
3. The researcher observed the students' task, they accomplished the task or not.

d. Reflecting

The analysis of the second cycle showed that the result was better than the first cycle. There was improvement from first cycle to second cycle. In the first cycle the mean of score was 85,88 And the mean of score in the second cycle was 88, 82. The result in the second cycle made researcher was satisfied.

B. The Analysis of the Result

1. Pre Cycle

In this cycle, the teacher taught procedure text about how to make thing. The topic is food. In this case, the teacher did not use media to support the teaching learning. He just asked the students to read the text and vocabulary. The teacher read the vocabulary and the meaning, and then asked the students to repeat after him. He also asked

to students to memorize some vocabularies in the procedure text. It made the students bored.

The students did not show their activeness. They only tried to read and memorize the vocabulary. Some of them did not pay attention to the teacher's explanation. They looked sleepy in the class. After that the researcher give a test to measure the students' competence.

Table 1
The observation checklist of pre cycle

INDICATORS	Total of Students			
	Yes	%	No	%
Paying Attention	8	47,06 %	9	52,94 %
Asking Question	2	11,76 %	15	88,23 %
Responding to Question	4	23,52 %	13	76,47 %
Accomplishing Task	8	47,06%	9	52,94 %
Being enthusiastic to English learning	7	41,17 %	10	58,82 %

Then the percentage of the observation score was found out by this formula:

$$\text{Score} = \frac{\text{Total Score}}{\text{Maximum Score}} \times 100\%$$

According to data of observation checklist above, it can be concluded that only less of students are active and enthusiastic in the learning process. The major of students were not active in the class. It

could be seen from their participation in asking question, responding question, and accomplishing task. It showed that the students needed different learning technique to improve their motivation and participation.

Then, the score of test had been counted as follow:

Table 2
Score of Test in Pre Cycle

No	Student's Name	Score
1	A Jauhari	25
2	A Sugiyanto	85
3	Abdul Aziz	45
4	Ainur Rohmah	60
5	Bayu Firman Maulana	45
6	Dolim	50
7	Dzakirun Mustofa	45
8	Kholifatun	50
9	M Khasib Kamil	70
10	Muwaffaqah	65
11	Rohmatun Nikmah	60
12	Siti Rohmawatul Hikmah	65
13	Siti Zahroh	65
14	Siti Zuliyah	70
15	Wasiatun Najah	70
16	Wasitotul Munawaroh	45
17	Wulandari	60
	Total Score	975

To know the mean of students' score, the formula is as follow:

$$M = \frac{\sum X}{N}$$

M = The average of students' score

$\sum X$ = Total Score

N = The number of students

$$M = \frac{\sum X}{N}$$

$$= \frac{975}{17}$$

$$= 57,35$$

2. First Cycle

In this cycle the researcher began to implement spider gram to learn vocabulary. The material was procedure text about How to make something. The topic was about food. In the first cycle, the collaborator also did observation as below:

Table 3

The observation checklist of first cycle

INDICATORS	Total of Students			
	Yes	%	No	%
Paying Attention	12	70,58 %	5	29,41 %
Asking Question	11	64,70%	6	35,29 %
Responding to Question	12	70,58 %	5	29,41 %
Accomplishing	17	100%	0	0%

Task				
Being enthusiastic to English learning	12	70,58%	5	29,41%

Then the percentage of the observation score was found out by this formula:

$$\text{Score} = \frac{\text{Total Score}}{\text{Maximum Score}} \times 100\%$$

Based on data of observation checklist above, it can be concluded that there were differences between before and after applied spidergram. Students joined English learning enthusiastically. They were more paid attention and active in the class. It could be seen from percentage of paying attention, asking question and responding to question.

Then after giving test to the students, the researcher gave the score as the result of the test. The score of all students had been counted as follow;

Table 4
Score of Test in Cycle I

No	Student's Name	Score
1	A Jauhari	95
2	A Sugiyanto	95
3	Abdul Aziz	60
4	Ainur Rohmah	85

5	Bayu Firman Maulana	90
6	Dolim	80
7	Dzakirun Mustofa	70
8	Kholifatun	70
9	M Khasib Kamil	95
10	Muwaffaqah	100
11	Rohmatun Nikmah	85
12	Siti Rohmawatul Hikmah	95
13	Siti Zahroh	85
14	Siti Zuliyah	80
15	Wasiatun Najah	100
16	Wasitotul Munawaroh	90
17	Wulandari	85
	Total score	1460

$$M = \frac{\sum X}{N}$$

M = The average of students' score

$\sum X$ = Total score

N = The number of student

$$\begin{aligned}
 M &= \frac{\sum X}{N} \\
 &= \frac{1460}{17} \\
 &= 85,88
 \end{aligned}$$

From the result above, there was significant improvement compared with the result of Pre cycle. The mean of score was 85,88. But, the researcher was less satisfied because there was student still get score under 70. It should be increased again to make the research more successful. So, she tried to conduct better in the next cycle.

