DEDICATION

This thesis is dedicated to:

- ❖ My beloved mother and father (Mrs. Istinah and Mr. Hadi Saputro) who always support me with material, pray, love and patience. They are the best supporter for researcher.
- ❖ My beloved sister (Erlina Windyastuti and Fitria Nidya Cantika) who always give me guidance and support for raising my dream.

ACKNOWLEDGEMENT

In the name of Allah SWT, the Most Beneficent and the Most Merciful, all praises are to Allah SWT for all the blesses so that the writer can accomplish this thesis. In addition, may Peace and Salutation be given to the prophet Muhammad (PBUH) who has taken all human being from the darkness to the lightness.

I realize that I cannot complete this final project without the help of others. Many people have helped me during the writing the final project and it would be impossible to mention of all them. I wish, to give my sincerest gratitude and appreciation to:

1. Dr. Raharjo, M. ST., as the Dean of Education and Teacher Training Faculty of Walisongo State University of Islamic Studies Semarang.
2. Dr. H. Ikhrom, M. Ag., as the Head of English Language Education Department of Education and Teacher Training Faculty.
3. Sayyidatul Fadlilah, M. Pd., as the advisor who had the responsibility for his patience in providing careful guidance, helpful correctness, and very good advice during the arrangement of this thesis.
4. All of the lecturers in English Language Education Department of Education and Teacher Training Faculty especially Mrs. Sayyidatul Fadlilah M. Pd., who have shared their useful knowledge, experiences, and given him a help so he can accomplish this thesis on time.
5. Muchammad Abdul Aziz M. Pd., as my evaluator and my colleagues in LCC Ngaliyan who has support and helpful correctness during the arrangement of this thesis.
6. My beloved family, especially my parents (Mrs. Istinah and Mr. Hadi Saputro), my lovely sister (Erlina Windyastuti and Fitria Nidya Cantika), and my nephew (Jasmin Naura Albi), who always give me support and motivation. There's no single word that I can say except "thank you very much".
7. My special one Fella Shoufa Masitha, as my investigator and evaluator of this research, who always supports and helps to finish this research. Thank you very much.
8. All beloved friends in ELT A 2012 which become my new family. Thank you very much for your motivation and support.

9. PMII Walisongo, UKM Edukasi, PPL Team and KKN Team.
10. All of staff as my partner in PKBI Kota Semarang
11. My beloved friends (Ibnu Sina, Rifqi Ihsani, Frahma, Ibnu Muzaki, and etc.) who always motivate me to do the best. Thanks a lot for your pray, support, and motivate.
12. All people who can't be mentioned one by one who help he in finishing this thesis.

The researcher realizes that this research is far from being perfect. Therefore, any constructive criticism and suggestion will be gladly accepted. The researcher hopes that this thesis beneficial to everyone. Aaamiin.

Title : SYNTACTIC ANALYSIS OF INVERSION
FOUND IN JAKARTA POST (ON
WEDNESDAY 19TH OF JULY 2017)
Researcher : Pradhita Ali Hanafi
Student Number : 123411120

ABSTRACT

Inversion is one of the important parts of grammar that should be understood by the students to understand the position of subject and verb that reversed for some purpose or on some situations. This study is to identify the kinds of inversion found in the Jakarta Post based on syntactical analysis and the contribution of the research for ELT. The objectives of this study is aimed to find out what the kinds of Inversion found in Jakarta Post are and what the contribution of the research for English Language Education Department Program. This research employed a qualitative research which used content analysis method which described the kind of English inversion found in The Jakarta Post (on Wednesday, July 19, 2017, it consists of twenty-four pages Vol, 35. No. 066. www.jakartapost.com). For collecting data, it based on syntactical analysis data which used the documentations including the book, journal, and other documents. As the results of the analysis, it showed that Inversion found in Jakarta Post are 11 types inversions contained 278 inversions sentences, 82 inversions adverbial before subject consist of Adverb+Noun phrase, 81 inversions used relative clause transformation contained a relative pronoun such as “who (or when or whose), which or that”, 4 inversions question consist of Auxillary verb+Subject+Verb or QW+Auxillary verb+Subject+Verb, I inversion after “so” (short answers) consist of So/Neither/Nor+Auxillary verb+Subject, 4 inversions after “than” (composition), 9 inversions with conditional clauses “if”, 20 inversions using adverbial expressions place comes at the beginning of a clause, intransitive verbs are often put before their subjects, 75 inversions using reporting verbs.

CHAPTER I

INTRODUCTION

A. Research Background

Every human has language to communicate with others. Allah states about the variety of language in surah Ar-Rum verse 22:

وَمِنْ آيَاتِهِ خَلْقُ السَّمَاوَاتِ وَالْأَرْضِ وَاخْتِلَافُ أَلْسِنَتِكُمْ وَالْوَالِدَاتُ إِذَا حَمَلْنَ بِحِمْلِكُمْ إِنَّ فِي ذَلِكَ لَآيَاتٍ لِّلْعَالَمِينَ ﴿٢٢﴾

*“And of His signs are the creation of the heavens and the earth, and the diversity of your languages and colours. Surely there are signs in this for all mankind. (Ar-Rum: 22)”*²

In surah above, Allah shows us the signs of His authority through differences of tongue. Tongue means a language. There are no people who have the same language in the world. It is influenced by the location. People who live in difference location have difference language. They have to cooperate with one another to complete the necessities in their life. Language has important role in human life because language is not only to communicate but also to convey the message that can express and interpret something. According to *Longman Dictionary of Applied Linguistics*, language is system of human communication by means of a structured arrangement of sound (or their written representation) to form larger unit, e.g. morphemes, words, sentences.³

Language is essentially a set of items, what Hudson calls ‘linguistic items,’ such entities as sounds, words, grammatical structures, and so on.⁴ It is these items, their status, and their arrangements that language theorists such as Chomsky concern themselves with. On the other hand, social theorists, particularly sociologists, attempt

²Mahmud Y. Zayid, *The Quran: an English Translation of the Meaning of the Quran*, (Lebanon: Dar Al-Choura, 1980), p. 297.

³Jack Richard, John Platt, Heidi Weber, *Longman Dictionary of Applied Linguistic*, (England: Longman, 1958), p. 153.

⁴R. A. Hudson, *Sociolinguistics*, (England: Cambridge University Press, 1996), p. 21.

to understand how societies are structured and how people manage to live together. To do so, they use such concepts as 'identity,' 'power,' 'class,' 'status,' 'solidarity,' 'accommodation,' 'face,' 'gender,' 'politeness,' etc. A major concern of Hudson is to examine possible relationships between 'linguistic items' on the one hand and concepts such as 'power,' 'solidarity,' etc. on the other. We should note that in doing so we are trying to relate two different kinds of entities in order to see what light they throw on each other. That is not an easy task. Linguistic items are difficult to define. Try, for example, to define exactly what linguistic items such as sounds, syllables, words, and sentences are. Then try to define precisely what you understand by such concepts as 'social class,' 'solidarity,' 'identity,' 'face,' and 'politeness.' Finally, try to relate the two sets of definitions within some kind of theory so as to draw conclusions about how items in these two very different classes relate to each other. Do all this while keeping in mind that languages and societies are constantly changing. The difficulties we confront are ethnic group and culture of society.

Language changes all the time. Even though grammar changes more slowly than vocabulary, it is not a set of unalterable rules. There are sometimes disagreements about what correct English is and incorrect one is. 'Incorrect' grammar is often used in informal speech.⁵ Does that make it acceptable? Where there is a difference between common usage and opinions about correctness, the researcher have pointed this out. This information is important for learners. In some situations it may be safer for them to use the form which is traditionally seen as correct. The use of a correct form in an unsuitable context, however, can interfere with understanding just as much as a mistake. To help learners to use language which is appropriate for a given occasion, the researchers have frequently marked usages as formal, informal, literary and so on.

Traditionally, transitivity is a concept that is associated with the verb; in other words, a verb is either transitive or intransitive (or copular). However, the distinction is always based on the presence or absence of the various roles involving objects: direct object, indirect object, no object and even whether one of these can occur as

⁵ John Eastwood, *Oxford Guide to English Grammar*, (New York: Oxford University Press, 2002), p, VII.

subject. What this shows is that the relation of transitivity concerns the distribution of objects, whether this means arguments, objects or participants, rather than the status of the verb. These two views of transitivity are really two sides of the same coin.

In traditional syntax, transitivity is determined by the number of arguments that a verb has. Halliday does base his view of transitivity on verbs but he extends it beyond that to include the participants: ‘transitivity is the grammar of processes . . . and the participants in these processes, and the attendant circumstances’.⁶ In developing his theory of language, Halliday broadened the traditional notion of transitivity to shift the focus away from solely being placed on the verb. For Halliday, transitivity is instead. Analyzing experiential meaning a notion to be applied to the entire clause, extending beyond verbs and objects and even arguments, given that he also includes circumstances. Halliday has been clear in his writing that his use of transitivity is a generalization of its traditional uses in grammatical description. He extends transitivity to refer generally to that which ‘defines some of the roles which nominal elements may occupy’.⁷ It is really from this that we begin to understand that transitivity is about relating participating entities in the clause.

In researcher’s experience as a college student that also as a pre-service teacher at English Education Department ‘Walisongo’ State University of Islamic Studies, the most problem appear in learning English is about comprehending the grammar rules and the difficulties to write. This is because grammar rules, it’s not regarded as something interesting in own right, but also as a necessary function of language and it is therefore taught by way of rules and structures. Besides, the difficulties arise from the nature of the system itself and from the difference between English and our native language. The researchers have concerned about grammar rules because they will always find it in order to be able to communicate effectively in English, either spoken or written. On the other side, in writing process, we often find it hard even to write in their native language. We cannot write well if we do not have a good grammar competence. It happens because we have lack of confidence that make us feel hard to

⁶ Lise Fontaine, *Analyzing English Grammar*, (England: Cambridge University Press, 2003), p. 73.

⁷ M. A. K. Halliday, *An Introduction to Functional Grammar*, (England: Hodder Arnold, 2004), p.

write. Beside, who have good competence in grammar? We could be more confident than those who are not, because we know how to make good and proper sentences.

Based on the description above, the researcher wants to analyze and identify Syntactic of inversion found in Jakarta Post. Based on the background above, the researcher wants to do research about:

“Syntactic Analysis of Inversion Found in Jakarta Post”.

B. Research Question

Related to the title, the research will study about some problems, they are;

1. What are kinds of Inversion found in *The Jakarta Post* (on Wednesday, July 19, 2017, Twenty-Four Pages Vol, 35 No, 066. WWW.JAKARTAPOST.COM) based on Syntactical Analysis?
2. What is the contribution of the research to English Language Department?

C. Objective Study

To explain the kinds of inversion found in *the Jakarta Post* (on Wednesday, July 19, 2017, Twenty-Four Pages Vol, 35 No, 066. WWW.JAKARTAPOST.COM), based on syntactical analysis and the contribution of the research to English Language Department (ELT).

D. Significance of the Study

The result of this study be to help the language researchers and learners understand more the use of inversion in *the Jakarta Post*. Practically, the result of the study could be used in the teaching and learning of literature at Schools and Universities. As for teachers, this study will be a good reference for the use of inversion. As for students, they will have better understanding of those inversion employed in the analyzed works and will be able to capture the implications of the works. Furthermore, it can improve their writing skill and help study about Syntax,

Grammar and Writing Course of ELT. As for translators, they will be more aware of similarities and differences in translating the inverted structures.

CHAPTER II

REVIEW OF RELATED LITERATURE

A. Literature Review

Agustin analyzes on students' understanding of inversion sentences based on the kind's theory of inversion. Percentage of correct: 40.26%, level of understanding: E, meaning: Failing or Unsatisfactory.⁸ The result of her research is the level of understanding of the fourth year students Faculty of letters Gunadarma University on inversion sentences is unsatisfactory, it less than 60%. The levels of the students' understanding are failing or unsatisfactory in almost every parts of the theory of inversion. The samples were 30 students, of the fourth year students Faculty of Letters Gunadarma University.

⁸ Agustin Suhartini, *The Mastery Of Inversion Sentences Of The Fourth Year Students*, (Thesis. Depok: Gunadarma University, 2011)

Based on her research, she was finding students problems to understanding about the theory of inversion. The students do not understand enough on the theory inversion of (inversion on question, inversion on exclamation, inversion on adverbial expression, inversion on conditional clauses, inversion on negative and restrictive, and inversion on after as, than, so). The problems of the students are: they do not understand enough the theories of inversion sentences and kinds of inversion sentences. She was using the method employed descriptive quantitative method. Finally she concluded that the students still have problems in understanding inversion sentences.

She suggests that the students should learn and have to understand the theory of inversion and kinds of inversion sentences. So, they be able to understand the inversion sentences and able to answer the questions of inversion sentence. In order to improve the level understanding of the students, she also suggests to the English lecturers to give more explanations and exercises about inversion sentences to all of the students.

In her research, we can conclude student's problems to understanding about the theory of inversion in fourth year students Faculty of Letters Gunadarma University. If we look at the percentage to understanding of inversion sentence, it's just 40% of the fourth year students Faculty of Letters Gunadarma University. In the fact it's very important for students English to learn and have to understand the theory of inversion, because it's use for analyzes to grammatical and syntax study.

Isniah found that there are many phrase structure patterns occurs on the headlines in *The New York Times* online newspaper. Those phrase structure patterns are classified into (1) the pattern of S, (2) the pattern of VP, (3) the pattern of NP and (4) the pattern of PP. She analyzes The most frequent phrase structure pattern occurred in *The New York Times* headlines in the first two weeks of May 2014 (May 1st until May 14th) is the pattern of S → NP VP.⁹

In her research, she classified in type of pattern found 83 times out of 192 totals of headlines analyzed by her with the percentage of 43%. The next type of phrase structure tree is NP → (Art) N (PP) occurred in 18 occurrences or of 9,4%. The third type of phrase structure occurred is NP → N (PP) in 13 occurrences and percentage of 6,8%. The next is the pattern of S → NP (Aux) VP happens to be the fourth type of pattern with 10 occurrences and percentage of

⁹ Isniah Wulan Suci, *Syntactic Analysis on The Headlines in New York Times in The First Two Weeks of May 2014 (1st to 14th of May)*, (Thesis. Tulungagung: State Islamic Institute (IAIN) Tulungagung, 2014).

5%. Other types of phrase structure occurred below 10 occurrences with the percentage below 5% out of the total percentage.¹⁰

In this case Isnia try to separate sentence into pattern to easily for analyze. The variation of structure made is not only to make the addressee can understand the message but also to beautify the language. In the case of communication, in order to be able to deliver the message that the sender intends to, the language structure used is various. As in social media, in this case is online newspaper, many variations of language structures used to make the newspaper or article interesting for the readers, especially in the part of headline. It is to build their interest to read a certain article since at the first glance it would be a headline that catches the reader attention which usually written in a bold font. She is able to find out the trend of language structure which is used the most by her in *The New York Times*. Even so, it cannot be judged which pattern should be used by her. The variation of the patterns used is the proof of the various information, idea and attitude of human being. Everyone is different to each other, so are Isnia in *The New York Times*, they have their own style and sense over their way of writing. One thing that matters is that everyone is a good writer.

Isnia was using quantitative research in reason of that the analysis was dealing with number as well of percentage. She analyzed the headline by using phrase structure tree pattern based on phrase structure rule to find the trend of sentence pattern occurred. Thus, the approach again was specified into descriptive quantitative. Later, the data percentage was used to uncover what kind of phrase structure patterns are found on the headlines in *The New York Times* and what phrase structure pattern most frequently occurs.

B. Theoretical Framework

1. Communication and Mass Media

Humans as a social being need to interact and communicate with others in the society. Human is destined to socialize and interact with each other. The intention in communicating with others is many, which one of those is to get information and to exchange information.

In modern era, communications need media to spread the information for people development and knowledge, moreover media to spread information for reader load the content like visual, audio and audio visual.

¹⁰ Isnia Wulan Suci, *Syntactic Analysis on The Headlines in New York Times in The First Two Weeks of May 2014 (1st to 14th of May)*...p.85.

a. Communication

Communication as a practice of conveying information is actually an old theme, as old as human civilization. For human being, communication conducted to share knowledge and experience with others. It is an important part that cannot be separated from human's activity, both as an individual and a group.

Most of human life spent for communicating, with family member, friend, neighbor, colleague even with themselves. By communicating, human being will be able to exchange information, sharing, developing themselves and sharing other advantages.¹¹ Without communicating, human being will never be improved. We can imagine how lonely this life would be. An interaction with other human beings is advantageous to maintain our humanity existence. We exist and interact because of other's presence.

