

CHAPTER V

CONCLUSION AND SUGGESTION

A. Conclusion

An objective of this research was to describe the improvement of their mastery of simple past tense after using Numbered Heads Together (NHT). Based on the data that had been analyzed by the researcher in the previous chapter, the researcher concluded that Numbered Heads Together was facilitating students to improve their mastery on simple past tense. It could be seen by the result of their improvement score from pre cycle until cycle II. The average score of students in pre cycle was 51,25 with the median and modus of students' scores was 50. While it was 64,67 in cycle I with the median of the students' scores was 60 and modus of the students' scores was 70. Then the average of students' score was 75 in cycle II with the median and modus of score was 70.

In addition, the percentage of students' improvement score from pre cycle to cycle I was 56,5%. while the percentage of students' improvement score from cycle I to cycle II was 43,5%. So, it can be concluded that the percentage of students' improvement score from pre cycle until cycle II was 100%.

B. Suggestion

After conducting and knowing the result of the research, then the researcher considered some suggestions in order to improve students' mastery on grammar, especially on simple past tense. The researcher' suggestions as follow:

1. For the English Teacher

Teacher has the important role in teaching and learning process. To make students feel enjoy and attract in learning activity, a teacher has to use the innovative learning strategy. It aimed to create the atmosphere of the class be comfort. In addition the students can be more active and attractive in learning English.

2. For the Students

Students have to study more and practice it in order to improve their ability in English, especially in English grammar. They need to practice it in their writing or speaking skill.