3. Second Cycle

In the second cycle the researcher used spidergram again. The material was procedure text. The topic was food. But, the title was different from the first cycle. In The researcher also more paid attention to the students. She also reminded the students about the regulation of using spidergram in their discussion. She made the instruction clearer in this cycle. So, the students were more understand to do the activity.

In this cycle the collaborator also did observation in the class as below:

Table 5
The observation checklist of second cycle

INDICATORS	Total of Students			
	Yes	%	No	%
Paying Attention	17	100%	0	0%
Asking Question	13	76,47%	4	23,52%
Responding to Question	15	88,23%	2	11,76%
Accomplishing Task	17	100%	0	0%
Being enthusiastic to	17	100%	0	0%

English learning				
------------------	--	--	--	--

According to result of the observation checklist above, the students was involved in the teaching learning process. They was more enthusiastic and active in the class. They participated well in teaching learning process. The asked some questions related to the topic. They also discussed well. It made different atmosphere in the class.

After that the researcher did a test for second cycle. Then the researcher compared the result of this test with the result of previous test.

Table 6
Score of Test in Cycle II

No	Student's Name	Score
1	A Jauhari	85
2	A Sugiyanto	90
3	Abdul Aziz	80
4	Ainur Rohmah	90
5	Bayu Firman Maulana	90
6	Dolim	90
7	Dzakirun Mustofa	85
8	Kholifatun	80
9	M Khasib Kamil	100
10	Muwaffaqah	100
11	Rohmatun Nikmah	75
12	Siti Rohmawatul Hikmah	85
13	Siti Zahroh	90

14	Siti Zuliyah	95
15	Wasiatun Najah	100
16	Wasitotul Munawaroh	85
17	Wulandari	90
	Total score	1510

$$M = \frac{\sum X}{N}$$

M = The average of students' score

$\sum X$ = Total score

N = The number of student

$$M = \frac{\sum X}{N}$$

$$M = \frac{1510}{17}$$

$$= 88,82$$

The analysis in the second cycle showed that the result of the test is better than pre cycle and first cycle. The improvement in the second cycle might be caused by reflecting in the first cycle. In is second cycle the researcher more paid attention to the students. She also gave some questions related to the procedure text. So, the vocabulary was more meaningful in their mind.

C. The Analysis of Whole Cycle

1. The result of test

The result of the test from the pre cycle until second cycle can be seen in the table below:

Table 7

No	Name	Pre cycle	Cycle 1	Cycle 2
1	A Jauhari	25	95	85
2	A Sugianto	85	95	90
3	Abdul Aziz	45	60	80
4	Ainur Rohmah	60	85	90
5	Bayu Firman Maulana	45	90	90
6	Dolim	50	80	90
7	Dzakirun Mustofa	45	70	85
8	Kholifatun	50	70	80
9	M Khasib Kamil	70	95	100
10	Muwaffaqoh	65	100	100
11	Rohmatun Nikmah	60	85	75
12	Siti Rohmawatul Hikmah	65	95	85
13	Siti Zahroh	65	85	90
14	Siti Zuliyah	70	80	95
15	Wasiatun Najah	70	100	100
16	Wasitotul Munawaroh	45	90	85
17	Wulandari	60	85	90
	Sum	975	1460	1510
	Average	57,35	85,88	88.82
	Min	25	60	75
	Max	85	100	100

Table 8

Comparison the average of Students' scores o Pre Cycle, Cycle
1, Cycle 2

No	Cycle	Mean
1	Pre Cycle	57,35
2	First Cycle	85,88
3	Second Cycle	88,82

The average of students' score in pre cycle was 57,35. It showed that the result was not good. In the first cycle, the average of students' score was 85,88. It showed that there was improvement after applied spidergram. That was good result. In the second, the average of students' score was 88, 88. The result of second cycle better than the first cycle. There was also improvement and the result was more satisfying. So, the use of spider gram to enrich students' vocabulary in procedure text at seventh grade of MTs Manba'ul Ilmin Nafi' was success. It could be seen from their score in the first cycle and second cycle. There was significant improvement.

2. The result of observation

Classroom observation checklist was used to observe students' behavior during teaching learning process. The students' was observed by the English teacher in the class. The observation was done to find out the students activeness and students participation in the learning process. The observation checklist were include paying attention, asking question, responding to question, accomplishing task, and being enthusiastic to learning English.