Communication is understood in the present chapter as the exchange and negotiation of information between at least two individuals through the use of verbal or non-verbal symbols, oral and written/visual modes, production and comprehension processes.¹² In this sense communication involves the continuous evaluation and negotiation of meaning on the part of the participants.

The word "communication" comes from Latin *cum*, a preposition which means with and together with, and *unus*, an sum refers to one. From those two words formed a noun *communio* which in English becomes *communion* means togetherness, unity, alliance, union, fellowship, and relationship. To form a *communio*, it is necessary to make an effort and work. From the word derived a verb *communicare* which mean share something with someone, giving something to anybody, exchanging, talking something to someone else, telling something towards others, speaking, discussing, make a relationship and make friend. The verb *communicare* finally form a noun *communication* in English. Based on those meanings of the word *communicare* which is the origin of the word communication, litterally communication means notification, talk, conversation, discussion or relation.

¹¹ Ngainun Naim, *Dasar-dasar Komunikasi Pendidikan*, (Jogjakarta: Ar-Ruzz Media, 2011), p. 24

¹² Jack C. Richards and Richard W. Schmidt, *Language and Communication*, (New York: Longman, 1993), p. 89.

Human communication may take place using any of the available sensory modes (hearing, sight, etc.), and the differential study of these modes, as used in communicative activity, is carried on by Semiotics. A contrast which is often made, especially by psychologists, is between verbal and non-verbal to refer to the linguistic v. the non-linguistic features of communication (the latter including facial expressions, gestures, etc., both in humans and animals).¹³ However, the ambiguity of the term ‘verbal’ here, implying that language is basically a matter of ‘words’, makes this term of limited value to linguistic, and it is not usually used by them in this way.

Meanwhile, Gary Cronkhite defined 4 basic assumptions of communication which can help understanding communication. First, communication is a process. Second, communication is Tran’s active. Third, communication is multi-dimensional. Fourth, communication is multipurposeful. Simple defined Emery Edwin “communication is the art of transmitting information, ideas, and attitude from one person to another.”

According to Hardjana, in a perspective of exchanging meaning, communication can be defined as “a process of delivering meaning in a form of opinion or information from somebody towards others through a certain media.” As now days, media used to communicate for delivering meaning in a form of opinion or information is various, which one of those is mass media.

b. Mass Media

Mass media refers to communication devices, which can be used to communicate and interact with large number of audience in different language. Mass media means reaching a large audience using different kinds of communication methods. In this developed era, the technology through which this communication takes place varies. Broadcast media such as radio, recorded music, film and television transmit their information electronically. Print media use a physical object such as a newspaper, book, pamphlet, or comic to distribute their information. The digital media comprises both internet and mobile mass communication. Internet media provides many mass media services, such as email, websites, blogs and internet based radio and television.

¹³ David Crystal, *A Dictionary of Linguistics and Phonetics*, (USA: Blackwell Publishers Inc., 1998), p. 89.

In this global era internet holds a great role in communication. Many mass media outlets have a presence on the web, by such things as having TV ads that link to a website. In this way, they can utilize the easy accessibility that the internet has, and the outreach that internet affords, as information can easily be broadcast to many different regions of the world simultaneously and cost-efficiently.

As stated, that the media to deliver information varies, which one of those is newspaper, as well as internet holds a great role in communication and how accessible it is, newspaper happens to link to a website in order to make the audience get easy. One of the most popular newspaper website that has the most articles read, view by the reader is *The Jakarta Post* or commonly also known as any times. It is also a long running newspaper since 1983. The articles here written by many writers and also provided, those are many information or news from around the world especially in Indonesia.

2. Syntax

a. Definition of Syntax

According to Radford, “grammar is traditionally subdivided into two different but interrelated areas of study morphology and syntax. Morphology is the study of how words are formed out of smaller units (called morphemes). And syntax is the study of the way in which phrase and sentences are structure out of words”.¹⁴ It means learning of morphology and syntax are both of the components of language.

The syntax of a language is the set of rules that language uses to combine words to create sentences. The parts of speech of words are noun, verb, propositional, adjectival, and adverbial.¹⁵ One way of diagramming the structure of a sentence is called phrase structure rules.

For example: S → NP VP

¹⁴ Andrew Radford, *An Introduction to English Sentence Structure*, (New York: Cambridge University Press), 2009, p. 1.

¹⁵ Ei Nyein Chan Wai and May Aye Khine, *Modified Linguistic Steganography Approach by Using Syntax Bank and Digital Signature*, (International Journal of Information and Education Technology, Vol. 1, No. 5, December 2011), p. 410.

"A sentence is made up of a noun phrase and a verb phrase." Most of today's parsers produce the above phrase structure. In subject-verb-object representation, the noun phrases in the above structure become either subject or object of the sentence. Some works have done on extraction of subject(s), verb and object(s) from a sentence's phrase structure.¹⁶ Here are some definitions of syntax proposed by linguists.

- 1) In linguistics, Yule defined syntax (from Ancient Greek σύνταξις "arrangement" from σύν *syn*, "together", and τάξις *táxis*, "an ordering") is "the study of the principles and processes by which sentences are constructed in particular languages". Based on the explanation above, that based on the Greek syntax is a setting out together or arrangement. When we concentrate on the structure and ordering of components within a sentence, we are studying the syntax of the language.
- 2) According to Robert, the term 'syntax' is from the ancient Greek *syntaxis*, a verbal noun which literally means 'arrangement' or 'setting out together'. Traditionally, it refers to the branch of grammar dealing with the ways in which words, with or without appropriate inflections, are arranged to show connections of meaning within the sentence.

Syntax has to do with how words are put together to build phrases, with how phrases are put together to build clauses or bigger phrases, and with how clauses are put together to build sentences. Based on those definitions of syntax, it can be inferred that syntax is a study about word, phrase, clause, and sentence.

b. Syntactic Awareness and Read Ability

Syntactic (or grammatical) awareness refers to the ability to manipulate and reflect on the grammatical structure of language. Syntactic awareness is a metalinguistic skill,¹⁷ distinct from the comprehension or production of a sentence, because it concerns the ability to consider the *structure* rather than the *meaning* of a sentence.

Readability is a topic of importance to both practitioners and scholars across a wide range of fields and interests, including education, applied and text linguistics, library

¹⁶ Ei Nyein Chan Wai and May Aye Khine, *Modified Linguistic Steganography Approach by Using Syntax Bank and Digital Signature...* p. 411.

¹⁷ K. Cain, *Syntactic Awareness and Reading Ability: is There any Evidence for a Special Relationship?* (Journal Applied Psycholinguistics 2007), 28, 679-694, p. 5.

science, and business, medical, and technical communications.¹⁸ On a practical level, readability criteria are needed for a wide variety of tasks, including selecting appropriate reading materials, effectively communicating technical, medical, and business information to both specialists and non-specialists, creating standardized tests, and teaching writing and communication skills. On a theoretical level, readability is relevant to areas such as applied linguistics, text and discourse theory, and natural language processing. We look at readability as determined by a variety of linguistic factors, including syntactic, semantic, morphological, and textual (discourse) properties.

Syntactic awareness has been its relation to reading ability. Syntactic awareness has been hypothesized to relate specifically to both word reading and reading comprehension. It is thought to aid word recognition skills by enabling a reader to use the syntactic constraints of a sentence to decode unfamiliar words and reading comprehension by facilitating sentence- and text-level integration and monitoring skills.

The relation between syntactic awareness and reading comprehension was mediated by vocabulary, grammatical knowledge, and memory; in contrast, word reading and syntactic awareness shared unique variance not explained by these controls.

c. Grammar

The grammar of a language is generally assumed to consist of a number of different areas, traditionally referred to as Phonology (the study of sounds, stress, and intonation), Morphology (the study of the internal structure of words), Syntax (concerned with the structure of clauses and phrases, and the order of elements within clauses and phrases), Semantics (the study of meaningful elements within a language), and Pragmatics (concerned with the way in which speakers use language in order to communicate their intentions). In addition, grammars do not operate in isolation: there is continuous interaction between the grammar and a language user's conceptualization of the world, between the Grammar and previous discourse, between the grammar and the immediate discourse situation (including the speech participants), and between the grammar and the society in which it is used.¹⁹

¹⁸ A. Bailin, *Readability : Text and Context*, (Ann Grafstein, Hofstra University, USA. Publisher by PALGRAVE MACMILLAN 2016), p. 4

¹⁹ Evelien Keizer, *A Functional Discourse Grammar for English*, (United Kingdom: Oxford University Press, 2015), p. 7.

1) Structural Grammar

Structural grammar is a means of analyzing written and spoken language. It is concerned with how elements of a sentence such as morphemes, phonemes, phrase, clauses, and parts of speech are put together. Under this form of linguistic analysis, it is how these elements work together that is most important, as the relationships between the elements typically have a greater meaning than any of the single elements. The study of this method therefore is an important tool for improving clarity in communication.

Structural grammar operates under the assumption that what is seen on the surface is also the straightforward meaning behind the words of a sentence. Everything is accepted literally and at face value, and no attempt to identify implied meaning is made. The fact that the choice and arrangement of sentence elements creates absolute meaning makes structural grammar a foundation for being understood. One a person has the absolute meaning; he can look beyond it to implied meaning if desired.

2) Transformational Grammar

Transformational grammar, also called Transformational-generative grammar, a system of language analysis that recognizes the relationship among the various elements of a sentence and among the possible sentences of a language and uses processes or rules (some of which are called transformations) to express these relationships.

Two superficially different sentences are shown in these examples.

Umam broke the door.

The door was broken by Umam.

The first is called an active sentence, focusing on what *Umam* did, and the second is a passive sentence, focusing on *the door* and what happen to it. The distinction between them is a difference in their **surface structure**, that is, the different syntactic forms they have as an individual sentences. Although sets such as this active and passive sentences appear to be very different on the surface (*i.e.*, in such things as word order), a transformational grammar tries to show that in the

“underlying structure” (*i.e.*, in their deeper relations to one another), the sentences are very similar. This superficial difference in form disguises the fact that two sentences are very closely related, even identical, at some less superficial level.

Transformational grammar assigns a “surface structure” and a “deep structure” to show the relationship of such sentences.

a) **Surface structure** is the structure which describes the sentence as it is actually produced or spoken.

b) **Deep structure** takes into account of transformation and contains all the units and relationship that are necessary for interpreting the sentence.

Thus, “I know a man who flies planes” can be considered the surface form of deep structure approximately like “I know a man. The man flies airplanes.” The notion of deep structure can be especially helpful in explaining ambiguous utterances; *e.g.*, “Flying airplanes can be dangerous” may have a deep structure, or meaning, like “Airplanes can be dangerous when they fly” or “To fly airplanes can be dangerous.”

When we look at the most frequent words and phrases in conversation, we find many items that conversation shares with the written language, such as grammatical words (articles, pronouns, prepositions, etc.), common everyday nouns, verbs, adjectives, and adverbs (*people, money; go, see; different, interesting; still, usually*), and modal items (*can, should, maybe, probably*). As we saw earlier, some of these may be far more frequent in conversation than in writing (*e.g., probably*) or have different uses (*e.g., see*).

In addition to these grammatical and common everyday words and phrases, we also find items that distinguish the spoken language from the written, items that reflect the interactive nature of conversation and that give conversation its distinctive character. We can perhaps best describe these as a vocabulary of conversation rather than merely as vocabulary *in* conversation. Below are examples of the types of this vocabulary with extracts from the Corpus to show how people

have actually used them.²⁰ Note that some of the frequent expressions have several uses and fall into more than one category.

3) Grammatical Units

The grammatical units of English are these: word, phrase, clause and sentence.

A FLIGHT ANNOUNCEMENT

*'Good evening, ladies and gentlemen. On behalf of British Island Airways, Captain Massey and his crew welcome you on board the Start Herald Flight to Southampton. Our flight time will be approximately forty five minutes, and we shall be climbing to an altitude of eight thousand feet and cruising at a speed of two hundred and fifty miles per hour.'*²¹

(From: M. Underwood and P. Barr *Listeners*)

a) Word

The words in the announcement are *good, evening, ladies, and, gentlemen, on* etc.

b) Phrases and Clauses

We use phrases to build a clause. Here is an example.

| Subject | Predicate | Complement |
|------------------------|----------------|--|
| <i>Our flight time</i> | <i>will be</i> | <i>approximately forty five minutes.</i> |
| Noun | verb | noun |

Here the noun phrase *our flight time* is the subject of the clause. A clause has a subject and a verb. There can be other phrases, too. In this next example I use a prepositional phrase as an adverbial.

²⁰Jeanne McCarten, *Teaching Vocabulary Lesson from the Carpus Lesson for the Classroom*, (New York: Cambridge University Press, 2007), p. 9.

²¹John Eastwood, *Oxford Guide to English Grammar...*p. 2.

| Adverbi | Subject | Predicate | Object |
|---------------------------------|-----------|-------------|-------------|
| <i>On behalf of the airline</i> | <i>we</i> | <i>wish</i> | <i>you.</i> |
| Prepositional | noun | verb | noun |

c) Sentences

A sentence can be a single clause. *On behalf of British Island Airways, Captain Massey and his crew welcome you on board the Start Herald flight to Southampton.* A written sentence begins with a capital letter (*On*) and ends with a mark such as a full stop.

We can also combine two or more clauses in one sentence. For example, we can use *and* to link the clauses. *Our flight time will be approximately forty-five minutes, **and** we shall be climbing to an altitude of eight thousand feet **and** cruising at a speed of two hundred and fifty miles an hour.*

4) Word Classes

There are different classes of words, sometimes called 'part of speech'. Some words belong to more than one word class. For example, *test* can be a noun or a verb.

*He passed the **test**.* (Noun)

*He had to **test** the machine.* (Verb)

There are eight main word classes in English.

- 1) Verb : *climb, eat, welcome, be*
- 2) Noun : *aircraft, country, lady, hour*
- 3) Adjective : *good, British, cold, quick*
- 4) Adverb : *quickly, approximately*
- 5) Preposition : *to, of, at, on*
- 6) Determiner : *the, his, some*
- 7) Pronoun : *we, you, them, myself*

8) Conjunction : *and, but, so*

There is also small class of words called ‘interjection’. They include *oh, ah, mhm* etc.

3. Syntactic Analysis

Syntactic analysis is a process to break (a sentence) down into component parts of speech with an explanation of the form, function, and syntactical relationship of each part. Typical human language users have a remarkable ability to analyze sounds and other gestures in a certain very sophisticated way. One of our main goals in studying language is to understand how this is done, and how that ability arises in the human mind. This conception defines our field of linguistics as a branch of cognitive psychology.²² Having reviewed some important concepts in the study of syntax, we can now look at some of the way in which syntactic analysis is presented.

a. Structural Ambiguity

Let’s say we had two distinct deep structures. One expresses the idea that ‘Annie had an umbrella and she whacked a man with it.’ the other expresses the idea that ‘Annie whacked a man and the man happened to be carrying an umbrella.’ Now, these two different versions of events can actually be expressed in the same surface structure form: *Annie whacked a man with an umbrella*. This sentence provides an example of structural ambiguity. It has two distinct underlying interpretations that have to be represented differently in the deep structure.

b. Recursion

The rules of the grammar will also need the crucial property of recursion. Recursive (‘repeatable any number of times’) rules have the capacity to be applied more than once in generating a structure.

For example, we can have one prepositional phrase describing location (*on the table*) in the sentence *the gun was on the table*. We can also repeat this type of phrase, using different words (*near the window*), for as long as the sentence still makes sense (*in the bedroom*). So, in order to generate a sentence such as *the gun was on the table near*

²² Hilda Koopman, at all. *An Introduction to Syntactic Analysis and Theory*, (www.linguistics.ucla.edu access on 28 June 2018, time 15.46), p. 37.

the window in the bedroom, we must be able to repeat the rule that creates a prepositional phrase over and over again.

We must also be able to put sentences inside other sentences. For example, when we produce a sentence such as *Cathy knew that Mary helped George*, we do so with the sentence *Mary helped George* inside it. And those two sentences can be generated inside another sentence such as *John believed that Cathy knew that Mary helped George*. In principle, there is no end to the recursion that would produce ever longer versions of complex sentences with this structure.

c. Symbol Used in Syntactic Description

There are some symbols we should be deal with in syntactic analysis. For examples are ‘S’ (= sentence), ‘NP’ (= noun phrase), ‘N’ (= noun), ‘Art’ (= article), and so on. There are three more symbols that are commonly used in syntactic description.

