

CHAPTER V

CONCLUSION

A. CONCLUSION

After describing the result of research, the writer can draw the conclusions. Based on the result of The Influence of Picture Series on Students' Writing Ability of Descriptive Text that was carried out in SMP Negeri 23 Semarang in academic year of 2016/2017, the writer draw conclusion. The conclusion based in the previous chapters which have been discussed.

There is effectiveness of using picture series to teach descriptive text writing. It was proved by the average score that students achieve in pre-test of control class was 74.94 and in experimental class was 75.31. The average score that students achieve in post-test of control class was 75.72 and in experimental class were 81. This result shows that there is significant improvement on students' writing ability of descriptive text. It was found there was significant influence on using picture series on students' writing ability of descriptive text. It can be seen from computation result that the value of t_{count} was $5,12 > t_{\text{table}} = 1,671$. Writer draw conclusion that hypothesis accepted. Since the t_{count} was higher than t_{table} , there was a significant difference in the achievement between students in experimental class who were taught by using picture series and control class who were taught without picture series as special treatment.

B. SUGGESTION

From the conclusion above, there are some suggestions that are proposed by the writer:

1. Teacher should try to use picture series in teaching of descriptive text, because it can help students to express their idea through picture. Using picture series, students will be easier to express their ideas; they can reflect on the picture and start to write the descriptive text based on the picture series and their imaginary about the picture series.
2. Teacher needs an extra time to prepare picture that suitable and appropriate to the students. Teacher should give handout the photocopied picture to the students.
3. Teacher should give clear instruction to students. When using the picture series, there are many questions whether students describe exactly same as the picture or can make innovation based on their imagination.
4. Teacher should prepare the situation well and able to manage the class.

C. CLOSING

Finally, the thesis was made; the true praise is only to Allah, who gives power and health until this final project can be finished. The writer realizes that this thesis is far from being perfect. Because of that, constructive critics and advice are really expected for the perfection of the writer's future research. Hopefully this thesis will be useful for all of us.