The result of the observation checklist from pre cycle until second cycle as follow:

Indicators	Total of Students
------------	-------------------

	Pre Cycle	Cycle 1	Cycle 2
Paying Attention	8	12	17
Asking Question	2	11	13
Responding to Question	4	12	15
Accomplishing task	8	17	17
Being enthusiastic to English learning	7	12	17

From the data above, it could be analyzed by calculating the percentage from the checklist as the pattern below:

Indicators	Pre Cycle	Cycle 1	Cycle 2
Paying Attention	47,06 %	70,58 %	100 %
Asking Question	11,76 %	64,70 %	76,47 %
Responding to Question	23,52 %	70,58 %	88,23 %
Accomplishing task	47,06 %	100 %	100 %
Being enthusiastic to English learning	41,17 %	70,58 %	100 %

a. The Students' Attention to the Teacher

There were 8 students paid attention to the teacher's explanation during pre cycle. Some of them were noise, talked with their classmates, and sleepy. So it showed that was less attention from the students

In cycle 1, the number of students who paid attention was increased. There were 12 students paid attention to the researcher's

explanation during treatment. I began to use spidergram in this cycle. Most of students focused to the researcher's explanation. But there were 5 students still did not pay attention. They did something else such as talked with their friend and drew something in their book.

After that, all of students in the class paid attention to the teacher's explanation in cycle 2. There were 17 students in the class. They looked paid attention more serious. All f them focused to the explanation.

Overall, the result of observation in students' attention toward explanation was increase from pre cycle, cycle 1, until cycle 2.

b. Asking Question

The second indicator which was observed was asking question. I observed how many students who asked question in the teaching learning process. It included students' activeness and students' participation. There were only 2 students asked question in pre cycle. The other students just kept silent and looked afraid to ask something. It showed that their activeness were still poor. They were not participate well in the class.

In cycle 1, the number of students' asked question increased. There were 11 students asked question in this cycle. Students were more active in this cycle. They participated well in the class. They asked question about vocabulary, meaning, and how to find the collocation. But, there were still 6 students just silent and did not ask something to the researcher.

The result of cycle 2 showed that the number of students who active in the class increased from 11 to 13 students. Most of them were more confident to ask. Some of them asked about new vocabulary and they tried to remember it.

Overall, the result of observation during pre-test, cycle 1, and cycle 2 in asking question was increased. Students became active step by step.

c. Student's Respond to Question

The third indicator in the observation was student's respond to question. The researcher and the teacher observed how many students who responded and answered to question orally. Beside that, the researcher and the teacher also observed if the response positive or negative.

In pre cycle, There were only 4 students responded to question from the teacher. It showed that the result was poor, because 13 students did not respond to the question. Most of them looked lazy to respond and some of them were confuse to respond.

The result of cycle 1, there were 12 students responded to questions from researcher. It showed that the response increased from 4 to 12. This was good result. They showed their spirit to answer and respond some questions from the researcher. But, There were still 5 students still did not give their response. Might be they did not understand well with the material.

Then, in the cycle 2 students showed their spirit well to respond some questions from the researcher. The result was increase from 12 students to 15 students responded questions.

Most of them looked enthusiastic and more understand to answer some questions from the researcher

So, there was progress from the students in each cycle. It could be seen from the number of students who respond to question in each cycle.

d. The students' Accomplishing Task

The fourth indicator in the observation was students' accomplishing task in learning vocabulary. There were 8 students who did the task well. Most of them were still confused to accomplish the task from the teacher. There were 9 students who did not accomplish the task well. They were not serious. They just daydreamed, talked with their friend and made a noise.

The number of students who accomplished the task seriously increased 17 in cycle 1. All of students in the class did the task well. They did the task seriously. They felt that the use of spidergram in learning vocabulary was very useful for them. That was different way for hem in learning vocabulary. So, they looked entertained to accomplished the task.

In cycle 2, the number of students who accomplished the task were still same with in cycle 1. There were 17 students who accomplished the task well. It mean that all of students accomplished the task. They were more serious and spirit in this cycle than in the first cycle.

Overall, the result of observation showed that the students' seriousness in accomplishing the task increased from pre cycle until cycle 1 and cycle 1.

e. The students being Enthusiastic in English learning.

The fifth indicator in the observation was students enthusiastic in learning English. Many students thought that English was very difficult lesson to learn. It made only 7 students who were interested in English learning in pre cycle. They did not show their enthusiastic in English learning. They looked did not have motivation to learn. They felt bored with the teacher's method

In cycle 1, the number of students being enthusiastic increased significantly. There were 12 students being enthusiastic in English learning. They looked spirit and interested in learning process. They were more active in the class. They tried to discuss and did the activity well.