The first in the form of an arrow \longrightarrow . It can be interpreted as ‘consists of’ or ‘rewrites as’. It is typically used in the following type of rule:

NP \longrightarrow Art N

This is simply a shorthand way of saying that a noun phrase (NP) such as (for example) *the dog* consists of or rewrites as (\rightarrow) an article (Art) *the* and a noun (N) *dog*.

The second symbol is a pair of round brackets () which what is inside the brackets is optional.

NP \rightarrow Art (Adj) N

This expresses the idea that a noun phrase rewrite as (\rightarrow) an article (Art) and a noun (N), with the option of including an adjective (Adj) in a specific position between them. We use the round brackets to indicate that the adjective is optional.

The third symbol is in the form of curly brackets { } means *only of the elements enclosed within the brackets must be selected*.

| | | | |
|---|----------------------------------|---|-------------|
| { | NP Art N | } | Art N |
| | NP Pronoun NP \rightarrow | | Pronoun |
| | NP Proper Noun | | Proper Noun |

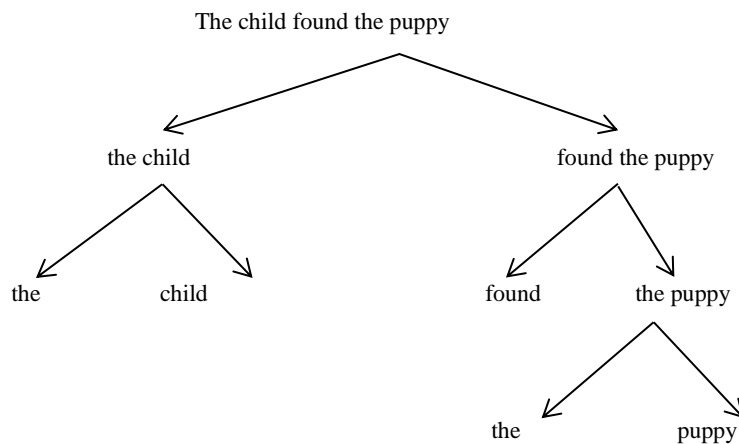

It is important to remember that, although there are three constituents in these curly brackets, only one of them can be selected on any occasion. This list of symbols and abbreviations is summarized below.

| | | |
|--------------------|-----------------------|--------------------------------|
| S sentence | NP noun phrase | PN proper noun |
| N noun | VP verb phrase | Adv adverb |
| V verb | Adj adjective | Prep preposition |
| Art article | Pro pronoun | PP prepositional phrase |

d. Syntactic Categories

Syntactic rules determine the order of words in a sentence. The word of sentence can be divided into two or more groups, and within each group the word can be divided into subgroups until only single word remains. Sub division may occur until only the individual words of the sentence remain.

For example:

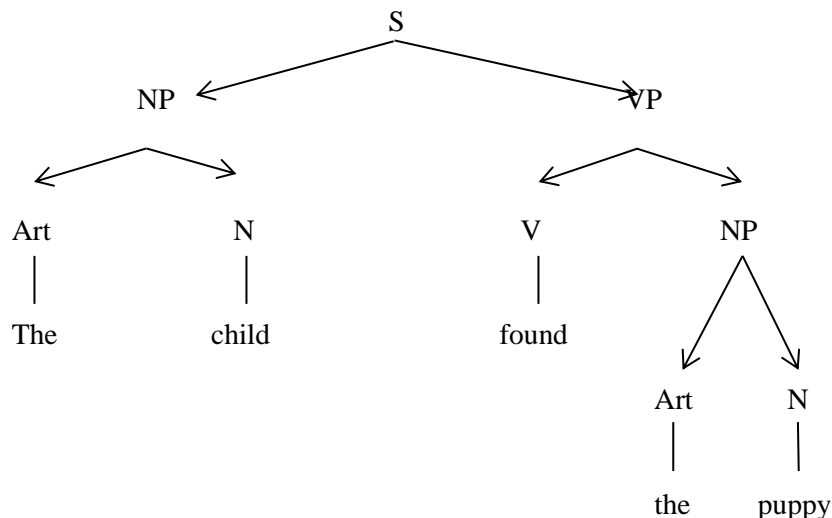

Each of the natural groupings in the diagram above is a member of a large family of similar expressions. A family of expressions that can substitute for one another without loss of grammaticality is called a **syntactic category**.

The child above belongs to the syntactic category Noun Phrase (NP), one of several syntactic categories in English and every other language in the world. There are other syntactic categories. The expression *found the puppy* is a Verb Phrase (VP). Verb Phrases always contain a Verb, which may be followed by other categories, such as Noun Phrases. This shows that one syntactic category may contain other syntactic categories.

Other syntactic categories are Sentence (S), Article (Art), Noun (N), Verb (V), Prepositional Phrase (PP), and Adjective (Adj). Some of these syntactic categories should be familiar; they have traditionally been called “parts of speech.”

The phrase of the structure tree above is correct, but it is redundant. We can streamline the tree by writing the words only once.

There are several tens of thousands of categories in a language, maybe even millions. Thus the number of rules that we have to write is far too large to be written one by one. First, words fall into roughly two handfuls of so-called **lexical** or **major**

categories. The ones we shall be using are: noun (N), verb (V), adjective (Adj), adverb (Adv), preposition (Prep), complementizer (C), determiner (Det) and tense (T).

e. Phrase Structure Rules

Phrase Structure Rules are a way to describe a given language's syntax and are closely associated with the early stages of Transformational Grammar. They are used to break down a natural language sentence into its constituent parts (also known as syntactic categories) namely phrasal categories and lexical categories (aka parts of speech). As the name suggests, these rules state that the structure of a phrase of a specific type will consist of one or more constituents in a particular order. We can use phrase structure rules to present the information of the tree diagram in another format, as we saw when we introduced some new symbols earlier. That is, the information shown in the tree diagram on the left can be expressed in the phrase structure rule on the right.

According to this rule, “a noun phrase rewrites as an article followed by noun.”

The first rule in the following set of simple (and necessarily incomplete) phrase structure rules states that “a sentence rewrites as a noun phrase and a verb phrase”. The second rule states that “a noun phrase rewrites as an article, an optional adjective and a noun or pronoun or a proper noun”.

1) Rules for rewriting noun phrases

We can now characterize and exemplify certain types of NP.

Noun (N): *Karen, spoons, justice, swimming*

Determiner (DET) + Noun: *that spoon, a judge, some gnomes*

Determiner + Adjective (ADJ) + Noun: *an old farmer, her aged instructor, the flying saucer*

Determiner + Adjective + Noun + Prepositional Phrase (PP): *the coldest weather of the year, the first woman on the moon*

One way of representing these various NP patterns is by the use of **phrase structure rule** (also called *rewrite rules*) like the following:

- a) $NP \rightarrow N$ (NP consists of N)
- b) $NP \rightarrow DET N$ (NP consists of DET + N)
- c) $NP \rightarrow DET ADJ N$ (NP consists of DET + ADJ + N)
- d) $NP \rightarrow DET ADJ N PP$ (NP consists of DET + ADJ + N + PP)
- e) $NP \rightarrow (DET) (ADJ) N (PP)$
- f) $NP \rightarrow ADJ N$
- g) $NP \rightarrow DET N PP$

These four rules can be collapsed into a single rule if we place parentheses around optional elements (that is, around elements that need not be present). Notice that the only constituent required each NP phrase-structure rule is N; the other constituents — are optional and must be placed in parentheses. The abbreviated rule looks like this point (e). Because DET, ADJ and PP are each optional, we can rewrite NP not only as in (a), (b), (c) and (d) above, but also in other ways, including (f) and (g).

2) Prepositional Phrase

The notation PP stands for prepositional phrase, example of which include *in the car, from Ethiopia, in the attic, to his brother, with the earring* and *by the judge*. Because every PP consists of a preposition (PREP) and a noun phrase (NP), the phrase structure rule for PP is this:

$PP \rightarrow PREP NP$

3) Infinitival TP (infinitival tense phrase)

Infinitival *to* is a non-finite tense particle (belonging to the category T) and if *to* is the head of the phrase *to help you*, the structure formed by merging the infinitival T-particle *to* with the verb phrase/VP *help you* will be TP in below:

4) Rules for rewriting sentences and verb phrases

To capture the fact that sentences and clauses have two basic constituent parts, we formulate the following phrase structure rule:

$$S \rightarrow NP + VP$$

Every phrase structure rule can generate a tree diagram, and this phrase structure rule (rewrite S as NP and VP) would generate the following tree.

Having seen various expansions of NP, we turn now to the internal structure of VP to explore its expansions and the rewrite rules necessary to accommodate them. The following expansions for identifying VPs reveal that the structures on the right are VPs; the labels under parts of the VPs indicate the categories of constituents of those structures.

V

$$VP \rightarrow V NP$$

V NP PP

Using parentheses to enclose optional elements, we can collapse these three phrase structure rules into a single rule, which says that a VP must have a V and may have an NP or a PP, or both an NP and a PP.

VP \rightarrow V (NP) (PP)

We have now formulated four phrase structure rules.

S \rightarrow NP VP (PP)

NP \rightarrow {Art (Adj) N, Pro, PN}

VP \rightarrow V (NP) (PP) (Adv)

PP \rightarrow Prep (NP)

These rules represent the fact that every sentence has a NP and a VP; that every NP has an N; that every VP has a V; and that every PP has a Prep. According to those rules, other possibilities are optional.

Many generalizations about English are contained in those rules. For example, Noun Phrases always contain a Noun, Prepositional Phrases a Preposition, and Verb Phrases a Verb. Put more clearly, X phrases always contain an X, where X stands for Noun, Preposition, or Verb. The X of an X phrase is called the head of that phrase. Thus the head of a Noun Phrase is a Noun, of a Prepositional Phrase is preposition, and so on which is not surprising. Every phrasal category must contain at a minimum its lexical category head. It may, of course, contain other elements. A VP may or may not include an NP or a PP but it must always contain a Verb.

f. Complement Phrases

Mary helped George.

Cathy knew that Mary helped George.

Cathy believed that Cathy knew that Mary helped George.

The word *that*, as used in the sentences above, is called complementizers (C). The role of *that* as a complement is to introduce a **complement phrase** (CP). For example, in the second sentence (*Cathy knew ...*), we can identify one CP which contains *that* plus *Mary helped George*. We already know that *Mary helped George* is a sentence (S). So we are now in a position to define a CP in the following way: “a complement phrase rewrites as a complement and a sentence”, or CP \rightarrow C S.

We can also see from the same sentence that the complement phrase (CP) comes after a verb (V) I knew. This means that we are using the CP as part of a verb phrase (VP), as in I knew that Mary helped George I. So, there must be another rule that says: “a verb phrase rewrites as a verb and complement phrase”, or $VP \rightarrow V CP$.

If we now look at these two new rules in conjunction with an earlier rule, we can see how recursion is built into the grammar.

$S \rightarrow NP VP$

$VP \rightarrow V CP$

$CP \rightarrow C S$

We begin with S on the left and, as we rewrite symbols, we eventually have S on the right, allowing us to go back to the beginning and go through the set of rules again (and again).

g. Parsing in Grammar

Parsing from the Latin,” part (of speech)”.²³ It’s a traditional grammatical exercise that involves breaking down a text into its component parts of speech with an explanation of the form, function, and syntactic relationship of each part. In contemporary linguistics, parsing usually refers to the computer-aided syntactic analysis of language.

Parsing of the sentence to analysis can be doing in several ways, it make easy for analysis of the sentences. To representing sentence structure it can do:

1) Bracketing

In this ways, the sentence is break down into part from sentence into part use the bracket.²⁴ Analyzing the following sentence:

“The snake killed the rat and swallowed it”

(1a) First level: Sentence level

[The snake killed the rat and swallowed it]

(1b) Second level: clause level

[[The snake killed the rat] and [swallowed it]]

(1c) Third level: Phrase level

[[[The snake] [killed [the rat]]] and [[swallowed [it]]]]

(1d) Forth level: Word level

[[[[The] [snake]] [[killed] [[the] [rat]]]] [and] [[[swallowed] [[it]]]]]

²³ Wikipedia, *Parsing*, <https://en.m.wikipedia.org/wiki/Parsing>, accessed on April 2017, time 12.50

²⁴ Wekker, Herman and Liliane Haegeman, *A Modern Course in English Syntax*, (New York: Routledge, 1996), p. 6.

2) Labeled Bracketing

Its way like likes bracketing model, but in this way add grammatical label to each pair of square brackets.²⁵

“The snake killed the rat and swallowed it”

(2a)

[S1 The snake killed the rat and swallowed it]

(2b)

[S1 [S2 The snake killed the rat] and [S3 (it) swallowed it]]

(2c)

[S1 [S2 [NP The snake] [VP killed [NP the rat]]] and [[S3[NP (it)] [VP swallowed [NP it]]]]]

(2d)

[S1 [S3 [NP [Det The] [N snake]] [VP [V killed] [NP [Det the] [N rat]]]] [coord and] [S3 [NP [Det (it)] [VP [V swallowed] [NP [Det it]]]]]]]

3) Tree diagram

The tree diagram is a notational device with entirely equivalent to labeled bracketing.²⁶ A tree diagram also exhibits the subgroupings and sub-subgroupings of the word in the sentence that called hierarchical structure. To create a more explicit representation of the hierarchical organization of one structure, shown in a labeled and bracketed format on the left below, we can use a **tree diagram**, shown on the right below.

²⁵ Wekker, Herman and Liliane Haegeman, *A Modern Course in English Syntax...*p. 8.

²⁶ Wekker, Herman and Liliane Haegeman, *A Modern Course in English Syntax...*p. 9.

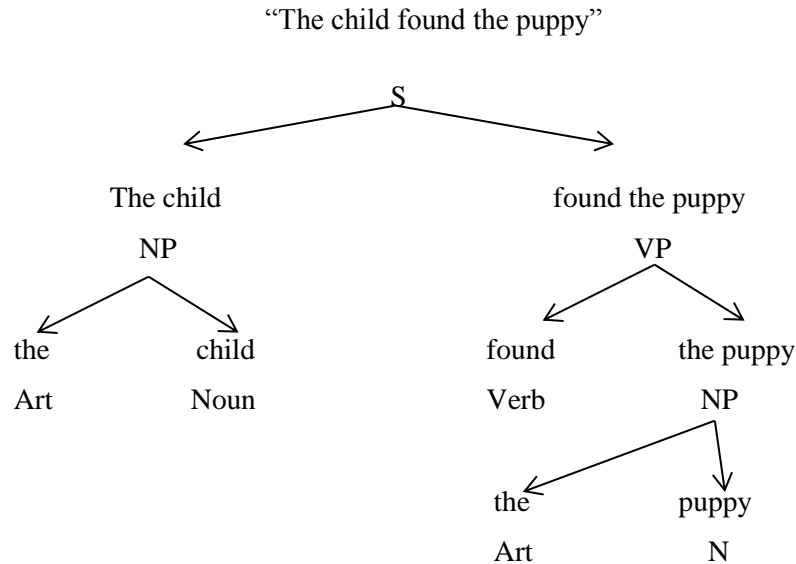

Although this kind of ‘tree’, with its ‘branches’, shown on the right, seems to grow down rather than up, it functions rather well as a diagram representations all the grammatical information found in the other analysis on the left. It also shows very explicitly that there are different levels in the analysis. That is, there is a level of analysis at which a constituent is such as NP is represented and a different, lower, level at which a constituent such as N is represented. This type of hierarchical organization can be illustrated in a tree diagram for a whole sentence, beginning at the top with S.

If we start at the top of this tree diagram, we begin with a sentence (S) and divide it into two constituents (NP and VP). In turn, the NP constituent is divided into two other constituents (Art and N). Finally, one word is selected that fits the label Art (*the*) and another that fits N (*girl*).

The child found the puppy belongs to the syntactic category of sentence. It can be illustrated in a tree diagram by specifying the syntactic category label of each word grouping.

A diagram with syntactic category information provided is called **phrase structure tree**.

4. Inversion

Budi saw Rani recently

Recently Budi saw Rani

We can think of the adverb *recently* as having been moved to the beginning of the second sentence. In order to make this possible in grammar, we need other rules that will change or move constituents in the structure derived from the phrase structure rules. These are called **transformational rules or Inversion**. Inversion happens when we reverse (invert) the normal word order of a structure, most commonly the subject-verb word order.²⁷ It is also known as *anastrophe*, is a literary technique in which the normal order of words is reversed in order to achieve a particular effect of emphasis or meter. Katz and Postal (1964) and Chomsky (1965) introduced a number of major changes into transformational grammar.²⁸ Essentially what they do is take a specific part of structure, like a branch of the tree, away from one part of the tree diagram and attach it to a different part. As shown below, we use the symbol => to indicate that a transformational rule is being used to derive a new structure from the basic structure.

