B. SUGGESTION

Based on the result of the research which has been done the researcher expects it can give a contribution for education especially in English learning. Some suggestions for the teaching and learning English are proposed as follows:

1. For the writer

When arranging a textbook, the writer should consider the content and the curriculum as the frame of reference, in order that purpose of learning can be reached.

2. For the teacher

It is necessary for the English teacher to be more selective for choosing the English textbook as guidebook in teaching learning process. English textbook published by Ministry of education and Culture can be primary book, but it needs support from the other books.

3. For the students

To improve English ability, the students should use more than one book. The students can use English textbook published by Ministry of Education and Culture to learn English easier.

4. For the next researcher

The researcher hopes that the next researchers can prepare everything as good as possible in conducting the research and can do the follow up of this research.