Then in the cycle 2, all of students in the class were enthusiastic in learning English. There were 17 students in the class. They were more active and full of spirit in their discussion. The activity increased their motivation in English learning.

Overall, the result of observation in aspect students being enthusiastic in English learning increased from pre cycle, cycle 1, and cycle 2. It could be seen from the students number who being enthusiastic in each cycle.

RENCANA PELAKSANAAN PEMBELAJARAN

(Pre - Cycle)

Nama sekolah	: MTs Man'baul Ilmin Nafi'
Mata Pelajaran	: Bahasa Inggris
Kelas/Semester	: VII (Tujuh) / 2
Standar Kompetensi	: 11. Membaca Memahami makna teks tulis fungsional dan esai pendek sangat sederhana berbentuk <i>descriptive</i> dan <i>procedure</i> yang berkaitan dengan lingkungan terdekat
Kompetensi Dasar	: 11.2 Merespon makna dan langkah retorika secara akurat, lancar dan berterima dalam esai sangat sederhana yang berkaitan dengan lingkungan terdekat dalam teks berbentuk <i>descriptive/ procedure</i>
Aspek/Skill	: Membaca
Alokasi Waktu	: 2 x 40 menit

Tujuan Pembelajaran:

Pada akhir pembelajaran, siswa dapat memahami makna teks tulis fungsional dan esai pendek sangat sederhana berbentuk *descriptive* dan *procedure* yang berkaitan dengan lingkungan terdekat

❖ Karakter siswa yang diharapkan :

Dapat dipercaya (*Trustworthines*)

Rasa hormat dan perhatian (*respect*)

Tekun (*diligence*)

Tanggung jawab (*responsibility*)

Materi Pembelajaran

Teks monolog berbentuk *deskriptive/procedure*

Kosakata terkait tema / jenis teks.

Ciri kebahasaan teks :

- *procedure*

- *descriptive*

Metode Pembelajaran: Three phase technique

Langkah-Langkah Kegiatan

Pertemuan Pertama Dan Kedua.

A. Kegiatan Pendahuluan

Apersepsi :

- Tanya jawab mengenai teks tulis fungsional dan esai pendek sangat sederhana berbentuk *descriptive* dan *procedure* yang berkaitan dengan lingkungan terdekat

Motivasi :

- Menjelaskan pentingnya materi yang akan dipelajari berikut kompetensi yang harus dikuasai siswa

B. Kegiatan Inti

Eksplorasi

Dalam kegiatan eksplorasi, guru:

- ☞ Melibatkan peserta didik mencari informasi yang luas dan dalam tentang topik/tema materi yang akan dipelajari dengan menerapkan prinsip alam takambang jadi guru dan belajar dari aneka sumber;
- ☞ Memperhatikan penjelasan tentang kosakata dan tatabahasa yang berkaitan dengan teks deskriptif/prosedur yang akan dibaca
- ☞ Menggunakan beragam pendekatan pembelajaran, media pembelajaran, dan sumber belajar lain;
- ☞ Memfasilitasi terjadinya interaksi antarpeserta didik serta antara peserta didik dengan guru, lingkungan, dan sumber belajar lainnya;

- ☞ Melibatkan peserta didik secara aktif dalam setiap kegiatan pembelajaran; dan
- ☞ Memfasilitasi peserta didik melakukan percobaan di laboratorium, studio, atau lapangan.

Elaborasi

Dalam kegiatan elaborasi, guru:

- ☞ Membiasakan peserta didik membaca dan menulis yang beragam melalui tugas-tugas tertentu yang bermakna;
- ☞ Memfasilitasi peserta didik melalui pemberian tugas, diskusi, dan lain-lain untuk memunculkan gagasan baru baik secara lisan maupun tertulis;
- ☞ Memberi kesempatan untuk berpikir, menganalisis, menyelesaikan masalah, dan bertindak tanpa rasa takut;
- ☞ Memfasilitasi peserta didik dalam pembelajaran kooperatif dan kolaboratif;
- ☞ Memfasilitasi peserta didik berkompetisi secara sehat untuk meningkatkan prestasi belajar;
- ☞ Memfasilitasi peserta didik membuat laporan eksplorasi yang dilakukan baik lisan maupun tertulis, secara individual maupun kelompok;
- ☞ Memfasilitasi peserta didik untuk menyajikan hasil kerja individual maupun kelompok;

- ☞ Memfasilitasi peserta didik melakukan pameran, turnamen, festival, serta produk yang dihasilkan;
- ☞ Memfasilitasi peserta didik melakukan kegiatan yang menumbuhkan kebanggaan dan rasa percaya diri peserta didik.