²⁷ Carter, Ronald and friend, *Inversion*, <http://dictionary.cambridge.org/grammar/british-grammar/inversion>, accessed on November 1, 2016, time: 17.05.

²⁸ Ivan A. Sag and Thomas Wasow, *Syntactic Theory A Formal Introduction*, (U.S.A: CSLI Publication, 2001), p. 414

Budi saw Rani recently

Recently Budi saw Rani

We also use a transformational rule to derive English question structures of the type illustrated in the second sentence below.

You will help Shinta.

Will you help Shinta?

In order to describe this process, we need to expand our phrase structure rules to include an **auxiliary verb** (Aux) such as *will* as part of the sentence. This new rule is written as: $S \rightarrow NP \text{ Aux VP}$. Although there are other forms of auxiliary verbs in English, a rudimentary lexical rule might be as follows:

$Aux \rightarrow \{can, should, will\}$

With these components, we can specify the transformational rule that creates this basic type of English question as: $NP \text{ Aux VP} \Rightarrow \text{Aux NP VP}$. We can illustrate this change in terms of the tree on the right below being derived from the tree on the left.

\Rightarrow

Another transformational rule is used for relative clause transformation. English relative clauses contain (and are usually introduced by) a relative pronoun, such as *who* (or *whom* or *whose*), *which* or *that*.

I sent your book to my aunt my aunt lives in Tegal

I sent your book to my aunt who lives in Tegal

As in the sentence above, the pronoun can be omitted in certain structures. Relative clauses modify nouns, and the noun that the relative clause modifies is called the *head noun*. In English, the head noun is repeated in the subordinate clause, where it is ‘relativized’. A relative clause is part of the same noun phrase as its head noun. The structure of the resulting noun phrase can be represented as the diagram below.

The most common type of inversion is relative clause (see above). Inversion also happens in other situations.

Based on Michael Swan on his book practical English usage there are two kinds of inversion: a. auxiliary verb before subject, b. whole verbs before subject.

a. Auxiliary verb before subject

We put an auxiliary verb (and non-auxiliary have and be) before the subject of a clause in several different structures .

1) Questions

The position of subject and verb is reversed for forming question sentence. The pattern of question sentence:

Or

QW + Auxiliary verb + subject + verb

The possible inversion is only on direct question. Normal word order (S + V + O) is required in indirect question. NO inversion is possible.

Example:

The reports want to know when the president will give his address.

However, in formal writings, inversion is sometimes used with be in indirect questions after how, especially when the subject is long.

Example:

I wondered how reliable the information was.

2) Exclamations

Exclamations often have the same structure as negative questions. Example:

Isn't it could? → negative question

Isn't it could! → exclamation

Americans and some British speakers may use ordinary (non-negative) question forms in exclamation.

Example:

Was I furious? Question

Was I furious! Exclamation

In a rather old – fashioned literary style, inversion is sometimes found in exclamation after how and what.

Example:

How beautiful are the flowers!

3) With “may”

“May” can come before the subject in wishes.

Example:

May he rot in hell!

4) “After so, neither/ nor”

In ‘short answers’ and similar structure, those words are followed by auxiliary verb + subject.

Example:

‘I’m hungry’. ‘So am I’.

‘I don’t like opera’. ‘Neither / Nor do I’.

a) After “so”

We can use so with similar meaning to also, in the structure.

| |
|-------------------------------|
| So + Auxiliary verb + Subject |
|-------------------------------|

The structure is used to answer or add to the sentence before, and uses the same auxiliary verb.

Example:

Louise can dance beautifully, and so can her sister.

“The structure is also used with non-auxiliary be and have”.

Example:

I was tired, and so were then others.

After a clause with no auxiliary verb, we use do/does/did.

Example:

‘He just wants the best for his country.’ ‘So did Hitler.’

b) Neither and Nor

“Neither and nor” come at the beginning of a clause, and are followed by inverted word order.

| |
|---|
| Neither /nor + Auxiliary verb + subject |
|---|

Example: ‘I can’t swim.’ ‘Neither can I’

5) After negative and restrictive

If a negative adverb or adverbial expression is put at the beginning of a clause for emphasis, it is usually followed by auxiliary verb + subject. These structures are mostly rather formal.

Example:

At no time was the president aware of what was happening.

The same structure is possible after a complete clause beginning not until....

Example:

Not until he received her letter did he fully understand the depth of his feelings.

Inversion is also used after restrictive word like hardly, seldom, rarely, little, and never and after expression containing only. Those structures, too, are, formal or literary.

For example:

Hardly had I arrived when trouble started.

Inversion is not used after non – emphatic adverbial expressions of place and time.

Example:

Not far from here you can see foxes.

Not → (not far from here can you see foxes)

Inversion is used when not + object is put at the beginning of sentence for emphasis.

Example:

Not a single word did she say.

Example:

- Never

Never had she seen such a beautiful sight before.

- Seldom

Seldom do we see such an amazing display of dance.

- Rarely

Rarely will you hear such beautiful music.

- Only then

Only then did I understand why the tragedy had happened.

- Not only ... but

Not only does he love chocolate and sweets but he also smokes.

- No sooner

No sooner had we arrived home than the police rang the doorbell.

- Scarcely

Scarcely had I got off the bus when it crashed into the back of a car.

- Only later

Only later did she really think about the situation.

- Nowhere

Nowhere have I ever had such bad service.

- Little

Little did he know!

- Only in this way

Only in this way could John earn enough money to survive.

- In no way

In no way do I agree with what you're saying.

- On no account

On no account should you do anything without asking me first.

In the following expressions, the inversion comes in the second part of the sentence:

- Not since

Not since Lucy left college had she had such a wonderful time.

- Only after

Only after I'd seen her flat did I understand why she wanted to live there.

- Only when

Only when we'd all arrived home did I feel calm.

- Only by

Only by working extremely hard could we afford to eat.

6) After” as, than, and so”

Inversion sometimes happens after as, than and emphasizing so in a literary style

Example:

- a) She was very religious, as were most of her friends.
- b) City dwellers have a higher death rate than do country people.
- c) So ridiculous did she look that everybody burst out laughing.

7) Conditional clauses (of types 2 and 3)

In formal and literary conditional clauses, an auxiliary verb can be put before the subject instead of using “if”.

Example:

If she were my daughter, I would help her (were she my daughter, I would help her)

b. Whole verb before subject

1) After adverbial expressions of place

When an adverb such as down, in, out, and up is placed at the beginning of a sentence for emphasis, the verb is placed before the subject.

When an adverbial expression of place or direction comes at the beginning of a clause, intransitive verbs are often put before their subjects.

Example:

On the grass sat an enormous frog.

Directly in front of them stood a great castle.

This structure is often used in speech with here, there and other short adverbs and adverb particles.

Example:

Here comes Freddy! (NOT Here Freddy comes)

“If” a subject is a pronoun, it goes before the verb.

Example:

Here she comes. (NOT Here comes she).

2) Reporting

In story telling, the subject often comes after reporting verbs like said, asked, suggested etc when these follow direct speech.

Example:

- a) What do you mean? Asked Henry
- b) ‘I love you’, whispered Jane.

5. Jakarta Post

a. Definition

The Jakarta Post is a daily English language newspaper in Indonesia. The paper is owned by PT Bina Media Tenggara, and the head office is in the nation's capital, Jakarta.

The Jakarta Post was started as collaboration between four Indonesian media under the urging of Information Minister Ali Murtopo and politician Jusuf Wanandi. After the first issue was printed on 25 April 1983, it spent several years with minimal advertisements and increasing circulation. After a change in chief editors in 1991, it began to take a more vocal pro-democracy point of view. The paper was one of the few Indonesian English-language dailies to survive the 1997 Asian financial crisis and currently has a circulation of about 40,000.²⁹

As the newspaper also seeks to influence public opinion on various social, political or moral matters, its language frequently contains vocabulary with evaluative connotation, such as to allege (the person who allegedly committed the crime), to claim (the defendant claims to know nothing about it). These cast some doubt on what is stated further and make it clear to the reader that those are not yet affirmed facts. Elements of appraisal use of specific vocabulary but in synthetic constructions indicating lack of surety on the part of the reporter as to the correctness of the facts reported or his/her desire to avoid responsibility.

The Jakarta Post also features both a Sunday and Online edition, which go into detail not possible in the daily print edition. It is targeted at foreigners and educated Indonesians, although the middle-class Indonesian readership has increased. Noted for being a training ground for local and international reporters, The Jakarta Post has won several awards and been described as being "Indonesia's leading English-language daily".³⁰ The Jakarta Post is a member of Asia News Network.

²⁹ The Jakarta Post - Wikipedia.html accessed on November 1, 2016, time: 15.05.

b. History

The Jakarta Post was the brainchild of Information Minister Ali Murtopo and politician Jusuf Wanandi. Murtopo and Wanandi were disappointed at the perceived bias against Indonesia in foreign news sources. At the time, there were two English-language dailies, the Indonesia Times and Indonesian Observer.³¹ However, due to negative public perception regarding the existing papers they decided to create a new one.

In order to ensure credibility, the two agreed to convince a group of competing newspapers (the Golkar-backed Suara Karya, the Catholic-owned Kompas, the Protestant-owned Sinar Harapan, and the weekly Tempo) to back the nascent paper. It was hoped to become a quality English-language paper, similar to The Straits Times in Singapore, the Bangkok Post in Thailand, and the New Straits Times in Malaysia.³²

After founding PT Bina Media Tenggara to back the paper, Wanandi spent several months contacting influential figures at the targeted newspapers. To receive their cooperation, Kompas requested a 25 percent share in the new newspaper, for which it would handle the daily business operations, such as printing, circulation, and advertising. Tempo offered to assist with management in return for a 15 percent share, while Sabam Siagian of Sinar Harapan was hired as the first chief editor, for which Sinar Harapan received stock.

The establishment of the paper was further aided by incoming Information Minister Harmoko, who received 5 percent interest for his role in acquiring a license. In total, the start-up cost Rp. 500 million (US\$700,000 at the time). Muhammad Chudori,³³ a co-founder of The Jakarta Post who formerly reported for Antara, became the newspaper's first general manager.

Further details, including the matter of *Sinar Harapan's* share of stock and the publisher, were decided at a meeting at Wanandi's office in March 1983. The next month, on 25 April, the first edition — totaling eight pages — was published. The

³³ Tarrant, Bill, *Reporting Indonesia : the Jakarta Post Story...*, p. 68.

first news room of the newspaper was located in *Kompas's* former laundry room, a one story warehouse; the first employees had to do the layout by hand, using pica poles as straight edges. During the first few months, the writers translated and recycled previously published stories from Indonesian media, which were later picked up by foreign wire services. Original reporting was rare as the editors at first did not want to deal with the censorship of Suharto's New Order government.

During the early years of publication, *The Jakarta Post* had difficulty attracting advertisers, to the point that some editions ran without ads. However, circulation increased dramatically, from 8,657 in 1983 to 17,480 in 1988. Although it was originally hoped that the paper would begin to turn a profit within the first three years, the recession in the early 1980s led to the start-up funds being depleted. Eventually, in 1985 the paper took out an interest-free loan and received Rp.700 million from its owners. After advertising increased, *The Jakarta Post* was able to turn a profit by 1988,³⁴ and was considered "one of the most credible newspapers" in Indonesia.

CHAPTER III

RESEARCH METHOD

This chapter intends to present the methodology used by the researcher in the research. It will explain type of the research, method and technique of research. The researcher will describe the steps of the research.

A. Type of the Research

The researcher uses descriptive qualitative in doing this research. According to Moleong (1990: 2) “A qualitative research is a research without any calculating and numbering”. Qualitative research is an approach to the study of social phenomena; its various genres are naturalistic and interpretative, and they draw on multiple methods of inquiry. Some characteristics of qualitative research are: take places in the natural world, uses multiple methods that are interactive and humanistic, it is emergent rather than prefigured and fundamentally interpretative.³⁵ Qualitative research has some purposes, are; describing, and reporting the creation of key concepts, theory generation and testing.³⁶

Kind of this research is descriptive study. It hasn't purpose to test the certain hypothesis, but just describes some variable and condition naturally.³⁷ Relating to this, Bogdan and Taylor defines qualitative research as a research procedure resulting descriptive data in the form of written or spoken words from the people and object being observed. The researcher used descriptive qualitative research. Descriptive qualitative research is a research that carried out with the main aim to given description about a condition objectively. According to Djama'an and Aan (2012) qualitative research is a research approach that reveal certain social situations by describing the real correctly, the shape of the words based on techniques of collecting and analyzing relevant that the gain

³⁶Louis Cohen, et. al. *Research Methods in Education. Sixth ed*. (USA and Canada: Routledge, 2007), p. 168.

³⁷Suharsimi Arikunto, *Manajemen Penelitian*, (Jakarta: PT. Rineka Cipta, 2007), p. 234.

from the natural situation.³⁸ The researcher takes qualitative research because this research is to identify inversion on Jakarta Post and each contribution to Syntax, Grammar, and Writing Course.

B. Subject of the Study

Subject of this study is The Jakarta Post (on Wednesday, July 19, 2017, Twenty-Four Pages Vol, 35 No, 066. WWW.JAKARTAPOST.COM). It will be identified to get the contributions to the writing course. The researcher knows the condition of the teaching writing here is used as consideration in determining the contribution to the Writing Course, Syntax, and Grammar especially for English Language Education Department in Education and Teacher Training Faculty Walisongo State University of Islamic Studies.

C. Source of Data

The main data was collected which provides the information of inversion found in *the Jakarta Post* (on Wednesday, July 19, 2017, Twenty-Four Pages Vol, 35 No, 066. WWW.JAKARTAPOST.COM). There are main data resources; those are Newspaper Jakarta Post and Word-wide-web of Jakarta post.

D. Focus of the Research

In this research, the researcher focuses on analyzing inversion found in Jakarta Post. For that reason, this work is focused on inversion on Jakarta post, where a number of syntactical inversion found in *the Jakarta Post* (on Wednesday, July 19, 2017, Twenty-Four Pages Vol, 35 No, 066. WWW.JAKARTAPOST.COM).³⁹

E. Technique of Collecting Data

What we can do – we've got software and hardware tools that actually show how words are being used, how widely they're being used, so it's not only a question of

³⁸Djama'an Satori dan Aan Komariah, *Metodologi Penelitian Kualitatif*, (Bandung: ALFABETA CV, 2012), p. 25.

³⁹Jakarta post on Wednesday, December 19th, 2017, Twenty-Four Pages Vol, 35 No, 066. www.JAKARTAPOST.com.

numbers, but also a question of different places it's being used so everywhere from magazines, to newspapers. Social networking as well is so huge—so we're getting words in the dictionary now like de-friend, or un-friend on a social networking site such as Facebook. We're seeing lots of words like that come into the language now.

The technique of data collection of this study is scrutinizing or attentive observation method. Scrutinizing or attentive observation method is to observe the use of language both orally and in writing. If the data is written language such as narrative text, mass media language, and etc., we can also use this method.⁴⁰ The data are taken from *The Jakarta Post* (on Wednesday, July 19, 2017, Twenty-Four Pages Vol, 35 No, 066. WWW.JAKARTAPOST.COM) and other supporting data related to the object study by reading in as much as it is kinds of printed journalism presented in written language. The technique in collecting data in this research involves several activities that are;

The first step of data collection procedure was reading the newspaper. The researcher read *The Jakarta Post* (on Wednesday, July 19, 2017, Twenty-Four Pages Vol, 35 No, 066. WWW.JAKARTAPOST.COM), it is considered as the data. The data are all of news on *The Jakarta Post* (on Wednesday, July 19, 2017, Twenty-Four Pages Vol, 35 No, 066. WWW.JAKARTAPOST.COM).

After the complete reading was done, the next step was identification. The researcher identified syntactical inversion found in *The Jakarta Post*. The next step was classification. The data that had been identified was then classified based on syntactical inversion patterns. To simplify data, the researcher selected the representative of each pattern from the whole classified patterns of syntactical inversion and it will be analyzed.

In doing this research, the researcher need some reference that related to the study. These are aimed to help the researcher in analyzing the data. There were several steps that the researcher did in collecting the reference, as follows: 1) Looking for books related to the study from library, 2) Looking for any materials related with the study or internet, 3) Looking for any thesis related to the study from library or digital library.

⁴⁰ Mahsun, *Metode Penelitian Bahasa Tahapan Strategi, Metode, dan Tekniknya*, (Jakarta: PT Raja Grafindo, 2005), p. 92.