Konfirmasi

Dalam kegiatan konfirmasi, guru:

- ☞ Memberikan umpan balik positif dan penguatan dalam bentuk lisan, tulisan, isyarat, maupun hadiah terhadap keberhasilan peserta didik,
- ☞ Memberikan konfirmasi terhadap hasil eksplorasi dan elaborasi peserta didik melalui berbagai sumber,
- ☞ Memfasilitasi peserta didik melakukan refleksi untuk memperoleh pengalaman belajar yang telah dilakukan,
- ☞ Memfasilitasi peserta didik untuk memperoleh pengalaman yang bermakna dalam mencapai kompetensi dasar:
 - Berfungsi sebagai narasumber dan fasilitator dalam menjawab pertanyaan peserta didik yang menghadapi kesulitan, dengan menggunakan bahasa yang baku dan benar;
 - Membantu menyelesaikan masalah;

- Memberi acuan agar peserta didik dapat melakukan pengecekan hasil eksplorasi;
 - Memberi informasi untuk bereksplorasi lebih jauh;
 - Memberikan motivasi kepada peserta didik yang kurang atau belum berpartisipasi aktif.
- ☞ Guru bertanya jawab tentang hal-hal yang belum diketahui siswa
 - ☞ Guru bersama siswa bertanya jawab meluruskan kesalahan pemahaman, memberikan penguatan dan penyimpulan

C. Kegiatan Penutup

Dalam kegiatan penutup, guru:

- ☞ bersama-sama dengan peserta didik dan/atau sendiri membuat rangkuman/simpulan pelajaran;
- ☞ melakukan penilaian dan/atau refleksi terhadap kegiatan yang sudah dilaksanakan secara konsisten dan terprogram;
- ☞ memberikan umpan balik terhadap proses dan hasil pembelajaran;
- ☞ merencanakan kegiatan tindak lanjut dalam bentuk pembelajaran remedi, program pengayaan, layanan

konseling dan/atau memberikan tugas baik tugas individual maupun kelompok sesuai dengan hasil belajar peserta didik;

☞ menyampaikan rencana pembelajaran pada pertemuan berikutnya.

LESSON PLAN

(Pre - Cycle)

School Name : MTs Man'baul Ilmin Nafi '

Subject : English

Class / Semester : VII (seven) / 2

Standard of Competence : 11. Reading

Understand the meaning of the functional written text and very simple short essay form *of descriptive* and *procedure* relating to the immediate environment

Basic Competence : 11.2 Respond to the meaning and rhetoric steps accurately, fluently and accepting in a very simple essay related to the immediate environment in the form *of descriptive* text / *procedure*

Aspect / Skill: Reading

Time Allocation: 2 x 40 minutes

Learning objectives

At the end of the lesson, students can understand the functional meaning of the text and write a very simple short essays a in the form *of descriptive* and *procedure* relating to the immediate environment

- **Students' character are expected:** Trustworthiness

Respect

diligence

responsibility

Learning materials:

Descriptive monologue form or *procedure*

Vocabulary related to the theme or text type.

Language Features of text:

-procedure

-descriptive

Learning Methods: Three phase technique

Steps Activity

First And Second Meeting.

A. Pre-Activities

Apperception

- Questions and answers about writing text and very simple form *of descriptive* and *procedure* relating to the immediate environment

Motivation:

- Explains the importance of the material that will be learned and must be mastered by students

B. Core Activities

Exploration

In exploration activities, the teacher:

- Involves learners seek broader and deeper information about the topic or theme of the material to be studied by applying natural principles of being a teacher and learning from a variety of sources;
- Pays attention to explanation of vocabulary and grammar relating to the descriptive or procedure text that will be read
- Uses a variety of learning approaches, instructional media, and other learning resources;
- Facilitates the interaction between all learners and between learners and teachers, environment, and other learning resources.
- Involves learners actively in any learning activities and
- Facilitates learners to experiment in the laboratory, studio, or field.

Elaboration

In the elaboration of activities, teacher:

- Customizes learners to read and write in variation through certain meaningful tasks.
- Facilitates learners by giving assignments, discussions, and others to come up with new ideas both orally and in writing.
- Provides an opportunity to think, analyze, solve problems, and act without fear.
- Facilitates learners in cooperative and collaborative learning.
- Facilitates learners in a healthy competition to improve learning achievement.
- Facilitates learners make good exploration report made orally or in writing, individually or in groups;
- Facilitates learners to present individual and group work.
- Facilitates learners do exhibitions, tournaments, festivals, as well as products produced
- Facilitates learners engage in activities that grow pride and self-confidence of learners.

Confirmation

In confirmation of activities, teacher:

- Gives positive feedback and reinforcement in the form of oral, written, signed, and gifts to the success of learners,
- Provides confirmation of the results of exploration and elaboration of learners through a variety of sources,
- Facilitates learners to reflect to gain a learning experience that has been done,
- Facilitates learners to gain significant experience in achieving the basic competencies by:
 - Serves as a resource and facilitator in answering questions of students who faced difficulties, using standardized language and correct.
 - Helps solve the problem;
 - Gives reference so that learners can check the results of exploration.
 - Provides information for further exploration.
 - Provides motivation to learners who lack or have not actively participated.
- Teachers ask questions about things that are not yet known by students

- Teachers together students use question and answer to confirm misconceptions, provide reinforcement and inference.

C. Closing Activities

In the closing activity, the teacher:

- together with the learners and or his self makes a summary or concluding lesson
- Assesses and reflections of the activities that have been carried out consistently and well managed.
- Provides feedback on the process and learning outcomes
- Plans follow-up activities in the form of remedial learning, enrichment programs, counseling services and provides good task assignments individually or in groups according to the results of learners
- Delivers the lesson plan at the next meeting.

Learning Resources

- The relevant text books
- CD/Cassette
- *Script* conversations and / or recording conversations
- The relevant picture

LESSON PLAN OF CYCLE I

School : MTs Manba'ul Imin Nafi'

Subject : English

Class/Semester : VII/2

Theme : How to make things

Skill : Reading

Duration : 2 X 40 minutes

A. Standard of competence

understand the meaning of the short functional written text and very simple short essay form of descriptive and procedure relating to the immediate environment

B. Basic Competence:

1. Respond to the meaning and rhetoric steps accurately, fluently and accepted in a very simple essay related to the immediate environment in the form of procedure text
2. Read aloud a meaningful functional text and very simple short essay form of procedure by pronunciation, stress and intonation are acceptable.

C. Indicator:

1. Identifying the variety information in the procedure text
2. Identifying about vocabulary and grammar relating to the procedure text that will be read

3. Mentioning the language feature of procedure text
4. Pronouncing words, phrases and sentences properly
5. Reading words, phrases and sentences with correct intonation
6. Reading aloud the procedure text well and correctly

D. Learning aim

By the end of the lesson, the students are able to:

1. Pronounce words, phrase, and sentences correctly
2. Mention the variety vocabularies relating to the procedure text.

E. Method: reading, and discussion

F. Technique: Spidergram

G. Learning material

1. Definition of Procedure Text

Procedure text is piece of text that gives us instruction for doing something. A procedural text is used to do or make something. The social function of procedure text is to describe how something is accomplished through a sequence of action or steps.

2. **Generic Structure:**

- Goal
- Materials
- Steps

3. **Language Feature:**

- a. Using Simple Present Tense and Using an imperative form (Prepare mushrooms, add some sugar, etc.)
- b. Using temporal conjunction (connectives) : (First, firstly, second, secondly, then, after that ... etc)
- c. Use mainly of *Material Processes*

The material of the procedure text is How to make a fruit ice (Es buah)

How to make fruit ice

Material:

- Ice
- Apple
- Strawberries
- Jackfruit
- Melon
- Mango
- Avocado

- sugar water
- milk

Steps :

First, Peel the apple, avocado, melon, mango and jackfruit.

Second, Cut the fruits round or dice

Then, Boil sugar with water until cooked for about 30 minutes.

Next, Put the fruits that have been cut round pieces or dice in serving glass

Then, to taste Pour the sugar water into a glass

Next, put ice cubes into the glass, and pour the milk on ice fruit.

Last, put the decorations on the glass with a piece of strawberry on it.

4. Vocabularies

Action verbs:

- a. Peel = Mengupas
- b. Cut = Memotong
- c. Boil = Merebus
- d. Put = Meletakkan
- e. Chop = Mencincang
- f. Slice = Mengiris

- g. Heat = Memanaskan
- h. Fry = Menggoreng
- i. Add = Menambahkan

H. Learning Activities

Activities	Time	Sample of
<p>Pre- activities</p> <ul style="list-style-type: none">• Teacher greets students• Teacher asks the students to prayer• Teacher checks students attendance• Teacher gives stimulus to the students• Teacher tells the goal of the study	<p>10 minutes</p>	<ul style="list-style-type: none">• Asssalamualaikum wr.wb. Good morning students. How are you today?• Lets open our lesson today by reciting Basmallah together• Who is absent today?• What's your favorite food?• In our meeting today we will learn about procedure text. We will learn the generic structure, language feature and also the vocabularies in the text

- Teacher gives motivation to the students

Main Activities

Exploration

- Teacher show a procedure text in front of the class (by sticking a text in the blackboard)
- Teacher ask one of students to read the text in front of the class
- Teacher stimulates the students to find out the generic structure of the

- Ok students.... Let's start our lesson today with full of spirit and

- Ok student's. Let's see the text. What do you think about the text?