F. Data Analysis Technique

The analysis data technique that researcher used is content analysis. Content analysis is one of the techniques that commonly used in qualitative research. According May ring as cited by Louis Cohen, it focuses on language and linguistic features, meaning in context, is systematic and verifiable (e.g. in its use of codes and categories), as the rules for analysis are explicit, transparent and public. Further, as the data are in a permanent form (texts), verification through reanalysis and replication is possible.⁴¹

The whole process of content analysis can follow eleven steps: define the research questions to be addressed by the content analysis, define the population from which units of text are to be sampled, define the sample to be included, define the context of generation of the document, define the units of analysis, decide the codes to be used in the analysis, conduct the coding, conduct the data analysis, summarizing, and make speculative inference.⁴² In analyzing the data, the researcher took only some steps of content analysis as below:

1. Identifying the source.

The first step, the researcher makes list of kinds of Inversions as the equipment to identify the words, phrases, clauses and sentences as the sign of the object; it's done to get the purpose of using each Inversions which the researcher wants to find out in this study based on the statement of the problem.

2. Analyzing and classifying data.

In analyzing the data, the researcher also uses data reduction. Data reduction is not something separate from analysis. It is part of analysis.⁴³ Reducing data means that summarize and chose things that are basic, focusing on things that are important, sought theme, pattern and remove the unnecessary. In this case, the researcher will

⁴¹ Louis Cohen, at all., *Research Method in Education*, (USA: Routledge, 2007), p. 475.

⁴² Louis Cohen, at all., *Research Method* , p. 476-483.

⁴³ Greg Guest, etc., *Applied Thematic Analysis*, <http://methods.sagepub.com/book/appliedthematic-analysis/n6.xml>, accessed on April 2017.

found inversion in *The Jakarta Post* (on Wednesday, July 19, 2017, Twenty-Four Pages Vol, 35 No, 066. WWW.JAKARTAPOST.COM).

Classifying sentences into their types, the researcher then will try to find out inversion and parse the sentence to know structure of them.

3. Triangulation the analysis.

After finding and analyzing the data, the researcher used triangulation method for to validate of the data analysis correct. Validity, in qualitative research, refers to whether the findings of a study are true and certain—“true” in the sense that research findings accurately reflect the situation, and “certain” in the sense that research findings are supported by the evidence.⁴⁴ Triangulation is a method used by qualitative researchers to check and establish validity in their studies by analyzing a research question from multiple perspectives.

The data triangulation involves using different *sources* of information in order to increase the validity of a study. In Extension, these sources are likely to be stakeholders in a program—participants, other researchers, program staff, other community members, and so on.

In this research the investigator triangulation is Fella Shoufa Masitha as student ELT of college of magister Semarang University. The methods of triangulations to investigate are:

- a. Finding and corrects the analysis
 - b. Findings from all of the methods draws the same or similar conclusions
 - c. Then validity has been established.
- ### 4. Explaining and describing the syntactic analysis inversion found in *The Jakarta Post*.

⁴⁴ Lisa A. Guion, Ed.D., *Triangulation: Establishing the Validity of Qualitative Studies*, (Journal Cooperative Extension Service, Institute of Food and Agricultural Sciences, University of Florida, Gainesville, 32611. 2002), p. 1.

The researcher describes and explains inversion of used *The Jakarta* (on Wednesday, July 19, 2017, Twenty-Four Pages Vol, 35 No, 066. WWW.JAKARTAPOST.COM) based of syntactic analysis using three models parsing to know types of inversion.

5. Conclusion to answer the research question demands.

The last step, the results of both analyses will be result findings and then those will be identified more to get the contribution to the writing course, especially at English Department in Education and Teacher Training Faculty of Walisongo State University of Islamic Studies, as additional knowledge of writing in getting advanced and communicative writing. Then the researcher will make a conclusion based on the result of the research that was done before.

CHAPTER IV

FINDING AND DISCUSSION

A. Research Finding

In this chapter the researcher shows the result identification of inversion found in *the Jakarta Post* (on Wednesday, July 19, 2017, Twenty-Four Pages Vol, 35 No, 066. WWW.JAKARTAPOST.COM). The researcher will give more explanation about the subject of the study as a finding. It means that the researcher will give a general knowledge about *The Jakarta Post* and writing course.

In identifying inversion, the researcher makes list of inversion types. The objects of identification are words, phrases, clauses and sentences containing inversion which can be identified in newspaper previously mentioned as the object of the thesis. This identification is done to give some contributions to advance writing for academic purpose, syntax material as practically, and the teaching grammar course.

1. The Jakarta Post

The students of English Language Department (ELT) need to improve the skills and abilities in the learning process. The Jakarta Post is one of newspaper published Indonesia using English for present the news, and it can as media for entertaining the knowledge. Furthermore, the student of Walisongo State University of Islamic Studies can read the Jakarta Post with enjoyable and pleasure for syntax material focus of inversion from its media, because it can access free and easily in the libraries university. The Jakarta Post carries material of an extremely differ character. On the page of The Jakarta Post, one finds not only news and comments on it, but also stories and poems, crossword puzzles, and the like, since these serve the purpose of entertaining the readers.

Since the primary function of a newspaper is to import information, only printed matter serve this purpose comes under newspaper language variety. Such matter can be classed as brief news items and communication, press report (parliamentary, of court proceedings, etc.), articles purely information in character, advertisements and announcements.

The function of brief news items, communicative, and reports is to inform the reader. They state only facts without giving commentary. This accounts for the total absence of

any individuality of expression and the lack of emotional coloring. The vocabulary used here is neutral and common literary. It is essentially matter-of-fact, and stereotypical forms of expression prevail. But apart from this, a newspaper including Jakarta post newspaper has its specific vocabulary that can be found in its other features by editorials, articles, advertisement.

2. Analyzing the inversion found in *The Jakarta Post* (on Wednesday, July 19, 2017, Twenty-Four Pages Vol, 35 No, 066. WWW.JAKARTAPOST.COM).

In identifying English Inversion sentence, researcher makes list of English Inversion sentence types. The objects of identification are words, phrases, clauses and sentences containing English inversion sentence, it is identified in *The Jakarta Post* (on Wednesday, July 19, 2017, Twenty-Four Pages Vol, 35 No, 066. WWW.JAKARTAPOST.COM) as the subject of the thesis. This identification is done to give some contributions to the teaching writing course.

This list of symbols and abbreviations is summarized below.

| | | |
|--------------------|-----------------------|--------------------------------|
| S sentence | NP noun phrase | PN proper noun |
| N noun | VP verb phrase | Adv adverb |
| V verb | Adj adjective | Prep preposition |
| Art article | Pro pronoun | PP prepositional phrase |

- a. Inversion happens when adverb before subject.

In this analysis researcher analyzed the Inversions happens when adverb before subject. The researcher found the inversion sentence adverb before subject (**S→Adv+Np**), this inversion types get ninety one inversion sentences (appendix A. 1), like this sentence below:

“Recently, China closed the door against coal imports from North Korea.”

Here is the representative using three method parse of the data.

1) Bracketing

The researcher analyzed the sentence using bracketing of parsing model analysis, this model have fourth level for analyzing the sentence. Those are:

a) First level: sentence level

[Recently, China closed the door against coal imports from North Korea]

The bracket marked to identify the sentence in this first level.

b) Second level: clause level

[[Recently, [China closed the door]] [against coal imports from North Korea]]

In this level, the brackets separated to mark the clauses of the sentence. The result marks three clauses. Those are '*Recently, China closed the door*', '*China closed the door*', and '*against coal imports from North Korea*'.

c) Third level: phrase level

[[Recently, [[China] [closed [the door]]]] [[against [[coal] [imports [from [North Korea]]]]]]]]

The brackets separated and marked the phrase of the sentence. Those are; NP ('*China*', '*the door*', '*coal*', '*North Korea*'), VP ('*closed the door*', '*against coal imports from North*') and PP ('*from North Korea*').

d) Forth level: word level

[[[Recently], [[[China]] [closed] [[the] [door]]]]] [[against] [[coal]] [[imports] [[from] [[North Korea]]]]]]]]

Finally, the brackets separated and marked the word of the sentence, those are; Adverb ('*Recently*', '*against*'), Noun ('*China*', '*door*', '*coal*', '*North Korea*'), Verb ('*closed*', '*imports*'), Article ('*the*'), and Preposition ('*from*').

2) Labeled Bracketing

The researcher analyzed and used labeled bracketing the sentence of parsing model analysis, this model have fourth level for analyzing the sentence. Those are:

a) First level

[_S**Recently, China** closed the door against coal imports from North Korea]

The bracket and label marked and labeled to identify the sentence used symbol S1.

b) Second level

[S1[S2 **Recently**, [S3 **China** closed the door]] [S4 against coal imports from North Korea]]

After in the first level, the brackets separated and labeled with symbols the clauses of the sentence (S1). The result marks three clauses of the sentence, those are S2 '*Recently, China closed the door*', S3 '*China closed the door*', and S4 '*against coal imports from North Korea*'.

c) Third level

[S1[S2 **Recently**, [S3[NP **China**] [VP closed [NP the door]]]]] [S4[VP against[NP coal]] [VP imports [PP from [NP North Korea]]]]]

This level, the brackets separated and used labels to mark the phrases of the sentence (S1) with symbol. Those are; NP ('*China*', '*the door*', '*coal*', '*North Korea*'), VP ('*closed the door*', '*against coal imports from North Korea*') and PP ('*from North Korea*').

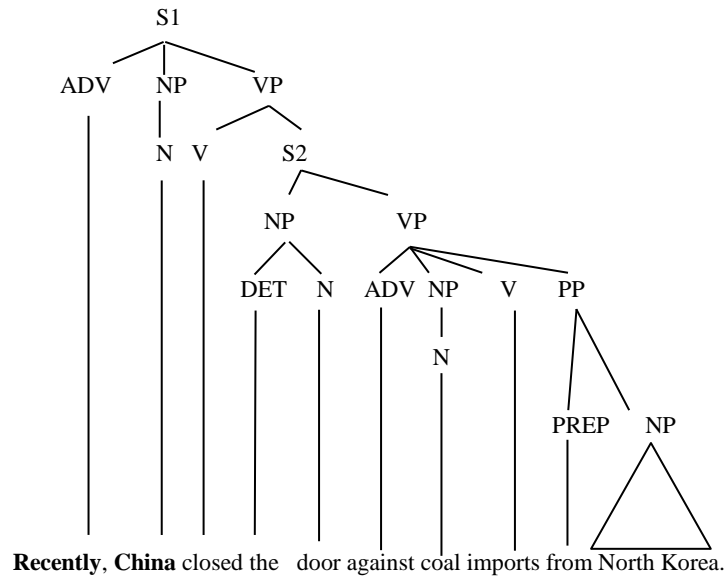

d) Forth level

[S1[S2[Adv **Recently**], [S3[NP[N **China**]]] [VP[V closed] [NP[Art the] [N door]]]]] [S4[VP[Adv against] [NP[N coal]]] [VP[V imports] [PP[Prep from] [NP[N North Korea]]]]]]]

Finally, the brackets separated and used label to mark the words of the sentence (S1) with symbol, those are; Adverb ('*Recently*', '*against*'), Noun ('*China*', '*door*', '*coal*', '*North Korea*'), Verb ('*closed*', '*imports*'), Article ('*the*'), and Preposition ('*from*').

3) Tree Diagram

The researcher analyzed the sentence using tree diagram of parsing model analysis.

The tree diagram provides the analysis of the whole sentence S1 is expanded ADV (**Recently**), NP→N (**China**), and VP→V (closed) - S2 (the door against coal imports from North Korea). The S2 is expanded NP (DET-N) + VP (ADV-NP-V-PP).

Phrase structure tree pattern:

| | |
|----------------------|----------------|
| S1 →Adv+NP+VP | NP→N |
| VP→V+S2 | S2→NP+VP |
| NP→Det+N | VP→ADV+NP+V+PP |
| NP→N | PP→Prep+NP |

b. Inversion happens when the sentence used for relative clause transformation.

English relative clauses contain a relative pronoun, such as **who (or whom or whose), which or that**. The researcher found the inversion sentence used for relative clause transformation, there are eighty one Inversions happens when

English relative clauses contain a relative pronoun, like this sentence below:
(appendix A. 2)

“Many of these types have similar symptoms, **which** makes diagnosis difficult.”

Here is the representative using three method parse of the data above.

1) Bracketing

The researcher analyzed the sentence using bracketing of parsing model analysis, this model have fourth level for analyzing the sentence. Those are:

a) First level: sentence level

[Many of these types have similar symptoms, **which** makes diagnosis difficult.]

The bracket marked to identify the sentence in this first level.

b) Second level: clause level

[[Many of these types have similar symptoms], [**which** makes diagnosis difficult.]]

After first level, the brackets separated and marked the clauses of the sentence. The result marks are two clauses, those are ‘*Many of these types have similar symptoms*’ and ‘*which makes diagnosis difficult*’.

c) Third level: phrase level

[[[Many of these types] [have similar [symptoms]]], [[**which**] [makes [diagnosis] difficult.]]]

This level, the brackets separated and marked the phrase of the sentence. Those are; NP (‘*Many of these types*’, *which*’, ‘*diagnosis*’) and VP (‘*have similar symptoms*’, ‘*makes diagnosis difficult*’).

d) Fourth level: word level

[[[[[Many] [of] [these] [types]] [[have] [similar] [[symptoms]]]], [[**which**] [[makes] [[diagnosis]] [difficult.]]]]]

Finally, the brackets separated and marked the word of the sentence, those are; Determiner (‘*Many*’), Preposition (‘*of*’), Adjective (‘*these*’, ‘*similar*’, and ‘*difficult*’), Noun (‘*types*’, ‘*symptoms*’, ‘*which*’, ‘*diagnosis*’), and Verb (‘*have*’, ‘*makes*’).

2) Labeled Bracketing

The researcher analyzed and used labeled bracketing the sentence of parsing model analysis, this model have fourth level for analyzing the sentence. Those are:

a) First level

[_{S1} Many of these types have similar symptoms, **which** makes diagnosis difficult.]

The bracket and label marked the sentence to identify using symbol S1.

b) Second level

[_{S1}[_{S2} Many of these types have similar symptoms], [_{S3} **which** makes diagnosis difficult.]]

After in the first level, the brackets separated and labeled to mark the clauses of the sentence (S1) with symbols S2 and S3. The result marks are two clauses, those are S2 (*Many of these types have similar symptoms*) and S3 (*which makes diagnosis difficult*).

c) Third level

[_{S1}[_{S2}[_{NP} Many of these types] [_{VP} have similar [_{NP} symptoms]]], [_{S3}[_{NP} **which**] [_{VP} makes [_{NP} diagnosis] difficult.]]]

This level, the brackets separated and used labels to mark the phrases of the sentence with symbols NP, and VP. Those are: NP (*Many of these types*, *which*, *diagnosis*) and VP (*have similar symptoms*, *makes diagnosis difficult*).

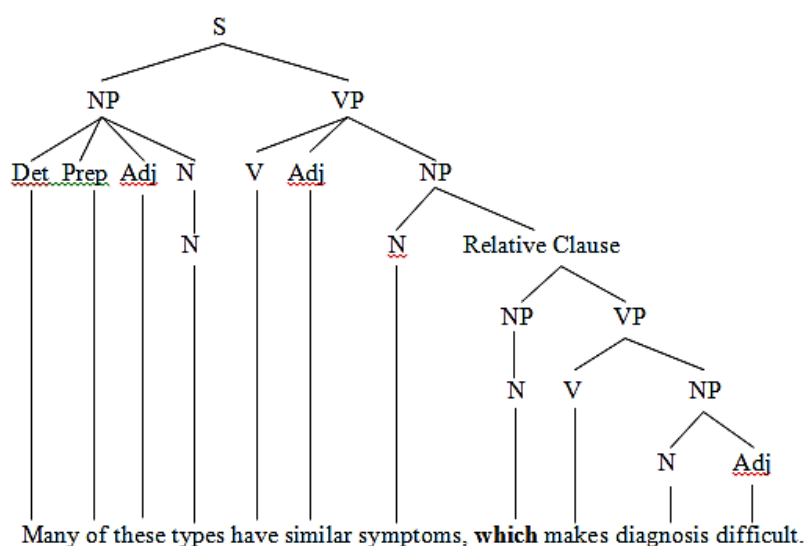

d) Fourth level

[_{S1}[_{S2}[_{NP}[_{Det} **Many**] [_{Prep} of] [_{Adj} these] [_N types]]] [_{VP}[_V have] [_{Adj} similar] [_{NP}[_N symptoms]]]]], [_{S3}[_{NP}[_N **which**]]] [_{VP}[_V makes] [_{NP}[_N diagnosis]]] [_{Adj} difficult.]]]]]

Finally, the brackets separated and used label to mark the words of the sentence (S1) with symbol, those are; Determiner (*Many*), Preposition (*of*), Adjective (*these*, *similar*, and *difficult*), Noun (*types*, *symptoms*, *which*, *diagnosis*), and Verb (*have*, *makes*).

3) Tree Diagram

The researcher analyzed the sentence using tree diagram of parsing model analysis.

The tree diagram provides the analysis of the whole sentence S is expanded NP (Many of these types) and VP (have similar symptoms, **which** makes diagnosis difficult). They also expanded appropriate the constituency above.

Phrase structure tree pattern:

- | | |
|--|---|
| $S \rightarrow NP + VP$ | $NP \rightarrow Det + Prep + Adj + N$ |
| $VP \rightarrow V + Adj + NP$ | $NP \rightarrow N + \text{Relative Clause}$ |
| $\text{Relative Clause} \rightarrow NP + VP$ | $NP \rightarrow N$ |
| $VP \rightarrow V + NP$ | $NP \rightarrow N + Adj$ |

c. Auxiliary verb etc before subject.

We put an auxiliary verb (non auxiliary have and be) before the subject of a clause in several different structure.

Auxiliary verb + subject + main verb

Have / be + subject + main verb

1) Question

The position of subject and verb is reversed for forming question sentence.

Auxiliary verb + subject + verb

QW + Auxiliary verb + subject + verb

The researcher found the inversion sentence used it. There are four inversions happens the position of subject and verb is reversed for forming question sentence, like this sentence bellow: (appendix A. 3.a)

“What does the future hold for ASEAN?”

Here is the representative using three method parse of the data above.

a) Bracketing

The researcher analyzed the sentence using bracketing of parsing model analysis, this model have fourth level for analyzing the sentence. Those are:

i. First level: sentence level

[What does the future hold for ASEAN?]

The bracket marked to identify the sentence in this first level.

ii. Second level: clause level

[What [does the future hold for ASEAN?]]

After first level, the brackets separated and marked the clauses of the sentence. The result marks one clause. That is ‘*does the future hold for ASEAN*’.

iii. Third level: phrase level

[[What] [[does [the future hold] [for [ASEAN?]]]]]

This level, the brackets separated and marked the phrase of the sentence. Those are; NP (‘*What*’, ‘*the future hold*’, ‘*ASEAN*’), VP (‘*does the future hold for ASEAN*’), and PP (‘*for ASEAN*’).

iv. Fourth level: word level

[[[What]] [[[does] [[the] [future hold]]] [[for] [[ASEAN?]]]]]]]

Finally, the brackets separated and marked the word of the sentence, those are; Noun/ Question word (*'what'*, *'future hold'*, *'ASEAN'*), Verb (*'does'*), Article (*'the'*), Preposition (*'for'*).

b) Labeled Bracketing

The researcher analyzed the sentence using labeled bracketing of parsing model analysis, this model have fourth level for analyzing the sentence. Those are:

i. First level

[S1 **What does the future hold** for ASEAN?]

The bracket and label marked and labeled to identify the sentence use symbol S1.

ii. Second level

[S1 **What** [S2 **does the future hold** for ASEAN?]]

After in the first level, the brackets separated and labeled the clauses of the sentence (S1) with symbol. The result marks one clause. That is S2 (*'does the future hold for ASEAN'*).

iii. Third level

[S1[NP **What**][S2[VP **does** [NP **the future hold**] [PP for [NP ASEAN?]]]]]

This level, the brackets separated and used labels to mark the phrases of the sentence (S1) with symbol, those are; NP (*'what'*, *'the future hold'*, *'ASEAN'*), VP (*'does the future hold for ASEAN'*), and PP (*'for ASEAN'*).

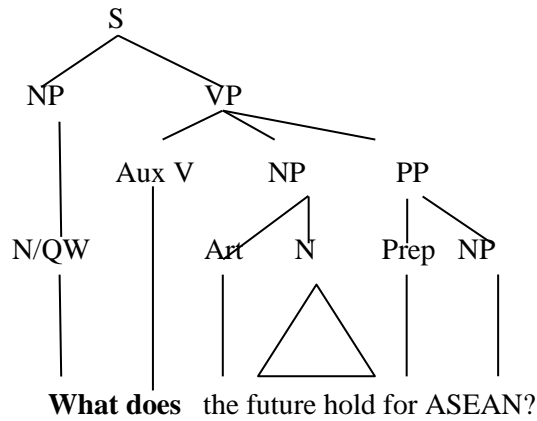

iv. Fourth level

[S1[NP[N/QW **What**]][S2[VP[V **does**] [NP [Art **the**] [N **future hold**]]] [PP[Prep for] [NP [N ASEAN?]]]]]

Finally, the brackets separated and used label the words of the sentence (S1) with symbol, those are; Noun/ Question word (*'what'*, *'future hold'*, *'ASEAN'*), Verb (*'does'*), Article (*'the'*), and Preposition (*'for'*).

c) Tree Diagram

The researcher analyzed the sentence using tree diagram of parsing model analysis.

The tree diagram provides the analysis of the whole sentence S is expanded NP (**What**) and VP (**does the future hold for ASEAN**). They also expanded appropriate the constituency above.

Phrase structure tree pattern:

$S \rightarrow NP + VP$ $NP \rightarrow N/QW$

$VP \rightarrow Aux\ V + NP + PP$ $NP \rightarrow Art + N$

$PP \rightarrow Prep + NP$

2) Exclamation

Exclamations often have the same structure as a **negative question**. The researcher found the inversion sentence used it, like this sentence bellow:

(The researcher not found this type on the object of research)

3) With “may”

“May” can come before the subject in **wishes**. The researcher found the inversion sentence used it, like this sentence bellow:

(The researcher not found this type on the object of research)

4) After “so, neither/ nor”

The researcher found the inversion sentence used it. There is one Inversion happens in ‘short answers’ and similar structure, those words are followed by “so/ neither/ nor + auxiliary verb + subject”, like this sentence bellow: (appendix A.3.d)

“Families come in all shapes and sizes and of course while people get married as man and woman, there are those who transition along the way, **so does this mean** their marriage is no longer valid?”

Here is the representative using three method parse of the data above.

“**So** does this mean their marriage is no longer valid?”

a) Bracketing

The researcher analyzed the sentence using bracketing of parsing model analysis, this model have fourth level for analyzing the sentence. Those are:

i. First level: sentence level

[**So does this mean** their marriage is no longer valid?]

The bracket marked to identify the sentence in this first level.

ii. Second level: clause level

[[**So does this mean**][their marriage is no longer valid?]]

After first level, the brackets separated and marked the clauses of the sentence. The result marks are two clauses (‘*So does this mean*’, ‘*their marriage in no longer valid*’).

iii. Third level: phrase level

[[**So [does this mean]**][their marriage]] is [[no longer valid?]]]

This level, the brackets separated and marked the phrase of the sentence, those are; NP (‘*does this mean*’, and ‘*their marriage*’) and VP (‘*their marriage is no longer valid*’).

iv. Fourth level: word level

[[**[So] [[does] [this] [mean]]**][[their] [marriage]][is][[no longer] [valid?]]]]

Finally, the brackets separated and marked the word of the sentence, those are; Adverb ('So'), Auxiliary ('does'), Determiner ('this'), Noun ('mean', 'their marriage'), Verb ('no longer valid'), and Auxiliary ('is').

b) Labeled Bracketing

The researcher analyzed the sentence using labeled bracketing of parsing model analysis, this model have fourth level for analyzing the sentence. Those are:

i. First level

[S₁ **So does this mean** their marriage is no longer valid?]

The bracket and label marked and labeled to identify the sentence using symbol S1.

ii. Second level

[S₁[S₂ **So does this mean**][S₃ their marriage is no longer valid?]]

After in the first level, the brackets separated, marked and labeled the clauses of the sentence (S1) with symbol. The result mark are two clauses, those are S2 ('So does this mean') and S3 ('their marriage in no longer valid').

iii. Third level

[S₁[S₂ **So** [NP **does this mean**][S₃[VP[NP their marriage] is no longer valid?]]]

In this level, the brackets separated and used labels to mark the phrases of the sentence (S1) with symbol, those are; NP ('does this mean', 'their marriage') and VP ('their marriage is no longer valid').

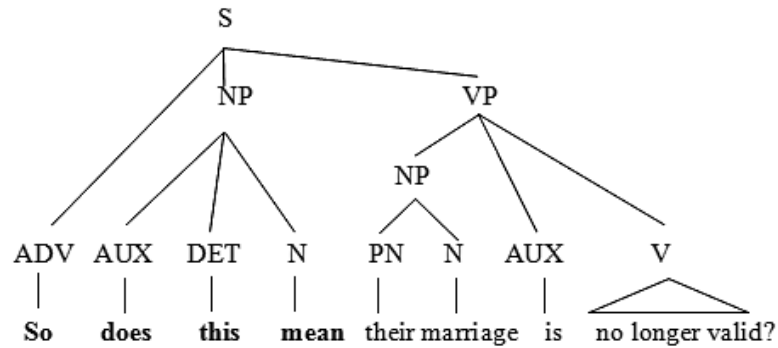

iv. Fourth level

[S₁[S₂ [Adv **So**] [NP[Aux **does**] [Det **this**] [N **mean**][S₃[VP[NP[PN their] [N marriage]]][Aux is]][v no longer valid?]]]]]

Finally, the brackets separated and used label to mark the words of the sentence (S1) with symbol, those are; Adverb ('So'), Auxiliary ('does'), Determiner ('this'), Noun ('mean', 'marriage'), Proper Noun ('their'), Verb ('no longer valid'), and Auxiliary ('is').

c) Tree Diagram

The researcher tries to analyze the sentence using tree diagram of parsing model analysis.

The tree diagram provides the analysis of the whole sentence S is expanded ADV (So), NP (does this mean), and VP (their marriage is no longer valid). They also expanded appropriate the constituency above.

Phrase structure tree pattern:

$S \rightarrow \text{ADV} + \text{NP} + \text{VP}$ $\text{NP} \rightarrow \text{AUX} + \text{DET} + \text{N}$

$\text{VP} \rightarrow \text{NP} + \text{AUX} + \text{V}$ $\text{NP} \rightarrow \text{PN} + \text{N}$

5) After negative and restrictive

If a **negative adverb or adverbial expression** is put at the beginning of a clause for emphasis, it is usually followed by **auxiliary verb + subject**. These structures are mostly rather formal.

The researcher found the inversion sentence used it, like this sentence bellow:

(The researcher not found this type on the object of research)

6) After “as, than, and so”

The researcher found the inversion sentence used it, there are four Inversions sometimes happen after “as, than and emphasizing so” in a literary style, like this sentence bellow: (appendix A.3.f)

“Notably, THBS2 concentrations combined with CA199 identified early stages better **than** any other known method.”

Here is the representative using three method parse of the data above.

a) Bracketing

The researcher analyzed the sentence using bracketing of parsing model analysis, this model have fourth level for analyzing the sentence. Those are:

i. First level: sentence level

[Notably, THBS2 concentrations combined with CA199 identified early stages better **than** any other known method]

The bracket marked the sentence in this first level.

ii. Second level: clause level

[[Notably, [THBS2 concentrations combined with [CA199]] identified early stages better] **than** [any other known method]]

After first level, the brackets separated and marked the clauses of the sentence. The result marks are three clauses. Those are ‘*Notably, THBS2 concentrations combined with CA199*’, ‘*THBS2 concentrations combined with CA199*’, ‘*CA199 identified early stages better*’, and ‘*any other known method*’.

iii. Third level: phrase level

[[Notably,[[THBS2 concentrations][combined with [[CA199]]]] [identified [early stages] better]] **than** [[any other] [known [method]]]]

This level, the brackets separated and marked the phrase of the sentence. Those are; NP (‘*THBS2 concentrations*’, ‘*CA199*’, ‘*any other*’, ‘*method*’), VP (‘*combined with CA199*’, ‘*identified early stages better*’).

iv. Fourth level: word level

[[[Notably],[[THBS2][concentrations]][[combined][with] [[[CA199]]]]] [[identified] [[early] [stages]] [better]]] **than** [[[any][other]] [[known] [[method]]]]]

Finally, the brackets separated and marked the word of the sentence, those are; Adverb (‘*Notably*’), Noun (‘*concentrations*’, ‘*marriage*’, ‘*CA199*’, ‘*stages*’, ‘*other*’, ‘*method*’), Proper Noun (‘*THBS2*’), Verb

(‘combined’, ‘identified’, ‘known’), Conjunction (‘with’, ‘than’), and Adjective (‘early’, ‘better’, ‘any’).

b) Labeled Bracketing

The researcher analyzed the sentence using labeled bracketing of parsing model analysis, this model have fourth level for analyzing the sentence. Those are:

i. First level

[_{S1}Notably, THBS2 concentrations combined with CA199 identified early stages better **than** any other known method]

The bracket and label marked and labeled the sentence using symbol S1.

ii. Second level

[_{S1}[_{S2} Notably, [_{S3} THBS2 concentrations combined with [_{S4} CA199]] identified early stages better] **than** [_{S5} any other known method]]

After in the first level, the brackets separated and used labels to mark the clauses of the sentence (S1) with symbol. The result marks are three clauses. Those are S2 (‘Notably, THBS2 concentrations combined with CA199’), S3 (‘THBS2 concentrations combined with CA199’), S4 (‘CA199 identified early stages better’), and S5 (‘any other known method’).

iii. Third level

[_{S1}[_{S2} Notably,[_{S3}[_{NP} THBS2 concentrations][_{VP} combined with [_{S4}[_{NP} CA199]]]] [_{VP} identified [_{NP} early stages] better]] **than** [_{S5}[_{NP} any other] [_{VP} known [_{NP} method]]]]

This level, the brackets separated and used labels to mark the phrases of the sentence (S1) with symbol, those are; NP (‘THBS2 concentrations’, ‘CA199’, ‘any other’, ‘method’), VP (‘combined with CA199’, ‘identified early stages better’).

iv. Fourth level

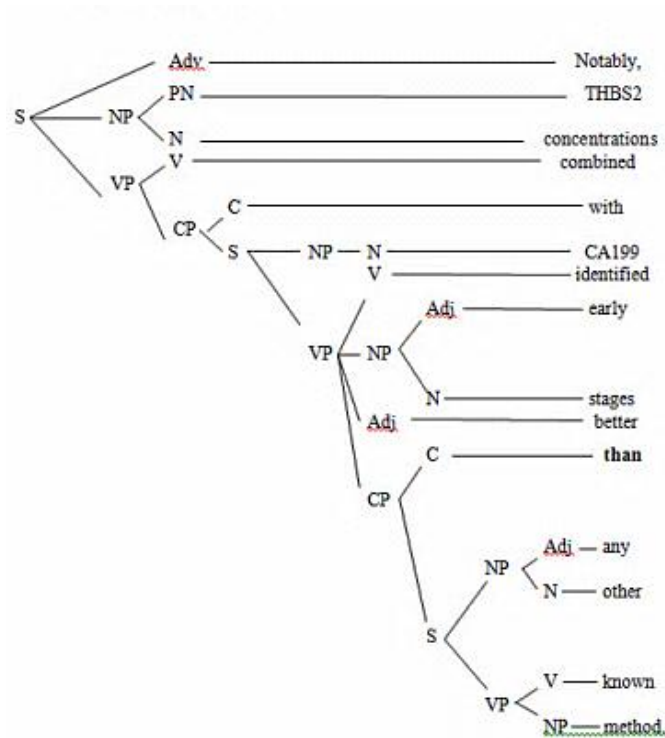

[_{S1}[_{S2}[_{Adv} Notably],[_{S3}[_{NP}[_{PN} THBS2][_N concentrations]]][_{VP}[_v combined] [_{Conj} with] [_{S4}[_{NP}[_N CA199]]]]] [_{VP}[_v identified] [_{NP}[_{Adj} early] [_N

stages]]][Adj better]]] [Conj **than**] [S₅[NP[Adj any]][N other]][VP[v known]][NP[N method]]]]]]

Finally, the brackets separated and used label to mark the words of the sentence (S1) with symbol, those are; Adverb ('*Notably*'), Noun ('*concentrations*', '*marriage*', '*CA199*', '*stages*', '*other*', '*method*'), Proper Noun ('*THBS2*'), Verb ('*combined*', '*identified*', '*known*'), Conjunction ('*with*', '*than*'), and Adjective ('*early*', '*better*', '*any*').

c) Tree Diagram

The researcher analyzed the sentence using tree diagram of parsing model analysis.