- Who want to read this text?. Ok, Please (the name of student) come forward and read this text.

- Do you know why I give different color in this sentence? Can you mention where the ingredient is?

<p>procedure text</p> <ul style="list-style-type: none">• Teacher show the language feature of the text • Teacher points the action verbs in the text and show the meaning • Teacher pronounce the action verb and asks the students to imitate her. <p><i>Elaboration</i></p>	<p>50 minutes</p>	<ul style="list-style-type: none">• From the sentence in the text, we can mention the language feature of the text. The text using temporal conjunction (first, second, then, or next). Can you find the other language feature? • In imperative form of the sentence, we will focus on action verb , such as (boil, stir, pour, and etc). • Okay, I will pronounce these words and please repeat after me!
---	-------------------	---

<ul style="list-style-type: none">• The teacher divides the students into 4 or 5 groups.• The teacher gives the text for each groups• The teacher asks the teacher to read the text • The teacher asks the students make a list of the action verb in the text in the		<ul style="list-style-type: none">• Okay... I will divide you into four group • Okay, I give you a text. This is an procedure text • Please, read the text carefully! • After read the text, please analyze the action verb in the text. And then make a list of the verbs. You will make two column “ I know the word” and “I don’t know the word”. If you know the meaning of the word , please write the word in a column, “I know the word ,”and also give the meaning of
--	--	--

- The teacher asked the students to make a Spidergram
- The teacher asks the students to write the word that they don't know the meaning in a circle
- The teacher asks the students to find out some words which are

word. If you don't know the meaning of the word, please write the word in column "I don't know the word".

- Please start to make a Spidergram on your paper!
- After that please write the word that you don't know the meaning in a circle form in the centre of paper!
- Then, please find out some words which are suitable to follow and related to the word in the circle !. For example:

suitable to follow and related to the word in the circle

- The teacher asks the representative of each groups to show the result their work

Confirmation

- Teacher give reviews by checking the correctness of the task and show the Spidergram in

Peel **the potato**, peel **the onion**. Please make it in form of Spidergram!

- Okay....Please, one of representative of each group to come forward and show your work result

- Okay, now we are going to check the correctness of the task together. I also will show the true vocabulary in the Spidergram.

the blackboard

Post-activities

- Teacher and students conclude the lesson

- Teacher give a test

- Teacher gives motivation to the students
- The teacher

20 minutes

- Okay I will conclude our material today. We learn about procedure text. We learn about the generic structure and the language feature of the text. And don't forget that there are many action verb in procedure text that very important to learn.

- Well.... I will give you a test to check your understanding about our lesson today.
- Please improve your English by studying at home
- Okay....I think enough

closes the
meeting

for our meeting today.
Thank you for your nice
attention. Let's close our
meeting today by reciting
handallah together.
Wassalamualaikum

FIRST CICLE

Reflection Journal of Cycle 1

On May 22th, 2016 I entered the Class of Seventh B to teach. I started to greet the student with spirit. They responded well my greeting, but some of them looked doubt and shy. I had

prepared a lesson plan for the day. I also prepared a teaching media for them. I brought a big paper and I stamped the paper on the blackboard. There was no LCD in this school. So, I used paper as medium. The content of the paper was an example of procedure text. The topic was about food. I taught a procedure text. But, my focus was in vocabulary.

I asked some students to read the paper in front of the class. But , some of them were still shy. Their voice was low. Then I asked them to focus on vocabulary in the text, exactly on action verb. I tried to ask the meaning of vocabularies. But, Most of them were still confused. Then I helped them to show the meaning. I tried to make them enjoy in learning. I practiced the vocabulary with gesture. Then I asked them to imitate me. They looked fun.