(The researcher draw vertical tree diagram, it cause the sentence is long to draw horizontal tree diagram)

The tree diagram provides the analysis of the whole sentence S is expanded Adv (*Notably*), NP (*THBS2 concentrations*), and VP (*combined with CA199 identified early stages better **than** any other known method*). They also expanded appropriate the constituency above.

Phrase structure tree pattern:

| | |
|---|---|
| $S \rightarrow \text{Adv} + \text{NP} + \text{VP}$ | $\text{NP} \rightarrow \text{PN} + \text{N}$ |
| $\text{VP} \rightarrow \text{V} + \text{CP}$ | $\text{CP} \rightarrow \text{C} + \text{S}$ |
| $S \rightarrow \text{NP} + \text{VP}$ | $\text{NP} \rightarrow \text{N}$ |
| $\text{VP} \rightarrow \text{V} + \text{NP} + \text{Adj} + \text{CP}$ | $\text{NP} \rightarrow \text{Adj} + \text{N}$ |
| $\text{CP} \rightarrow \text{C} + \text{S}$ | $S \rightarrow \text{NP} + \text{VP}$ |
| $\text{NP} \rightarrow \text{Adj} + \text{N}$ | $\text{VP} \rightarrow \text{V} + \text{NP}$ |

7) Conditional clauses with “if”

The researcher found the inversion sentence used it, there are nine Inversions happen an auxiliary verb can be put before the subject instead of using “if”, like this sentence bellow: (appendix A.3.g)

“If we are sad, it will have negative impacts on our immune system.”

Here is the representative using three method parse of the data above.

a) Bracketing

The researcher analyzed the sentence using bracketing of parsing model analysis, this model have fourth level for analyzing the sentence. Those are:

i. First level: sentence level

[If we are sad, it will have negative impacts on our immune system.]

The bracket marked to identify the sentence in this first level.

ii. Second level: clause level

[[If [we are sad]], [it will have negative impacts on our immune system.]]

After first level, the brackets separated and marked the clauses of the sentence. The result marks are three clauses, those are *‘If we are sad’*, *‘we are sad’*, and *‘it will have negative impacts on our immune system’*.

iii. Third level: phrase level

[[**If** [[we are] [sad]]], [[it will] [have [negative impacts] [on [our immune system.]]]]]

This level, the brackets separated and marked the phrase of the sentence, those are; NP ('we are', 'it will', 'our immune system'), VP ('sad', 'have negative impacts on our immune system'), and PP ('on our immune system').

iv. Fourth level: word level

[[[**If**] [[we][are]] [[sad]]], [[it][will]] [[have] [[negative] [impacts]] [[on] [[our] [immune][system.]]]]]

Finally, the brackets separated and marked the word of the sentence, those are; Conjunction ('if'), Noun ('we', 'it', 'impacts', and 'system'), Proper Noun ('our'), Auxiliary ('are'), Verb ('sad', 'have'), Determiner ('will'), Preposition ('on'), and Adjective ('negative', 'immune').

b) Labeled Bracketing

The researcher analyzed the sentence using labeled bracketing of parsing model analysis, this model have fourth level for analyzing the sentence. Those are:

i. First level

[_{S1} **If** we are sad, it will have negative impacts on our immune system.]

The bracket and label marked and labeled the sentence using symbol S1.

ii. Second level

[_{S1}[_{S2} **If** [_{S3}we are sad]], [_{S4} it will have negative impacts on our immune system.]]

After in the first level, the brackets separated and labeled to mark the clauses of the sentence (S1) with symbol. The result marks are 3 clauses, those are S2 ('If we are sad'), S3 ('we are sad'), and S4 ('it will have negative impacts on our immune system').

iii. Third level

[S1[S2 **If** [S3[NP we are] [VP sad]]], [S4[NP it will] [VP have [NP negative impacts] [PP on [NP our immune system.]]]]]

This level, the brackets separated and used labels to mark the phrases of the sentence (S1) with symbol, those are; NP ('we are', 'it will', 'our immune system'), VP ('sad', 'have negative impacts on our immune system'), and PP ('on our immune system').

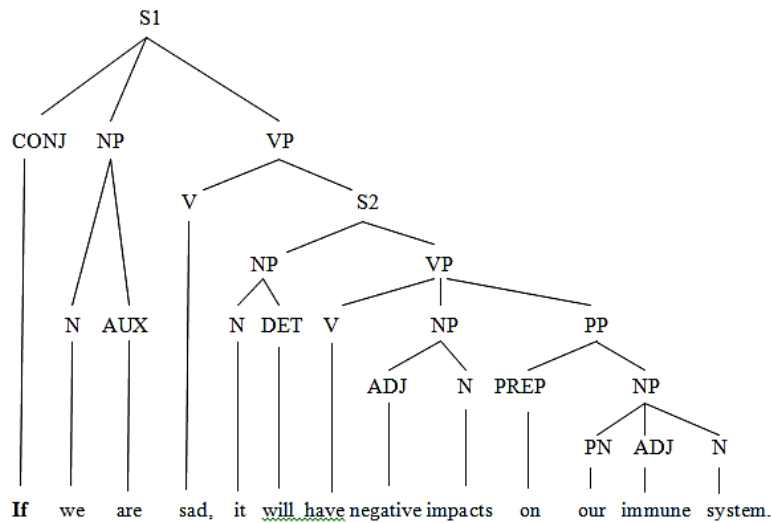

iv. Fourth level

[S1[S2[Conj **If**][S3[NP[N we][AUX are]] [VP[V sad]]]], [S4[NP[N it][Det will]] [VP[V have][NP[Adj negative][N impacts]]] [PP[Prep on] [NP[PN our] [Adj immune][N system.]]]]]

Finally, the brackets separated and used label to mark the words of the sentence (S1) with symbol, those are; Conjunction ('if'), Noun ('we', 'it', 'impacts', and 'system'), Proper Noun ('our'), Auxiliary ('are'), Verb ('sad', 'have'), Determiner ('will'), Preposition ('on'), and Adjective ('negative', 'immune').

c) Tree Diagram

The researcher analyzed the sentence using tree diagram of parsing model analysis.

The tree diagram provides the analysis of the whole sentence S1 is expanded CONJ (If), NP (we are), and VP (sad, it will have negative impacts on our immune system). They also expanded too like the constituency above.

Phrase structure tree pattern:

| | |
|-------------------------------|------------|
| S1 → CONJ+NP+VP | NP→N+AUX |
| VP→V+S2 | S2→NP+VP |
| NP→N+DET | VP→V+NP+PP |
| NP→ADJ+N | PP→PREP+NP |
| NP→PN+ADJ+N | |

d. Whole verb before subject.

1) After adverbial expression of place

The researcher found the inversion sentence used it, there are twenty Inversions happen when an adverbial expression of place or direction comes at the beginning of a clause; intransitive verbs are often put before their subjects, like this sentence bellow: (appendix 4.a)

“**On** a trip to Sunni-ruled Saudi Arabia in May, Trump called on all nations to ‘Isolated’ Shiite Iran.”

Here is the representative using three method parse of the data above.

a) Bracketing

The researcher analyzed the sentence using bracketing of parsing model analysis, this model have fourth level for analyzing the sentence. Those are:

i. First level: sentence level

[**On** a trip to Sunni-ruled Saudi Arabia in May, Trump called on all nations to ‘Isolated’ Shiite Iran.]

The bracket marked the sentence in this first level.

ii. Second level: clause level

[[**On** a trip to Sunni-ruled Saudi Arabia in May], [Trump called on all nations to 'Isolated' Shiite Iran.]]

After first level, the brackets separated and marked the clauses of the sentence. The result marks are two clauses, those are 'On a trip to Sunni-ruled Saudi Arabia in May', and 'Trump called on all nations to 'Isolated' Shiite Iran'.]

iii. Third level: phrase level

[[**On** [a trip[to Sunni]]-ruled [Saudi Arabia [in May]]], [[Trump][called on [all nations]] [to 'Isolated' [Shiite Iran.]]]]

This level, the brackets separated and marked the phrase of the sentence. Those are; NP ('a trip to Sunni', 'Saudi Arabia in May', 'Trump', 'all nations', and 'Shiite Iran'), VP ('called on all nations', 'to 'Isolated' Shiite Iran'), and PP ('to Sunni', 'in May').

iv. Fourth level: word level

[[**On**][a trip][to][Sunni]]-ruled [[Saudi Arabia] [[in][May]]], [[Trump][called] [on] [[all][nations]]] [[to] ['Isolated'] [[Shiite] [Iran.]]]]

Finally, the brackets separated and marked the word of the sentence, those are; Adverb ('On', 'ruled'), Noun ('a trip', 'Sunni', 'Saudi Arabia', 'May', 'Trump', 'nations', 'Shiite'), Preposition ('to', 'in', 'on', and 'to'), Verb ('called', 'Isolated'), Proper Noun ('Shiite'), and Determiner ('all').

b) Labeled Bracketing

The researcher analyzed the sentence using labeled bracketing of parsing model analysis, this model have fourth level for analyzing the sentence. Those are:

i. First level

[S1 **On** a trip to Sunni-ruled Saudi Arabia in May, Trump called on all nations to 'Isolated' Shiite Iran.]

The bracket and label marked and labeled to identify the sentence using symbol S1.

ii. Second level

[S₁[S₂ **On** a trip to Sunni-ruled Saudi Arabia in May], [S₃ Trump called on all nations to ‘Isolated’ Shiite Iran.]]

After in the first level, the brackets separated and labeled to mark the clauses of the sentence (S₁) with symbol. The result marks are two clauses, those are S₂ (‘*On a trip to Sunni-ruled Saudi Arabia in May*’) and S₃ (‘*Trump called on all nations to ‘Isolated’ Shiite Iran*’).

iii. Third level

[S₁[S₂ **On** [NP a trip[PP to Sunni]]-ruled [NP Saudi Arabia [PP in May]]], [S₃[NP Trump][VP called on [NP all nations]] [VP to ‘Isolated’ [NP Shiite Iran.]]]]

This level, the brackets separated and used labels to mark the phrases of the sentence (S₁) with symbol, those are; NP (‘*a trip to Sunni*’, ‘*Saudi Arabia in May*’, ‘*Trump*’, ‘*all nations*’, and ‘*Shiite Iran*’), VP (‘*called on all nations*’, ‘*to ‘Isolated’ Shiite Iran*’), and PP (‘*to Sunni*’, ‘*in May*’).

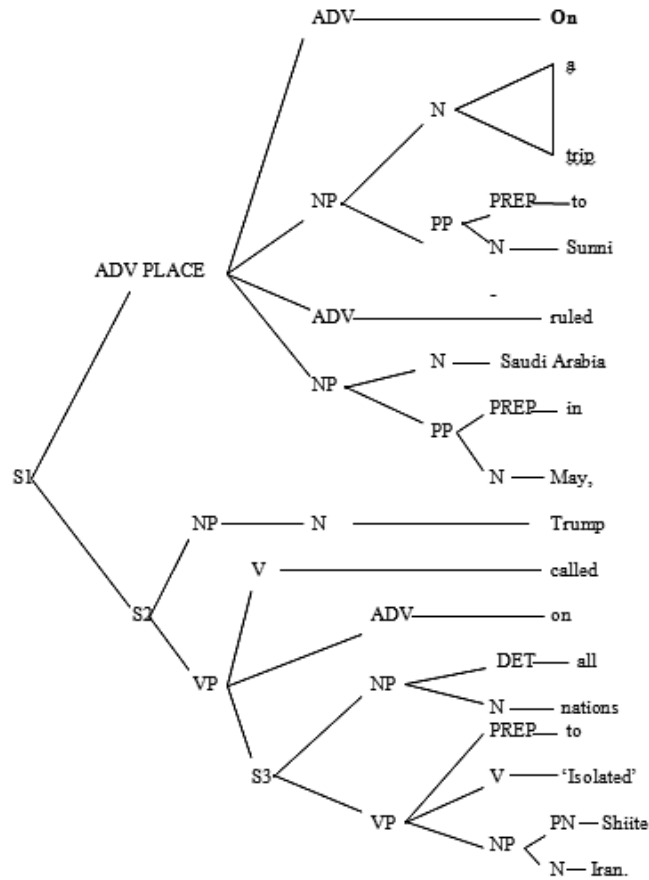

iv. Fourth level

[S₁[S₂[Adv **On**][NP[N a trip][PP[Prep to][N Sunni]]]-[Adv ruled] [NP[N Saudi Arabia] [PP[Prep in][N May]]]], [S₃[NP[N Trump]][VP[V called] [Prep on] [NP[Det all][N nations]]] [VP[Prep to] [V ‘Isolated’] [NP[PN Shiite] [N Iran.]]]]]

Finally, the brackets separated and used label to mark the words of the sentence (S₁) with symbols, those are; Adverb (‘*On*’, ‘*ruled*’), Noun (‘*a trip*’, ‘*Sunni*’, ‘*Saudi Arabia*’, ‘*May*’, ‘*Trump*’, ‘*nations*’, ‘*Shiite*’), Preposition (‘*to*’, ‘*in*’, ‘*on*’, and ‘*to*’), Verb (‘*called*’, ‘*Isolated*’), Proper Noun (‘*Shiite*’), and Determiner (‘*all*’).

c) Tree Diagram

The researcher analyzed the sentence using tree diagram of parsing model analysis.

(The researcher draw verticals tree diagram, it cause the sentence to long for horizontal tree diagram)

The tree diagram provides the analysis of the whole sentence S1 is expanded ADV PLACE (**On** a trip to Sunni-ruled Saudi Arabia in May) and S2 (Trump called on all nations to 'Isolated' Shiite Iran). They also expanded appropriate the constituency above.

Phrase structure tree pattern:

S1→ADV PLACE+S2

ADV PLACE→ADV+NP+ADV+NP

NP→N+PP

PP→PREP+N

NP→N+PP

PP→PREP+N

S2→NP+VP

NP→N

VP→V+ADV+S3

S3→NP+VP

NP→DET+N

VP→PREP+V+NP

NP→PN+N

2) Reporting

The researcher found the inversion sentence used it, there are seventy five Inversions happen when the subject often comes after reporting verbs like **said, asked, suggested etc** when these follow direct speech, like this sentence bellow: (appendix A.4.b)

“You have to make the best of the circumstances,” **said** Klopp.

Here is the representative using three method parse of the data above.

a) Bracketing

The researcher analyzed the sentence using bracketing of parsing model analysis, this model have fourth level for analyzing the sentence. Those are:

i. First level: sentence level

“[You have to make the best of the circumstances,” **said** Klopp]

The bracket marked the sentence in this first level.

ii. Second level: clause level

“[[[You have to make the best] of the circumstances,]” [(it) **said** Klopp]]

After first level, the brackets separated and marked the clauses of the sentence. The result marks are three clauses, those are ‘*You have to make the best*’, ‘*You have to make the best of the circumstances*’, and ‘*(it) said Klopp*’.

- iii. Third level: phrase level
 “[[[[[You have] [to make the best] [of [the circumstances,]]]]]” [[(it)] [**said** [Klopp]]]]

This level, the brackets separated and marked the phrase of the sentence. Those are; NP (‘*You have*’, ‘*the circumstances*’, ‘*it*’, and ‘*Klopp*’), VP (‘*to make the best of the circumstances*’, ‘*said Klopp*’), and PP (‘*of the circumstances*’).

- iv. Fourth level: word level
 “[[[[[[[You] [have]] [[to] [make] [the] [best]] [[of] [[the] [circumstances,]]]]]]]” [[[it]]] [[**said** [[Klopp]]]]]

Finally, the brackets separated and marked the word of the sentence, those are; Noun (‘*You*’, ‘*circumstances*’, ‘*it*’, and ‘*Klopp*’), Auxiliary (‘*have*’), Verb (‘*make*’ and ‘*said*’), Preposition (‘*of*’), Adjective (‘*best*’),and (‘*the*’ and ‘*the*’).

b) Labeled Bracketing

The researcher analyzed the sentence using labeled bracketing of parsing model analysis, this model have fourth level for analyzing the sentence. Those are:

- i. First level
 “[_{S1} You have to make the best of the circumstances,]” **said** Klopp]

The bracket and label marked and labeled the sentence using symbol S1.

- ii. Second level
 “[_{S1}[_{S2}[_{S3} You have to make the best] of the circumstances,]” [_{S4} (it) **said** Klopp]]

After in the first level, the brackets separated and labeled to mark the clauses of the sentence (S1) with symbol. The result marks are three clauses, those are S2 (‘*You have to make the best*’), S3 (‘*You have to make the best of the circumstances*’), and S4 (‘*it said Klopp*’).

- iii. Third level
 “[_{S1}[_{S2}[_{S3}[_{NP} You have] [_{VP} to make the best] [_{PP} of [_{NP} the circumstances,]]]]]” [_{S4}[_{NP} (it)] [_{VP} **said** [_{NP} Klopp]]]]]

This level, the brackets separated and used labels to mark the phrases of the sentence (S1) with symbol, those are; NP ('You have', 'the circumstances', '(it)', and 'Klopp'), VP ('to make the best of the circumstances', 'said Klopp'), and PP ('of the circumstances').

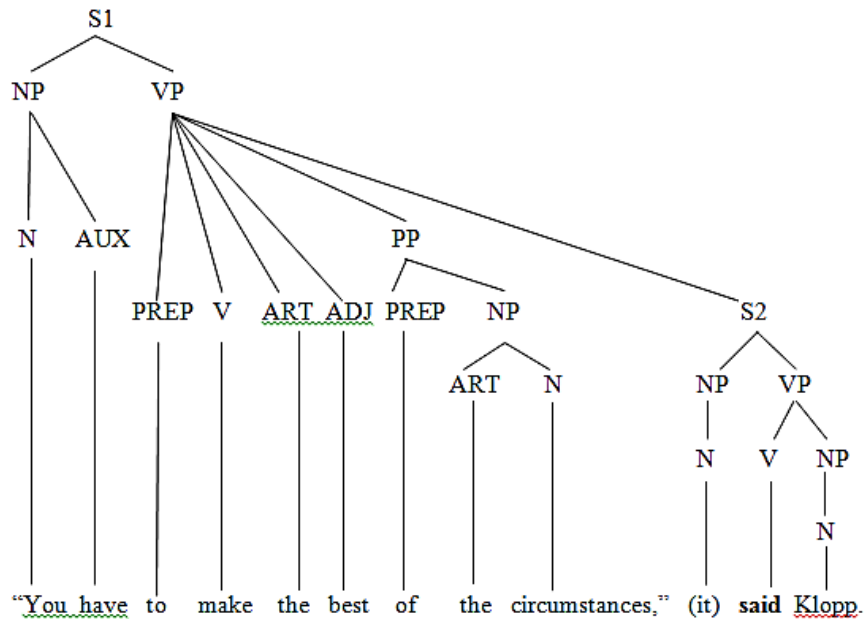

iv. Fourth level

“[S1[S2[S3[NP[N You] [Aux have]] [VP[Prep to] [v make] [Art the] [Adj best] [PP[Prep of] [NP[Art the] [N circumstances,]]]]]]]” [S4[NP[N (it)]] [VP[v **said**] [NP[N Klopp]]]]]

Finally, the brackets separated and used label to mark the words of the sentence (S1) with symbol, those are; Noun ('You', 'circumstances', '(it)', and 'Klopp'), Auxiliary ('have'), Verb ('make' and 'said'), Preposition ('of'), Adjective ('best'), and ('the' and 'the').

c) Tree Diagram

The researcher analyzed the sentence using tree diagram of parsing model analysis.

- b. The student must read comprehending the reading material, especially *The Jakarta Post*. It can build their syntactic awareness to identify the sentences. Moreover, the student gets information and entertains material to enrich their knowledge from their reading.
- c. Through trying and practicing, the students will definitely feel that they can know their mistake in writing and progress on their own writing work since they get English inversion in a good way. The students should use English inversion appropriately to improve their writing skills.

The students of advanced learner may take the factual text as newspaper for his/her model in writing text. It helps the students to develop their writing ability and syntactic awareness.

The researcher hope student ELT got material from Jakarta post to improve their skill and abilities; the Jakarta post made their writing have good quality to offers the reader. It made variation of vocabulary mastery for the student ELT as example to improve their writing skill, it also can enrich their knowledge about entertain and information. Furthermore, it hopes the student could as good writer with more variation to improve their writing in activity of learning process class room.

The researcher wishes that this research gives more contribution to writing course, syntax and grammar. It is dedicated to who interested in writing and English study, especially at English Language Education Department in Education and Teacher Training Faculty of Walisongo State University of Islamic Studies Semarang.

B. Discussion

The researcher explained and elaborated Inversions found in *The Jakarta Post* issued (on Wednesday, July 19, 2017, Twenty-Four Pages Vol, 35 No, 066. WWW.JAKARTAPOST.COM), the researcher identified Inversions in *The Jakarta Post* and found out the structure phrase of using Inversion with three model parsing analysis of the sentence.

After identified the words, phrases, clauses, or sentences in *The Jakarta Post* using three model parsing sentence, the researcher found out that the use of Inversion has some purposes according to its usage and context (focusing on the message and information).

From the identification, the researcher hopes it can be a reference both for teacher and students in teaching and learning writing, especially English language study. In advance writing, we have good skills and abilities to give more understanding the knowledge in getting a good writing. The students not only learn how to make good writing, but also they add their knowledge in the way of getting communicative to reader like in *The Jakarta Post* writing content as model of advanced and communicative writing.

CHAPTER V

CONCLUSION AND SUGGESTION

This chapter presents three sections, conclusion, suggestion and closing. After analyzing and interpreting the obtained data in the previous chapter, the conclusion is taken as last part of the research. The conclusion below is the answer of research question. Then, the following part of this chapter is suggestion to the next research.

A. CONCLUSION

The researcher would like to give conclusion related to what has been explained and discussed in the previous chapter. Based on the finding of the data analysis presented in the previous chapter the researcher concludes this research.

The Jakarta Post is newspaper written in English. In writing it to the English language, they convey idea, issue, and rumor without changing the meaning. They tried to find out the natural language of English. Usually, the newspaper is using *anastrophe* is a literary technique in which the normal order of words is reversed in order to achieve a particular effect of emphasis or meter. After the researcher comprehending and analyzing to find out grammatical English Inversions using three model parsing to analyze *the Jakarta Post* (on Wednesday, July 19, 2017, Twenty-Four Pages Vol, 35 No, 066. WWW.JAKARTAPOST.COM), the researcher concludes as follow;

1. Inversion is rules that will change or move constituents in the structure derived from the phrase structure rules, it happens when we reverse (invert) the normal word order of a structure, most commonly the subject-verb word order. *The Jakarta Post* used them in many types.
2. Inversion found in *the Jakarta Post* (on Wednesday, July 19, 2017, Twenty-Four Pages Vol, 35 No, 066) are 11 types inversions. It containing 278 inversions sentences, 82 inversions adverbial before subject consist of Adverb + Noun phrase, 81 inversions used relative clause transformation contain a relative pronoun such as “who (or whom or whose), which or that”, 4

inversions question consist of Auxiliary verb + subject + verb or QW + Auxiliary verb + subject + verb, 1 inversion after “so” (short answers) consist of so/ neither/ nor + auxiliary verb + subject, 4 inversions after “than” (comparison), 9 inversions with conditional clauses “if”, 20 inversions using adverbial expression place comes at the beginning of a clause, intransitive verbs are often put before their subjects, 75 inversions using reporting verbs.

B. SUGGESTION

According to the study, after analyzing and presenting data in this research the researcher gives some suggestions for the readers, teacher and English Education Department of Education and Teacher Training Faculty of Walisongo State University of Islamic Studies.

By reviewing this study, the first is reader. The readers will acquire valuable information related to Linguistics branch especially Syntax that will enrich their knowledge. The researcher hopes it will help them to learn about Syntax specifically about Phrase structure trees and Phrase structure rules, so that they will find out the trend of language structure used in any media of communication including the written one like newspaper.

The researcher stated above that Linguistics is an interesting subject, especially Syntax. It would be also interesting if the future researcher will analyze the *Jakarta Post* with different field in Syntax. The researcher should know that doing research about Syntax is interesting and challenging, because the researchers are able to develop their knowledge and understanding about sentence structure. It is expected that people who are interested in the same topic being more critical in analyzing the data. By reading this thesis, the readers are expected to get information and to enrich their knowledge about English grammatical Inversions and writing theory, especially in finding good written in English.

The second, teacher as the professional one in teaching process, researcher hoped can explain more syntactic analysis and using parsing model analysis for English grammatical Inversion and give examples to make students easy to understand.

The third, this research hopefully will be useful for English Education Department of Education & Teacher Training Faculty of Walisongo State University of Islamic Studies to enrich the sources of syntax and grammar studies which is definitely necessary to help English teaching.

The last, the researcher realizes that this final project is far from being perfect, so that constructive critics and advice is really expected for the perfection of this final project. Hopefully this final project will be useful for everyone in the future. Amen.

APPENDIXES

APPENDIX A

Inversion found *The Jakarta Post* (on Wednesday, July 19, 2017, Twenty-Four Pages Vol, 35 No, 066. WWW.JAKARTAPOST.COM).

1. Inversion happens when adverb before subject.

| No | Inversion | Adverbial | Subject/ Noun Phrase | Title |
|----|---|--|----------------------|---|
| 1. | <u>On normal days the trip</u> can be made three or four hours. | On normal days | The trip | “Roadwork blamed for nightmarish jams”, 5 th paragraph, p. 1. |
| 2. | <u>On Tuesday, the toll road</u> returned to normal, which means it was still crowded with private vehicle and trucks travelling to and from the industrial zones in Bekasi. | On Tuesday | The toll road | “Roadwork blamed for nightmarish jams”, 15 th paragraph, p. 1. |
| 3. | <u>Aside from the decline in passenger numbers, he</u> added, the traffic jam also caused delays in the shuttle’s hourly schedule. | Aside from the decline in passenger numbers | he | “Roadwork blamed for nightmarish jams”, 19 th paragraph, p. 1. |

| | | | | |
|----|--|---|---|--|
| 4. | <u>After months of certainty, the Indonesian Asian Games Committee (Inasgoc)</u> has finally decided to hold a test event for the 2018 Asian Games in February next year in a bid to ascertain the country's readiness to host the competition. | After months of certainty | the Indonesian Asian Games Committee (Inasgoc) | “Short-funded Indonesia to hold test event in February”, 1 st paragraph, p. 2. |
| 5. | <u>Initially, Inasgoc</u> had planned to invite 10 countries to take part in February's test event. | Initially | Inasgoc | “Short-funded Indonesia to hold test event in February”, 12 th paragraph, p. 2. |
| 6. | <u>With more than 336,000 YouTube subscriber and counting, the former furniture trader</u> has managed to hold his own as one of Indonesia's popular vloggers, and he joins the growing community of world leader using social media to have a real impact. | With more than 336,000 YouTube subscriber and counting | the former furniture trader | “Jokowi rising to global leadership”, 14 th paragraph, p. 2. |
| 7. | <u>Previously, Hary</u> challenged his suspect status through a pretrial motion. | Previously | Hary | “Hary Tanoë case dossier returned”, 3 rd paragraph, p. 3. |
| 8. | <u>An early advocate of healthier living to stave off the ills of</u> | An early advocate of healthier living | Hinohara | “Japanese doctor dies at age 105”, 5 th paragraph, p. |

| | | | | |
|----|---|--|--|---|
| | ageing, Hinohara in 1954 introduced Japan's so-called "human dry-dock" system of comprehensive annual physical exams, part of the preventive medical system said to contribute to Japan's longevity. | to stave off the ills of ageing | | 11. |
| 9. | <u>Prior to the announcement, Iqbal</u> arrived on a Honda CB motorcycle, Dilan's favorite ride in the novel, <i>kapan-lagi.com</i> reported. | Prior to the announcement | Iqbal | "Iqbal cas as Dilan in movie of novel", 5 th paragraph, p. 24. |
| 10 | <u>Previously, a government-commissioned study</u> showed that East Natuna would only be economically feasible if future contractor obtained 100 percent of the profits, leaving the government only to reap revenues from taxes." | Previously | a government-commissioned study | "East Natuna gas block loses Exxon Mobil", 15 th paragraph, p. 13. |
| 11 | <u>After the Perpuu approval, the House</u> plans to deliberate the general taxation bill. | After the Perpuu approval | the House | "BI seeks support for redenomination", 9 th paragraph, p. 14. |
| 12 | <u>Even after the bill is passed into law, it</u> | Even after the bill is passed | it | "BI seeks support for |

| | | | | |
|----|---|---------------------------------------|---|--|
| | will take around seven years before Indonesians will see fewer zeros on their banknotes after the preparation and public education efforts. | into law | | redenomination”, 19 th paragraph, p. 14. |
| 13 | <u>After all, while macro conditions</u> are still genial for now, future turbulence is quite probable. | After all | while macro conditions | “BI seeks support for redenomination”, 20 th paragraph, p. 14. |
| 14 | <u>Along with the growth of sales, heavy equipment rental financing</u> has also been growing. | Along with the growth of sales | heavy equipment rental financing | “Heavy equipment industry foresees bright outlook in 2017”, 8 th paragraph, p. 14. |
| 15 | <u>Nationally, heavy equipment leasing</u> saw 48 percent yoy growth in 2016. | Nationally | heavy equipment leasing | “Heavy equipment industry foresees bright outlook in 2017”, 8 th paragraph, p. 14. |
| 16 | <u>Recently, China</u> closed the door against coal imports from North Korea. | Recently | China | “Heavy equipment industry foresees bright outlook in 2017”, 18 th paragraph, p. 14. |
| 17 | <u>Last year, North Korea</u> exported 22 million tons of coal to China, which represented 12 percent of the latter’s total import. | Last year | North Korea | “Heavy equipment industry foresees bright outlook in 2017”, 19 th paragraph, p. 14. |
| 18 | <u>More than 53,000</u> | More than | people in the | “BLOOD TEST |

| | | | | |
|----|--|--|-------------------------------|--|
| | <u>people in the United States</u> are diagnosed with pancreatic cancer annually. | 53,000 | United States | MAY FIND EARLY PANCREATIC CANCER”, 3 rd paragraph, p. 23. |
| 19 | <u>Currently, PetroChina employs more than 1,000 employees in Jakarta office and fields. Employees</u> make up a powerful force in our operations here, Gong added. | Currently, PetroChina employs more than 1,000 employees in Jakarta office and fields. | Employees | “PetroChina moves forward after 15 years of operation”, 6 th paragraph, p. 3. |
| 20 | <u>During 15 Years Of Its Presence In Indonesia,</u> <u>PetroChina</u> has only been involved in upstream oil and gas sector. | During 15 Years Of Its Presence In Indonesia | PetroChina | “PetroChina moves forward after 15 years of operation”, 11 th paragraph, p. 3. |
| 21 | <u>“For long-term strategy, Indonesia</u> is still a very promising country in energy sector. We believe that the government will continue to create a better investment climate,” he said. | For long-term strategy | Indonesia | “PetroChina moves forward after 15 years of operation”, paragraph 14 th , p. 3. |
| 22 | <u>Fifteen years of PetroChina’s operation</u> have prepared us to move forward and provide energy of life for Indonesia. | Fifteen years | PetroChina’s operation | “PetroChina moves forward after 15 years of operation”, 17 th paragraph, p. 3. |
| 23 | <u>During Jokowi’s</u> | During | Heru | “City official to |

| | | | | |
|----|--|---|---|--|
| | <u>time as the governor of the capital, Heru</u> served as the head of the gubernatorial and Foreign Affairs Bureau before serving as North Jakarta Mayor. | Jokowi’s time as the governor of the capital | | get job at State Palace”, 5 th paragraph, p. 4. |
| 24 | <u>“After I graduated,</u> <u>I</u> joined PSM UI Paragita to expand my knowledge. It’s nice to meet friends from different faculties who also love to sing together in a choir. We’ve become a family,” said Jeremy. | After I graduated | I | “Students nurture singing hobby, go abroad with choirs”, 6 th paragraph, p. 4. |
| 25 | <u>Since 1984, PSGSJ</u> has competed in several competitions in Jakarta. | Since 1984 | PSGSJ | “Students nurture singing hobby, go abroad with choirs”, 11 th paragraph, p. 4. |
| 26 | <u>Since its establishment in August 1983, PSM UI Paragita</u> has been known for its achievements at national and international competitions. | Since its establishment in august 1983 | PSM UI Paragita | “Students nurture singing hobby, go abroad with choirs”, 11 th paragraph, p. 4. |
| 27 | <u>Recently, 36 singers from PSM UI Paragita and Indonesia soprano, Aning Katamsi,</u> Aning Katamsi, competed at two | Recently | 36 singers from PSM UI Paragita and Indonesia soprano, Aning Katamsi | “Students nurture singing hobby, go abroad with choirs”, 15 th paragraph, p. 4. |