I wanted to make the students in this class be more active. I divided them into some groups. Then I delivered a white paper and an example of procedure text. I started to teach

vocabulary through Spidergram. Most of them looked enthusiastic to do this activity. But, there were still some students did not join this activity well. They did not pay attention well to me. So, I asked them to be focus more. I tried to ask their attention by saying “Hello” or “Hi”. Then I explained the procedures of this activity. They paid attention to me. I also asked them to ask question about this activity if they did not understand well. There were some students asked me about this activity. This was positive signal that they were enthusiastic and be more active. But, There were some students still unconfident to ask and respond questions. So, I had to give them motivation to became more confident in the class. Then they did the task to find out some suitable vocabularies form of Spidergram. They accomplished the task well. They discuss with their group well. They did all of the activities until finished.

The last the teacher and I evaluated the students score in the first cycle. There was improvement compared to the result of Pre cycle. The mean of score was 85,5. But, I less satisfied because there was a student still get score under 70. It should be increased again to make the research more successful.

LESSON PLAN OF CYCLE II

School : MTs Manba'ul Imin Nafi'

Subject : English

Class/Semester : VII/2

Theme : How to make things

Skill : Reading

Duration : 2 X 40 minutes

L. Standard of competence

understand the meaning of the short functional written text and very simple short essay form of descriptive and procedure relating to the immediate environment

M. Basic Competence:

3. Respond to the meaning and rhetoric steps accurately, fluently and accepted in a very simple essay related to the immediate environment in the form of procedure text
4. Read aloud a meaningful functional text and very simple short essay form of procedure by pronunciation, stress and intonation are acceptable.

N. Indicator:

7. Identifying the variety information in the procedure text
 8. Identifying about vocabulary and grammar relating to the procedure text that will be read
 9. Mentioning the language feature of procedure text
 10. Pronouncing words, phrases and sentences properly
 11. Reading words, phrases and sentences with correct intonation
 12. Reading aloud the procedure text well and correctly
- O. Learning aim

By the end of the lesson, the students are able to:

3. Pronounce words, phrase, and sentences correctly
 4. Mention the variety vocabularies relating to the procedure text.
- P. Method: TPR, reading, and discussion
- Q. Technique: Spidergram
- R. Learning material

1. Definition of Procedure text

Procedure text is piece of text that gives us instruction for doing something. A procedural text is used to do or make something. The social function of procedure text is to describe how something is accomplished through a sequence of action or steps.

2. **Generic Structure:**

- Goal
- Materials
- Steps

3. Language Feature:

- d. Using Simple Present Tense and Using an imperative form (Prepare mushrooms, add some sugar, etc.)
- e. Using temporal conjunction (connectives) : (First, firstly, second, secondly, then, after that ... etc)
- f. Use mainly of *Material Processes*

The material of the procedure text in this meeting is How to make indomie fried noodle

How To Make Indomie Fried Noodle

MATERIALS :

- One pack of instant noodle
- Water

STEPS:

- First, boil two glasses of water in a pan.
- Then, open the package of Indomie fried noodles.
- While waiting for the water to boil, pour the seasoning: chili sauce, soya sauce and oil into a bowl.
- After the water is boiled, drain the noodles.
- Next, throw away the water.
- Then, pour the noodles into the bowl.
- After that, mix the noodles with the seasoning, sauce, and the other ingredients.
- Now, your noodles are ready.

4. Vocabularies:

Action Verbs:

- Boil = merebus
- Open = membuka
- Pour = menuangkan
- Drain = mengeringkan
- Throw away = membuang
- Mix = Mencampurkan
- Grill = Memanggang
- Add = Menambahkan
- Heat = Memanaskan

j. Chop = mencincang/ memotong halus

H. Learning Activities

Reflection Journal of Second Cycle

On May 24th, 2016 I entered the Class of Seventh B to teach. The activity is the same as the first cycle. I greeted the students in the class to open the lesson. In the second cycle their respond is better than the first cycle. They responded my greeting together and full of spirit. Then I showed a procedure text in a large paper with different title but the topic was still same as the first cycle. They were more confident to read vocabulary in the text. Then I asked them the meaning of some vocabularies in the text. Some of them became more confident to ask. They asked some vocabularies that they didn't know the meaning.

After that I continued the activity to teach vocabulary through Spidergram. I divided them into some groups. They joined their group well . I delivered a procedure text in a piece of paper. I asked them to focus on action word in the text. I had made bold the action verb in the procedure text. I asked them to look for the difficult word from the text, especially action verb. Then they had to looked for some words which are suitable to follow and related to the word in the circle. I allowed them to open dictionary. They looked enthusiastic to join this activity. They paid attention better than at the first cycle. They paid

attention to my explanation related to the activity. They discussed and did the activity well. They accomplished the task well.

The result score of second cycle was better than the first cycle. There was improvement from first cycle to second cycle. In the first cycle, the mean of score was 85,88, and the mean of score in second cycle was 88,82. The result in the second cycle made me satisfied.
